## **EURES formats and standards specification**

### **Part 2: EURES job seeker profile data standard description**

Subject	EURES formats and standards specification - part 2 Job seeker profile data standard description
Version	1.2
Release Date	11/09/2017
Filename	EFSS_v1.02_part_2_JSP.docx
Document Reference	EFSS_JSP

## EURES Job Application Data Standard description

### Abstract

The purpose of this document is to describe in detail the EURES Job Application Data Standard Specification, which is the format used for the exchanges of CVs between the national partners and the EURES central system. This document defines the structure, the code lists to be used and the Business Rules that apply for each of the elements.

# 1 Introduction

## 1.1 Document Scope

EURES Job Application Data Standard is used to describe data models and business rules that are needed to communicate Job Applicant's information (CV) within EURES Network and are further based on HR Open "Candidate" specification version 3.2.

The scope of this document is to provide a detailed description of the EURES Job Application Data Standard "**static**" model.

The "static" part describes the model as it is, including its elements, cardinality and necessary business rules without considering its interaction with other external systems. The description of this external interaction is known as the "dynamic" part of the model and is outside the scope of the present document.

## 1.2 Intended Audience

The present document is intended to be read by the following teams, among others:

- The **DG EMPL Team**;
- **Technical integrator users from Employment Services (ES)** interested in interoperating with the Interoperability Platform, with the responsibilities of adapting the CVs XMLs from the ES to the new standard;
- **Interoperability Platform developers**, responsible for implementing the different scenarios defined.

## 1.3 Document Structure

This document is structured in a comprehensible way, in order to facilitate implementation of the new CV standards defined. It includes:

- The **CV standard model approach**
- A **detailed description of the EURES CV "static" standard**, including examples of its application

## 2 Background

### 2.1 Design Approach

The **technical solution is designed** to take advantage of the information contained in the JV and CV.

The approach was to:

- Not reinvent the wheel.
- Re-use an existing business language.
- Select an international standard.
- Have an open and royalty-free standard.
- Have, if possible, a HR domain-related standard.

The standards adopted are **HR-Open Standards**, as:

- It is an open and free international standard.
- It is not a merely generic business language.
- It covers a large part of the EURES business domain.
- It is already being used by Employment Services.

### 3 CV Model Approach

The static defined standard includes a **tree of elements**, where each element contains the following information:

- **Cardinality**, which measures the number of possible occurrences of the element (1, 0..n, ..).
- **Attributes**: it indicates the elements' features. Only the most important attributes are shown in this tree of elements.
- Each element of the model tree has a **type of layer** (see “3.10 Layers Approach”) describing its relationship with the Interoperability Platform. It is represented by the colour of the elements.

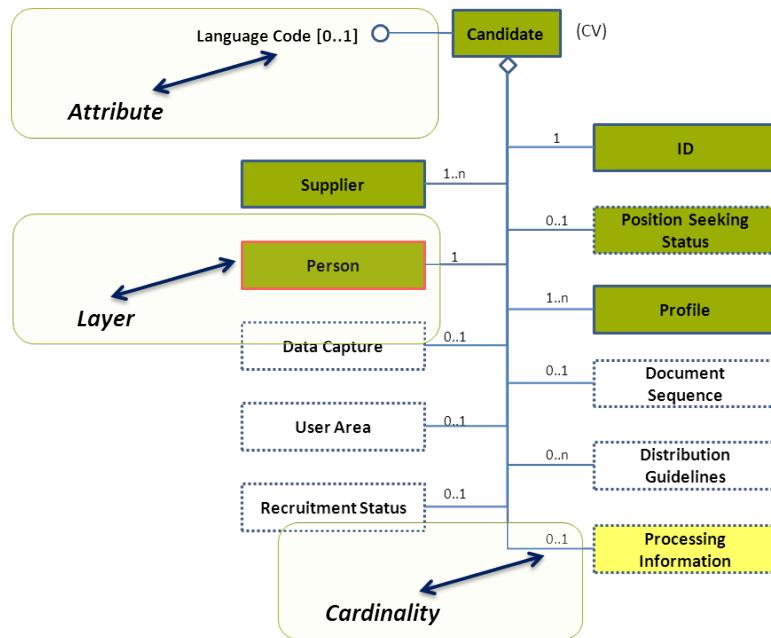

Figure 1: Example of a tree of elements representing the CV standard

#### 3.1 Layers Approach

This model starts from the HR-Open Standards template. This template determines the structure and the number of fields possible. The EURES version of this model considers all elements of this standard template and assigns them in 3 layers. Some of the layers will impose extra requirements for certain fields.

- **Green colour**: This indicates that this information is essential to the EURES standard, and should be provided by the source of this job vacancy. The information could be essential for job matching and the lack of it can influence our main goal.
- **Yellow colour**: The information elements in this layer are optional for the use by the EURES system. They will be checked and can be used to display additional information or improve some optional search/matching features. The EURES partners are free to decide if they send in this information. However when they do so, the information needs to follow the rules of this standard.
- **White colour**: The remaining part of the template that is there to be fully compliant with the standard, but these elements are not used by the EURES System.

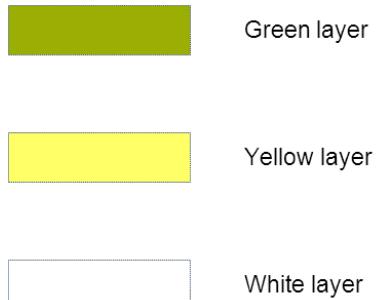

Figure 2: Description of the layer colours

An example:

Employer X can hand over a job vacancy in the HR-Open Standards to an employment agency Y. This EURES partner Y will adapt the information if needed and send it in to the EURES interoperability platform. This means that they will make sure the green and yellow parts are in line with the expectations specified in this document. The white part (information send in by the employer but outside of the matching scope) will not be removed; it just remains in the job vacancy. If the job vacancy would be retrieved by another player, they may still want to use the other layers.

To understand the layers that have been added to this implementation of the HR-Open Standards, you have to consider the **2 main targeted user groups**:

- The model is designed to be used by the EURES partners to exchange information and perform matching according to an agreed set of data.
- Next to this, the model will be used by interested industry partners to exchange data beyond the boundaries of the EURES partners. They can benefit from the advantages of the open standard, and a fast exchange opportunity from or to a EURES partner.

Next to this division in 3 layers, the model can represent each element with some special indicators (dotted/solid lines, red border). These details are more important for the **technical implementation of validation rules**.

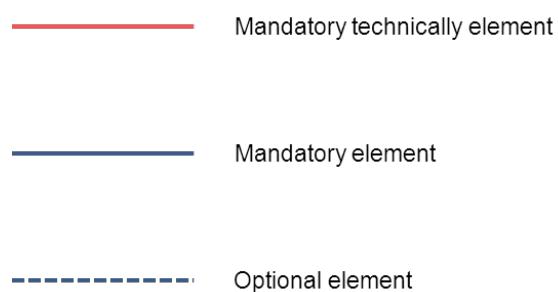

Figure 3: Description of the layer lines types

The diagram below provides a detailed overview:

	EURES Conformant layer			EURES optional layer		HR-Open Standards optional layer
	EURES technical minimum	EURES conformant mandatory	EURES conformant optional			
Description	Elements that are mandatory for technical acceptance of the message.	Elements that are needed to EURES and should be there.	Elements that are needed to EURES but could not be filled for business reasons.	Optional entities for the EURES model.		Elements that EURES does not need but the ES could need the information for their needs.
Graphical representation						
Cardinality	1/1..n	1/1..n	0..n	1/1..n	0..n	
Target users of this layer	EURES platform (involved in Matching)	EURES platform (involved in Matching)	EURES platform (involved in Matching)	EURES platform (displayed only) + PES and PRES applications		Rest of the world
Treatment of the lack of values	The XML will be rejected.	Lack of data will be stored with a flag of non-conformance. A conformance score will be obtained including the % of unfilled values.	If data are not received it will not be penalised. But if data are provided and the information is missing it will be flagged as bad quality. A conformance score will be obtained including the % of unfilled values within the ones that are provided.	If they are not received it will not be penalised, but if they are received they will be considered. Lack of data will be stored with a flag of bad quality. A quality score will be obtained including the % of unfilled values.		The data will not be stored.
Examples of elements in this layer	Jobseeker given name	Contact address and education	"Work experience" can be empty in a CV for someone that had no job before.	Photo or availability dates		Recruitment status

Figure 4: Detailed description of EURES layers

**The ES will be able to share CV information with the EURES Hub using any of the layers.**

### 3.2 Design Criteria

The following **design criteria** have been followed:

#### TREE DECOMPOSITION:

- Each diagram will have one decomposed sub-element. This means, that the root element will be repeated (e.g. profiles, languages, etc.), in each decomposed diagram.

#### ASSIGNMENT OF THE LAYER TYPE

- The layer type of an element will be constrained by its parent's layer, meaning that a sub-element may have the same layer type than its parent, or a less restrictive one.
- In this example, the root element belongs to the "EURES conformant layer" (green). However, its sub-elements may be "EURES conformant layer" (green), but also they may be "EURES optional layer" (yellow) or "HR-Open Standards optional layer" (white), regardless of their cardinality (i.e. 1, 1..n or 0..n):

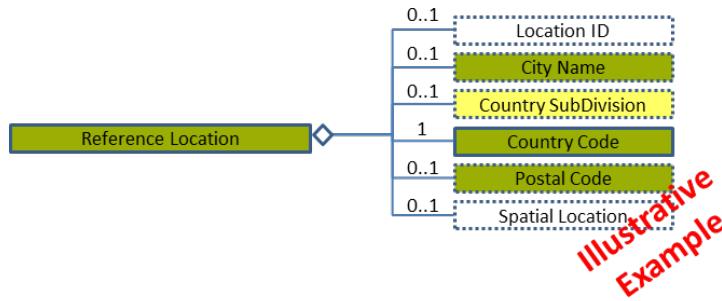

Figure 5: Example of tree of elements applying "EURES conformant layer" design criteria

- The same applies to an element that belongs to the "EURES optional layer" (yellow), which its sub-elements may be "EURES optional layer" (yellow) or "HR-Open Standards optional layer" (white). They can't be green any more:

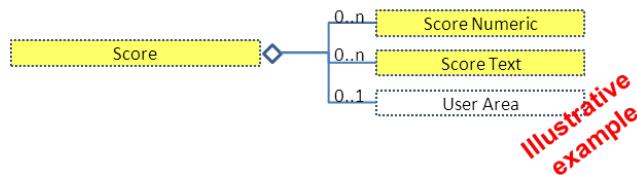

Figure 6: Example of tree of elements applying "EURES optional layer" design criteria

## ASSIGNMENT OF THE CARDINALITY

- An element may be mandatory (cardinality 1 or 1..n) or optional (cardinality 0..1 or 0..n). However, its assignment does not depend on its layer type.
- A mandatory element is required to appear, as long as its parent also appears. According to the layer type, the lack of values of a mandatory element is treated in a different way.

For example, a mandatory element which layer is "EURES conformant layer" (green) may imply:

- The XML will be rejected if the element is "EURES technical minimum".
- "EURES conformant mandatory": the lack of data will be stored with a flag of non-conformance and a conformance score will be obtained including the % of unfilled values.

On the other hand, a mandatory element as "EURES optional layer" (yellow) implies:

- Lack of data will be stored with a flag of bad quality. A quality score will be obtained including the % of unfilled values.
- The design criterion implies that a mandatory element should meet one of the criteria in order to not have an empty element:
  - At least one of its sub-elements should be mandatory (cardinality 1 or 1..n):

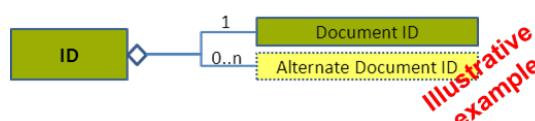

Figure 7: Example of tree of elements applying "EURES mandatory" design criteria

- A Business Rule (BR) will be applied pointing out that at least one of its sub-elements must be filled in:

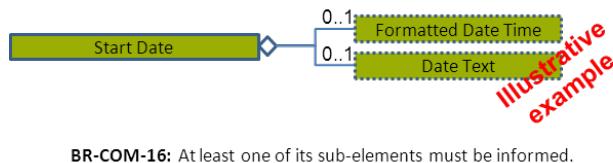

Figure 8: Example of tree of elements applying "EURES mandatory" business rule

## MISSING VALUES

- Information could be missing because of 2 reasons. First because the Employment service does not have this information in its database at all. A second reason is when the database could have the information, but it was not provided by the jobseeker for this specific CV. The Interoperability Platform will differentiate between these 2 cases by the following rule:
  - Not including the tags of an element in the XML file means that the Employment services do not have this information in their database for all CV's.
  - Including an element's tags in the XML file, but leaving them empty (e.g. <EmploymentHistory> </EmploymentHistory>) means that the Jobseeker did not provide any work experience.

Please note that this differentiation may be used by matching engines in certain rules.

## 3.3 Specific Topics

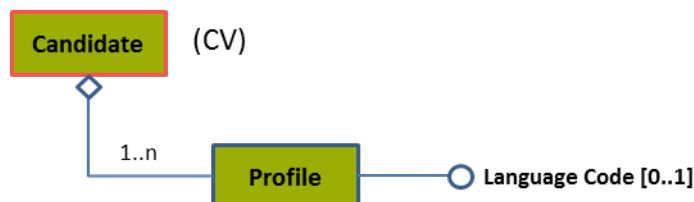

The following **topics** impact on the whole model:

### 3.3.1 CV in Multiple Languages

How should EURES check that a Candidate has the same CV in different languages?

The agreed solution is that:

- It will be controlled at the Candidate Profile level and each language will have a profile (see section “4.11.2 Profile Attributes”).
- This decision will include the following Business Rules:
  - **BR-COM-01:** If not otherwise specified, “EN” (English) is used as the default language.
  - **BR-COM-02:** Multiple profiles are allowed, but it must be expressed in different languages.

Please, see section “4.11.3 Profile Examples” for more examples.

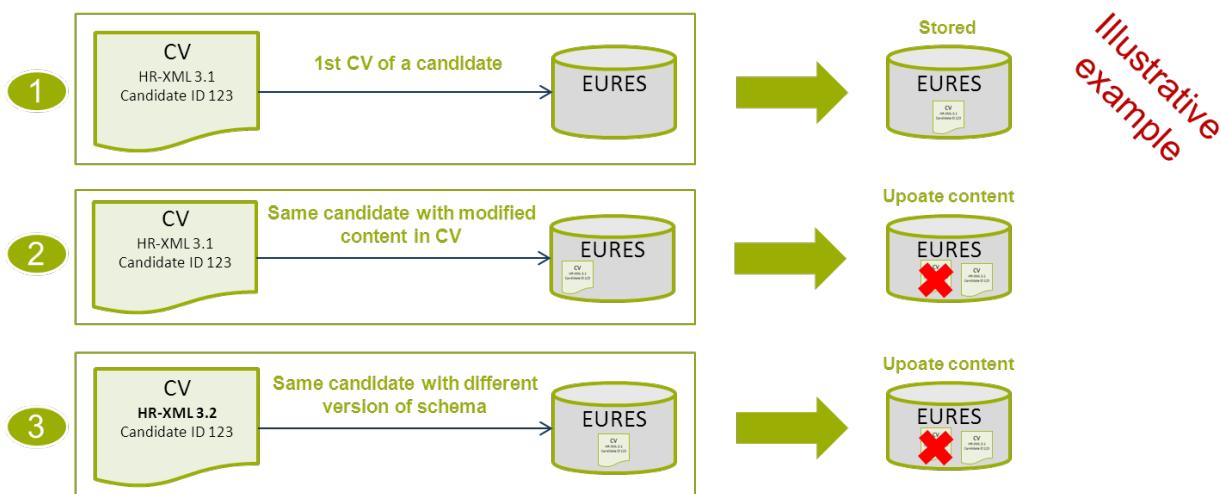

### 3.3.2 Content Versioning

Versioning is involved at the level of the **standard template** used for exchanging the data and at the level of changes in the **content of a CV** (changes in the content of one or more fields of a CV).

- The Interoperability Platform will not store the history of **content versions**. This means that when a CV is updated (for instance the address of the jobseeker is changed), its old content will be removed and lost **inside** the interoperability platform storage.

This does NOT mean that the owner of this CV can't keep a history of all changes in a CV in its own system. However when sending the data to the interoperability platform, it is expected to represent only the most recent information and no history of changes.

- In each exchange also the version of the EURES schema (template) being used needs to be expressed (i.e. 3.1, 3.2).

### 3.3.3 Code List Version

Codes are used to identify concepts. The standard EURES CV and JV use codes intensively, as codes are one of the most powerful solutions for ensuring interoperability.

Which version of these code lists will this standard use?

- For each **code list**, the latest available version of the current versions of the standard being designed is used. Only one version for each code list is used.
- However, for specific cases, a code list may be limited or a specific version may be chosen; this will be explained where the code list is specified.

### 3.3.4 Identifiers

A CV can pass from partner to partner before entering the interoperability platform. Each system may want to add its own identifier to the document for traceability. This way the EURES partner that puts the document on the platform can trace back to the owner when needed for referral. Therefore this document will set the rules to enable all parties to trace back when needed.

The document identifiers are stored in the Document ID:

- The **Document ID element** will store the original document identifier. Any additional identifiers will be stored in Alternate Document ID.
- The following Business Rule (**BR-CV-01**) establishes the identifier order:
  - The *SchemaAgencyID* attribute of the *DocumentID* and *SupplierID* elements must be the same.
  - The Supplier's *Precedence* element must store the identifier's order of arrival.

Please see sections “4.3 /ID (level 1)” and “4.5 /Supplier (level 1)” for more examples.

## 4 EURES CV “Static” Standard Description

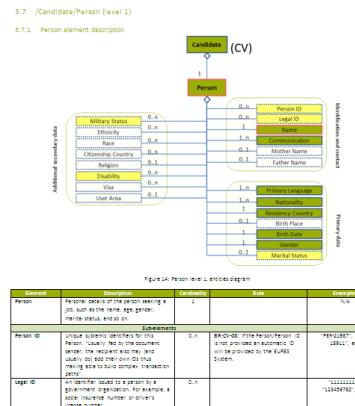

The EURES CV model is based on the HR-Open Standards 3.2 “Candidate” specification<sup>1</sup>.

It has the following characteristics:

- This specification has been customised in order to better meet the information exchange and matching objectives defined in EURES.
- The elements which are not described in this specification are not allowed
- The XSD specifies that the elements of the XML implementation MUST appear in a sequence. One of the validation rules is to check that the sequence of the elements is compliant with the XSD

The **model is shown in the diagram level by tree level:**

- An overall view of the entities diagram.
- A description of how the entity diagrams correspond to details of the relevant information elements with business semantics (only when not previously disaggregated).
- Names and descriptions for each of these elements, their restrictions and when relevant Business Rules should be taken into consideration.
- An examples column where some elements are complex (including different sub-elements) and are represented with N/A.

### 4.1 Overall View

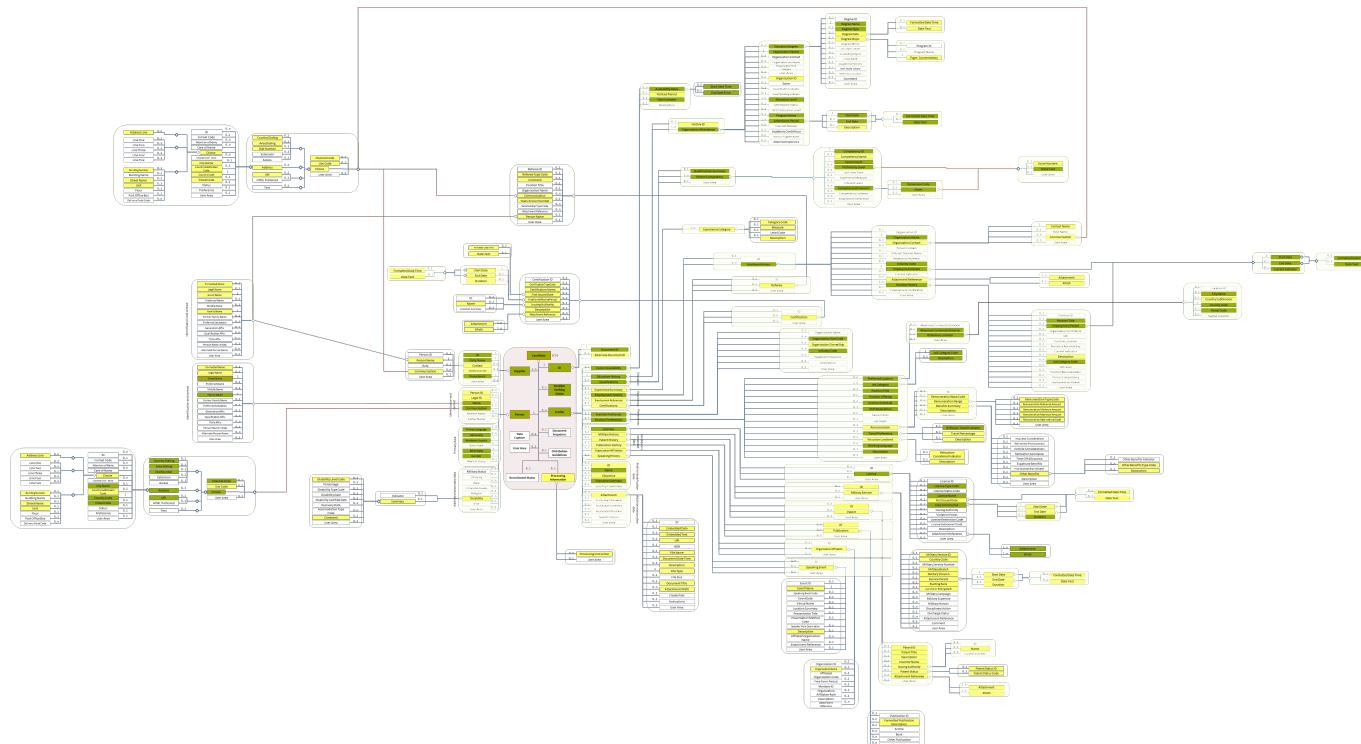

Figure 9: Overall view Entity Diagram

<sup>1</sup> “Candidate” is the HR-Open Standards Noun of the GetCandidate package: [http://ns.hr-xml.org/Schemas/org\\_hr-xml/3\\_2/Documentation/indexes/index.php](http://ns.hr-xml.org/Schemas/org_hr-xml/3_2/Documentation/indexes/index.php)

## 4.2 /Candidate (level 0)

### 4.2.1 Candidate Element Description

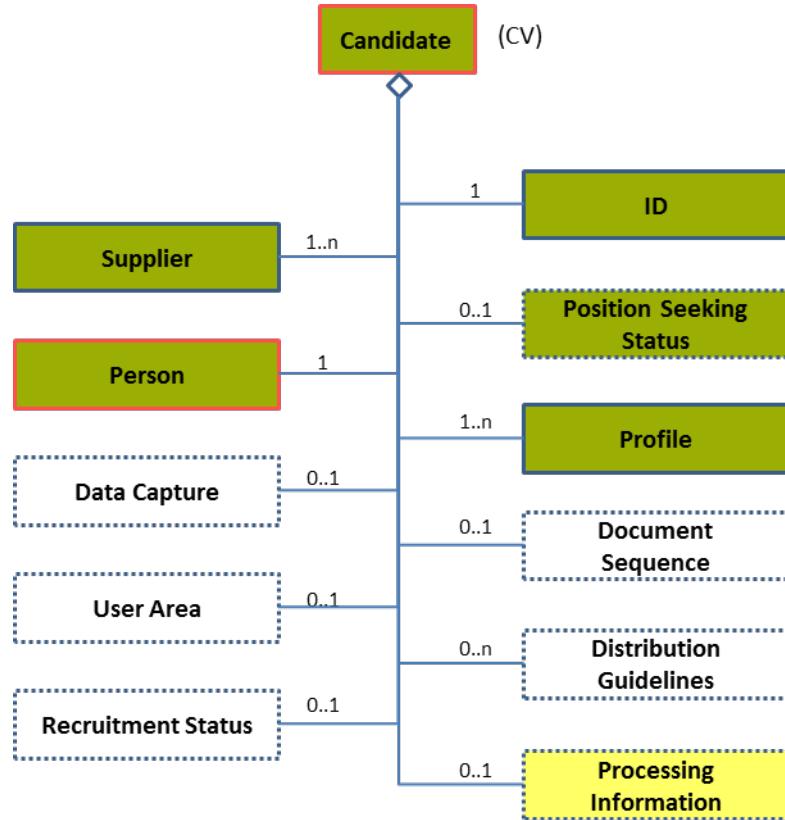

Figure 10: Candidate Level 0 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Candidate</b>	The root element containing the definition of a candidate, i.e. jobseeker or Job changer's CV that is exchanged between an ES and Interoperability Platform and that is to be matched with open Job Vacancies.  Only one candidate element is allowed.	EURES Technical Minimum / 1	<b>BR-CV-02:</b> Only One Candidate (CV) per XML document instance is allowed.	N/A
<b>Sub-elements</b>				
<b>ID</b>	Provides the Identifier(s) of the document being communicated. It only identifies the Document within the sender organisation.	EURES Conformant / 1	N/A	N/A
See section "4.3 /ID (level 1)" for more information.				
<b>Processing Information</b>	Includes the target system codes that are related to document processing. In EURES, this element is used to carry "visibility" and "data protection" instructions to the Interoperability Portal.  See the description of this element for more details.	EURES Optional / 0..1	<b>BR-CV-03:</b> If the /Candidate /Processing Information element is not present in a Candidate's XML document instance, no visibility restrictions concerning this CV will be applied (i.e., all fields will be visible).	N/A
See section "4.4 /Processing Information (level 1)" for more information.				
<b>Supplier</b>	Information about the supplier of the candidate details. This can be the	EURES Conformant	N/A	N/A

Element	Description	Layer / Cardinality	Rule	Examples
	candidate him/herself through the EURES Portal, or a third party (a PES, for instance).	/ 1..n		
	See section "4.5 /Supplier (level 1)" for more information.			
Position Seeking Status	A code classifying the candidate's job search pattern or disposition.  This is an HR-Open Standards open list.	EURES Conformant Optional / 0..1	<b>BR-CV-04:</b> The "PositionSeekingCodeContentType" " HR-Open Standards Code List must be used to codify the /Candidate /Position Seeking Status.	"Active", "Passive", "NotConsideringPositions"  Full code list: "4.28.26 Position Seeking Status Enum Type [CL39]"
Person	Personal details of the person seeking a job, such as his/her name, age, gender, and so on.	EURES Technical Minimum / 1	N/A	N/A
	See section "4.7 /Person (level 1)" for more information.			
Profile	The candidate's structured set of characteristics, such as his/her Qualifications, Work Experience, and so on.  More than one profile is allowed in order to provide the information in different languages. Thus the need for cardinality 1..n.  It is the responsibility of the person who builds up the CV to make sure that a profile is expressed in the same language and those different profile language versions contain exactly the same information.	EURES Conformant / 1..n	<b>BR-COM-01:</b> If not otherwise specified, "EN" (English) is used as the default language.  <b>BR-COM-02:</b> Multiple profiles are allowed, but it must be expressed in different languages.	N/A
	See section "4.11 /Profile (level 1)" for more information.			

#### 4.2.2 Candidate Attributes

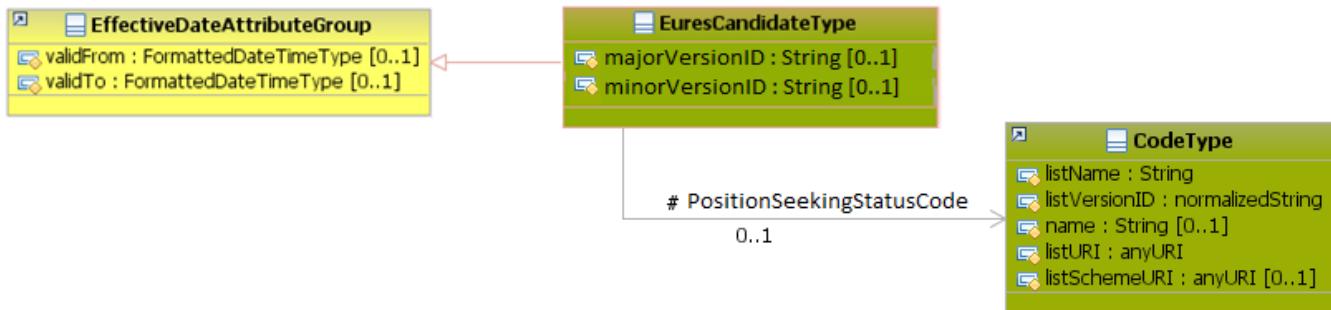

Figure 11: Candidate Attributes Schema

Attributes	Description	Card.	Rules/Comments	Examples
<b>majorVersionID</b>	Identifies the major version of the HR-Open Standards schema.	0..1	N/A	"3"
<b>minorVersionID</b>	Identifies the minor version of the HR-Open Standards schema.	0..1	N/A	"2"
<b>validFrom</b>	Specifies the date of reception of the document in the Interoperability Platform.	0..1	<b>BR-COM-05:</b> If not specified, the "validFrom" date will default to "assigned by EURES on reception".  <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.	"2012-10-10"
<b>validTo</b>	Specifies the last date when the CV will be active.	0..1	<b>BR-COM-07:</b> If not specified, the "validTo" date will be decided by EURES depending on the transaction context.	"2014-08-01"

Attributes	Description	Card.	Rules/Comments	Examples
			<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.	
<b>PositionSeekingStatusCode sub-element</b>				
Attributes	Description	Card.	Rule/Comments	Examples
<b>listName</b>	The code list name	1	N/A	N/A
<b>listVersionID</b>	The code list identification	1	N/A	N/A
<b>name</b>	The text equivalent of the code content component	0..1	N/A	N/A
<b>listURI</b>	The Uniform Resource Identifier that identifies where the code list is located.	1	N/A	N/A
<b>listSchemeURI</b>	The Uniform Resource Identifier that identifies where the code list scheme is located.	0..1	N/A	N/A

Please notice that the Schema version is identified in EURES. It is based on the Schema namespace, which contains both the name and the version of a specific Schema. It consists in parsing the Schema namespace and isolating the version identification from the name. Therefore, EURES Schema names are compounded based on a strict compulsory pattern:

[http://ec.europa.eu/eures/standards/\[Year\]/\[SchemaName\]-\[IntegerVersionDigit.DcimalVersionDigit\]](http://ec.europa.eu/eures/standards/[Year]/[SchemaName]-[IntegerVersionDigit.DcimalVersionDigit])

as in “<http://ec.europa.eu/eures/standards/2012/Candidate-1.0>”.

The EURES schema uses the following namespace definitions:

- `xsi:schemaLocation="http://www.hr-xml.org/3 ../Developer/Nouns/Candidate.xsd"`
- `xmlns="http://www.hr-xml.org/3"`
- `xmlns:oa="http://www.openapplications.org/oasis/9"`
- `xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"`

#### 4.3 /ID (level 1)

##### 4.3.1 ID Element Description

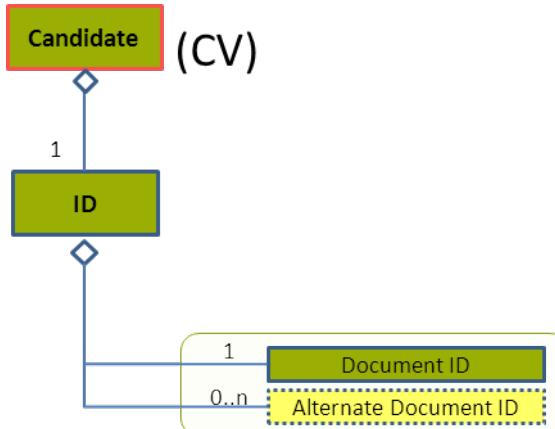

Figure 12: ID Level 1 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>ID</b>	A structured set of Identifier(s) of the document being communicated. It only identifies the document within the	EURES Conformant	N/A	N/A

Element	Description	Layer / Cardinality	Rule	Examples
	supplier organisation and facilitates document identification based on other stakeholder identification systems (such as the receiver's, i.e. EURES), but is also the originator of the document (not the supplier' system identifier) and other intermediate systems (the broker system, for example).	/ 1		
<b>Sub-elements</b>				
<b>Document ID</b>	This only identifies a document within the Candidate's supplier organisation. Typically there is only document IDs within supplier organisation systems. It stores the original identifier of the document.	EURES Conformant / 1	<b>BR-COM-08:</b> The Document ID identifier must be a UUID and it must be provided by the first sender of the document.	"DOC-1828217"
<b>Alternate Document ID</b>	Additional identifiers for this document. If EURES has to exchange this document with third parties, a EURES alternate ID (only an identifier within the EURES information system) is added. This construct is designed to allow for these different identifications.	EURES Optional / 0..n	N/A	"ES-DOC-1828217"

Please, see section “3.3 Specific Topics” for more information about how to establish the order of identifiers.

#### 4.3.2 ID Attributes

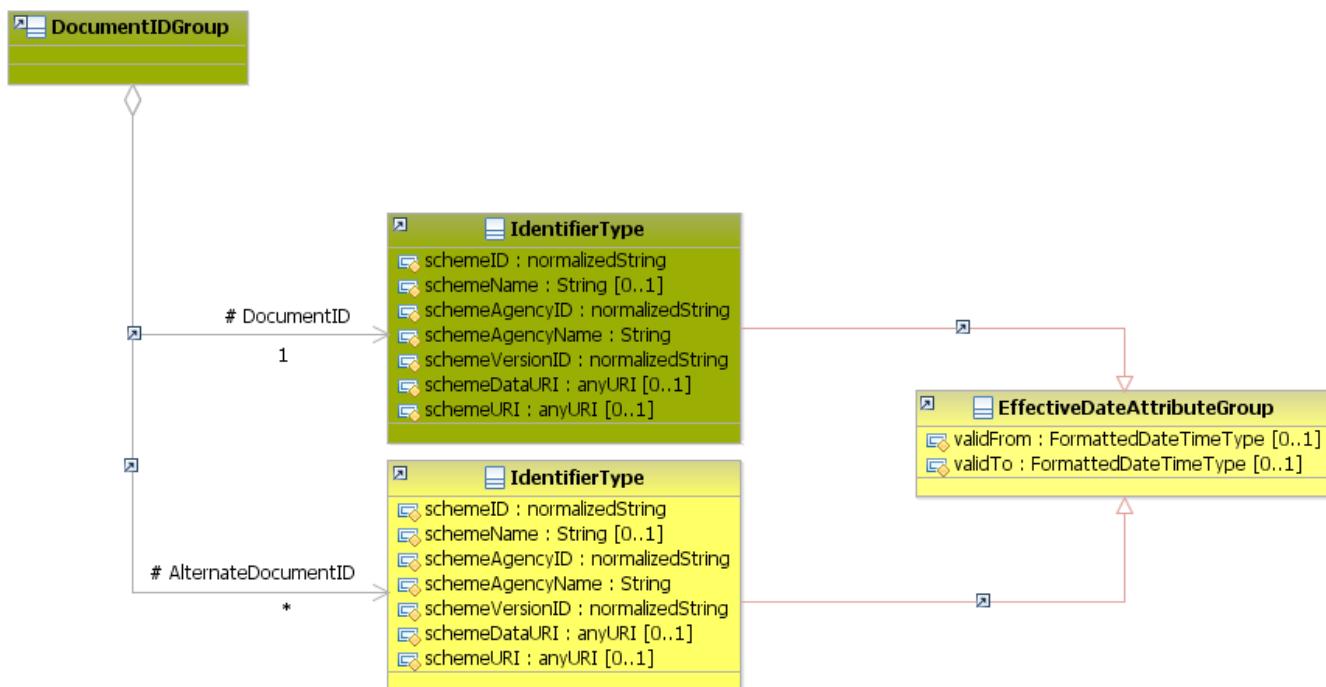

Figure 13: ID Attributes Schema

Attributes	Description	Card.	Rule
This element has no attributes.			
<b>DocumentID sub-element</b>			
Attributes	Description	Card.	Rule
<b>schemeID</b>	Identification of the identifier scheme	1	N/A
<b>schemeName</b>	The identification scheme name	0..1	N/A
<b>schemeAgencyID</b>	Identification of the agency that maintains the scheme	1	N/A
<b>schemeAgencyName</b>	The name of the agency that maintains the scheme	1	N/A
<b>schemeVersionID</b>	The version of the EURES HR Standards.	1	<b>BR-COM-45:</b> Compulsory use of EURES HR Standard version Version Codes [CL55]
<b>schemeDataURI</b>	The Uniform Resource Identifier that identifies where the data scheme is located	0..1	N/A

Attributes	Description	Card.	Rule
<b>schemeURI</b>	The Uniform Resource Identifier that identifies where the scheme is located	0..1	N/A
<b>validFrom</b>	Validity starting date for this ID	0..1	<b>BR-COM-05:</b> If not specified, the “validFrom” date will default to “assigned by EURES on reception”.  <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity ending date for this ID	0..1	<b>BR-COM-07:</b> If not specified, the “validTo” date will be decided by EURES depending on the transaction context.  <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>AlternateDocumentID sub-element</b>			
Attributes	Description	Card.	Rule
It is the same as the “ <i>DocumentID</i> ” sub-element.			

#### 4.3.3 ID Examples

This example shows that the original document identifier is provided by a PES, named PES01 in this example, on January 1<sup>st</sup> 2014 and an additional identifier was provided by EURES the same day.

```

<Candidate xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" xmlns="http://www.hr-xml.org/3"
xmlns:oa="http://www.openapplications.org/oagis/9"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" majorVersionID="3"
minorVersionID="2">

    <!-- Original identifier provided by the PES -->
    <DocumentID
        schemeID="ID-1234"
        schemeName="DocumentIdentifier"
        schemeAgencyID="PES01"
        schemeAgencyName="PublicEmploymentService01"
        schemeVersionID="1.2"
        schemeDataURI="http://ec.europa.eu/eures/standards/2014/DOC/Data/ID"
        schemeURI="http://ec.europa.eu/eures/standards/2014/DOC/ID"
        validFrom="2015-12-10">
        DOC-1828217
    </DocumentID>

    <!-- Additional identifier provided by the PES -->
    <AlternateDocumentID
        schemeID="EURES"
        schemeName="DocumentIdentifier"
        schemeAgencyID="EURES"
        schemeAgencyName="EURES"
        schemeVersionID="1.0"
        schemeDataURI="http://ec.europa.eu/eures/standards/2014/DOC/Data/ID"
        schemeURI="http://ec.europa.eu/eures/standards/2014/DOC/ID"

    </AlternateDocumentID>
<Candidate/>
```

## 4.4 /Processing Information (level 1)

### 4.4.1 Processing Information Element Description

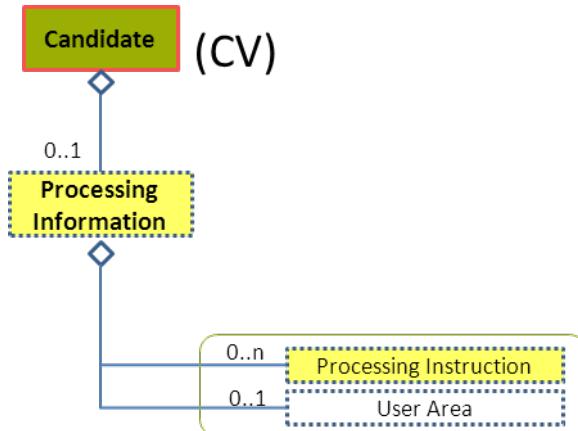

Figure 14: Processing Information Level 1 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Processing Information</b>	Includes codes relevant to a target system related to document processing. In EURES, this element is used to provide “visibility” and “data protection” instructions to the Interoperability Portal. See the description of this element for more details.	EURES Optional / 0..1	<b>BR-CV-03:</b> If the /Candidate /Processing Information element is not present in a Candidate’s XML document instance, no visibility restrictions concerning this CV will be applied (i.e., all fields will be visible).	N/A
<b>Sub-elements</b>				
<b>Processing Instructions</b>	Codes relevant to a target system (such as a resume parser or transformation engine) related to document processing. The Interoperability Portal uses this element to hide certain CV data, such as the Candidate’s name, phone number, etc., and to define which the data protection information is. A hidden element cannot be searched on the platform.	EURES Optional / 0..n	<b>BR-CV-03:</b> If the /Candidate /Processing Information element is not present in a Candidate’s XML document instance, no visibility restrictions concerning this CV will be applied (i.e., all fields will be visible).  <b>BR-CV-05:</b> Compulsory use of the “EURES_ProcessingInstructionsCodeList.gc” list defined by EURES.  <b>BR-COM-43:</b> Multiple entries of this code list are allowed.	“hideCandidateName”, “hideCandidateDateOfBirth”, “hideCandidatePhoto”, etc.  Full code list: “4.28.29 Processing instruction codes [CL43]”

#### 4.4.2 Processing Information Attributes

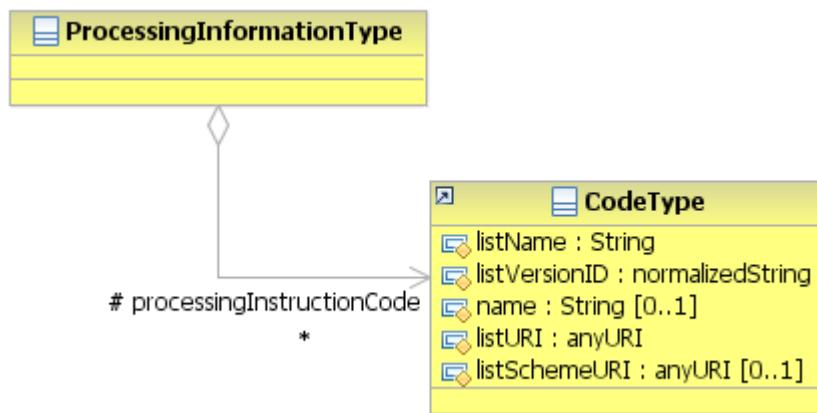

Figure 15: Processing Information Attributes Schema

Attributes	Description	Card.	Rule
This element has no attributes.			
<b>ProcessingInstructionCode sub-element</b>			
Attributes	Description	Card.	Rule
<b>listName</b>	The code list name	1	N/A
<b>listVersionID</b>	The code list identification	1	N/A
<b>name</b>	The text equivalent of the code content component	0..1	N/A
<b>listURI</b>	The Uniform Resource Identifier that identifies where the code list is located.	1	N/A
<b>listSchemeURI</b>	The Uniform Resource Identifier that identifies where the code list scheme is located.	0..1	N/A

#### 4.4.3 Processing Information Examples

These examples show that no visibility restrictions are applied.

1. The element is not displayed in XML file:

```

<Candidate xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" xmlns="http://www.hr-xml.org/3"
xmlns:oa="http://www.openapplications.org/oagis/9"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" majorVersionID="3"
minorVersionID="2">
  ...
<Candidate/>
  
```

2. The element is displayed, but it is empty.

```

<Candidate xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" xmlns="http://www.hr-xml.org/3"
xmlns:oa="http://www.openapplications.org/oagis/9"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" majorVersionID="3"
minorVersionID="2">

  <ProcessingInstructionCode listName="EURES_CV_ProcessingInstructionsCodes"
    listURI="https://ec.europa.eu/eures" listVersionID="1.0">

  </ProcessingInstructionCode>

<Candidate/>
  
```

This is an example of how to add visibility and searchability restrictions from different code lists:

- From the EURES Standard code list.
- From another standard not provided by EURES (e.g. Monster or LinkedIn). In this case, this information will not be saved.

```

<Candidate xsi:schemaLocation="http://www.hr-xml.org/3
..Developer/Nouns/Candidate.xsd" xmlns="http://www.hr-xml.org/3"
xmlns:oa="http://www.openapplications.org/oagis/9"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" majorVersionID="3"
minorVersionID="2">

    <!-- EURES Standards code list -->
    <ProcessingInstructionCode listName="EURES_CV_ProcessingInstructionsCodes"
        listURI="https://ec.europa.eu/eures" listVersionID="1.0">
        hideCandidateName
    </ProcessingInstructionCode>

    <!-- Another standard not provided by EURES -->
    <ProcessingInstructionCode
        listName="Monster_Visibility"
        listID="Monster_Visibility"
        listURI="https://monster..."
        listVersionID="1.0">
        hide_Jobseeker_name
    </ProcessingInstructionCode>
<Candidate/>
```

## 4.5 /Supplier (level 1)

### 4.5.1 Supplier Element Description

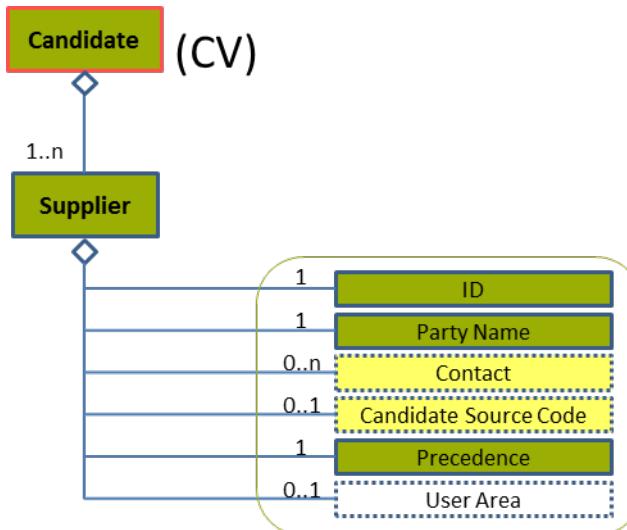

Figure 16: Supplier Level 1 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Supplier	Information about the supplier of the candidate details. This can be the candidate through the EURES Portal, or a third party (a EURES network member, for example).	EURES Conformant / 1..n	N/A	N/A
<b>Sub-elements</b>				

Element	Description	Layer / Cardinality	Rule	Examples
<b>ID</b>	Only an identifier that distinguishes a party system involved in a transaction. This identifier must be provided by the Interoperability Platform once registered.	EURES Conformant / 1	<b>BR-CV-06:</b> The /Candidate /SupplierID must be an UUID provided by the sender system.	"SUP-34833"
<b>Party Name</b>	The name of the company supplying the candidate.	EURES Conformant / 1	N/A	"Randstad", "Temp Jobs"
<b>Contact</b>	A detailed set of data about one or more people who should be contacted in order to communicate with the candidate's supplier.	EURES Optional / 0..n	N/A	N/A
	See section "4.6 /Supplier/Contact (level 2)" for more information			
<b>Candidate Source Code</b>	A code classifying the source that supplied the candidate.  This is an HR-Open Standards open list.	EURES Optional / 0..1	<b>BR-CV-07:</b> The HR-Open Standards Code List "CandidateSourceCodeType" must be used to codify the /Candidate /Supplier /Source.	"JobBoard", "StaffingAgency", "Intermediary", "Referrer"  Full code list: "4.28.1 Candidate Source Type Codes [CL04]"
<b>Precedence</b>	As more than one supplier can be provided, this set of enumerations indicates the identifiers' order of arrival.  This is an HR-Open Standards open list.	EURES Conformant / 1	<b>BR-CV-08:</b> The HR-Open Standards Code List "PrecedenceEnumType" must be used to codify the /Candidate /Supplier /Precedence.	"1", "2", "3", "4", "5"  Full code list: "4.28.28 Precedence Enum-Type Codes [CL41]"

#### 4.5.2 Supplier Attributes

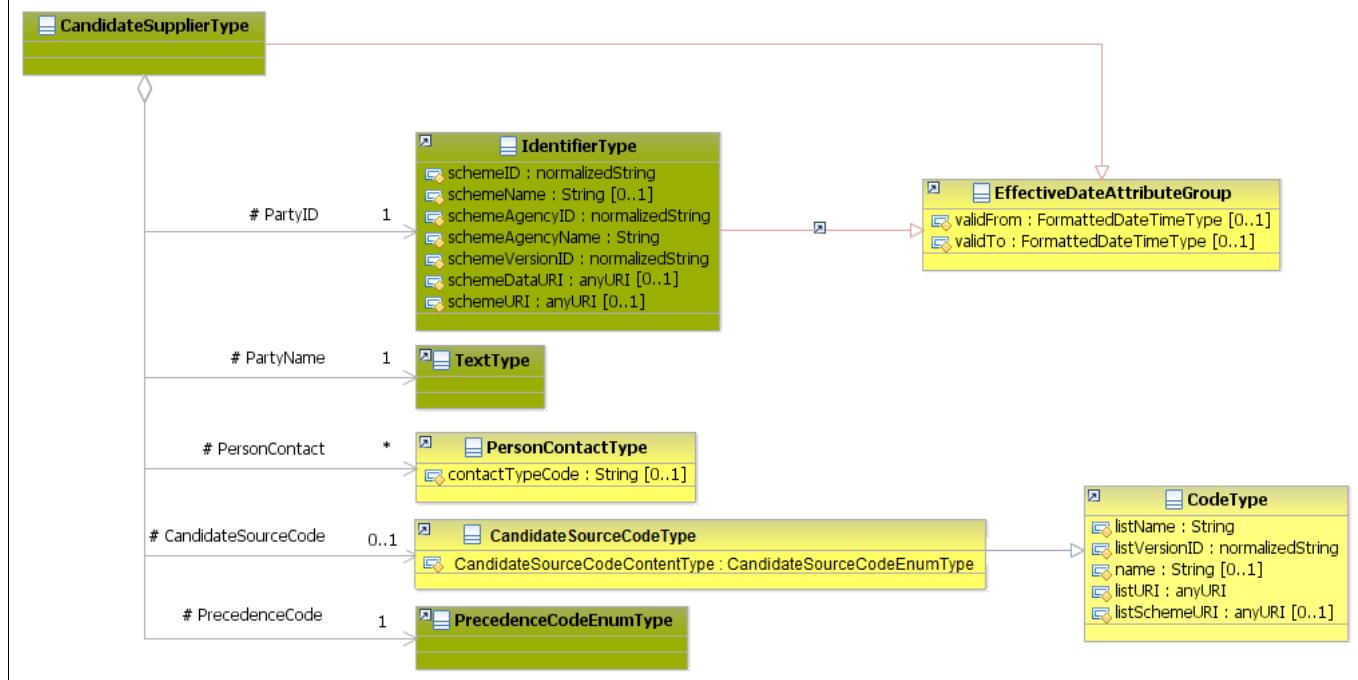

Figure 17: Supplier Attributes Schema

Attributes	Description	Card.	Rule
<b>validFrom</b>	Validity start date for this Supplier	0..1	<b>BR-COM-05:</b> If not specified, the "validFrom" date will default to "assigned by EURES on reception". <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.

Attributes	Description	Card.	Rule
<b>validTo</b>	Validity end date for this Supplier	0..1	<b>BR-COM-07:</b> If not specified, the “validTo” date will be decided by EURES depending on the transaction context. <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>PartyID sub-element</b>			
Attributes	Description	Card.	Rule
<b>schemeID</b>	The identification of the identifier scheme	1	N/A
<b>schemeName</b>	The identification scheme name	0..1	N/A
<b>schemeAgencyID</b>	The identification of the agency that maintains the scheme.	1	N/A
<b>schemeAgencyName</b>	The name of the agency that maintains the scheme	1	N/A
<b>schemeVersionID</b>	The identification scheme version	1	N/A
<b>schemeDataURI</b>	The Uniform Resource Identifier that identifies where the data scheme is located	0..1	N/A
<b>schemeURI</b>	The Uniform Resource Identifier that identifies where the scheme is located	0..1	N/A
<b>validFrom</b>	Validity starting date for this ID	0..1	<b>BR-COM-05:</b> If not specified, the “validFrom” date will default to “assigned by EURES on reception”. <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity ending date for this ID	0..1	<b>BR-COM-07:</b> If not specified, the “validTo” date will be decided by EURES depending on the transaction context. <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>PartyName sub-element</b>			
Attributes	Description	Card.	Rule
This sub-element has no attributes.			
<b>PersonContact sub-element</b>			
Attributes	Description	Card.	Rule
See section “4.6.2 Contact Attributes” for more information			
<b>CandidateSourceCode sub-element</b>			
Attributes	Description	Card.	Rule
<b>listName</b>	The code list name	1	N/A
<b>listVersionID</b>	The code list identification	1	N/A
<b>name</b>	The text equivalent of the code content component	0..1	N/A
<b>listURI</b>	The Uniform Resource Identifier that identifies where the code list is located	1	N/A
<b>listSchemeURI</b>	The Uniform Resource Identifier that identifies where the code list scheme is located	0..1	N/A
<b>PrecedenceCode sub-element</b>			
Attributes	Description	Card.	Rule
This sub-element has no attributes.			

#### 4.5.3 Supplier Examples

This example shows two document identifiers provided by a PES, named PES01 and EURES, and how are they ordered through the PrecedenceCode element. Firstly, PES01 sends the CV; because it is the 1st identifier, its PrecedenceCode is 1. The second identifier is provided by EURES, and its PrecedenceCode is 2.

```
<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd">

    <!-- 1st identifier of the document, send by PES01 1st January 2014 -->
    <DocumentID
        schemeID="ID-1234"
        schemeName="DocumentIdentifier"
```

```

    schemeAgencyID="PES01"
    schemeAgencyName="PublicEmploymentServices01"
    schemeVersionID="1.2"
    schemeDataURI="http://ec.europa.eu/eures/standards/2014/DOC/Data/ID"

```

## 4.6 /Supplier/Contact (level 2)

### 4.6.1 Contact Element Description

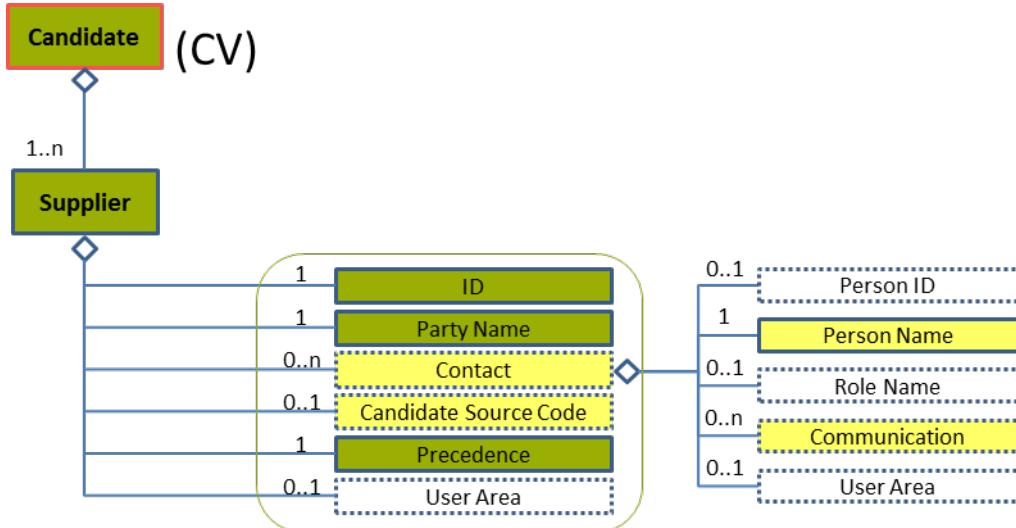

Figure 18: Contact Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Contact	A detailed set of data about one or more people who should be contacted in order to communicate with the supplier of the candidate	EURES Optional / 0..n	N/A	N/A
<b>Sub-elements</b>				
Person Name	Name of the contact of the supplier	EURES Optional / 1	N/A	N/A
See section "4.6.3 Sub-element: /Name (level 3)" for more information				
Communication	A detailed set of data about communication data of the supplier contact person	EURES Optional / 0..n	N/A	N/A
See section "4.6.4 Sub-element: /Communication (level 3)" for more information				

### 4.6.2 Contact Attributes

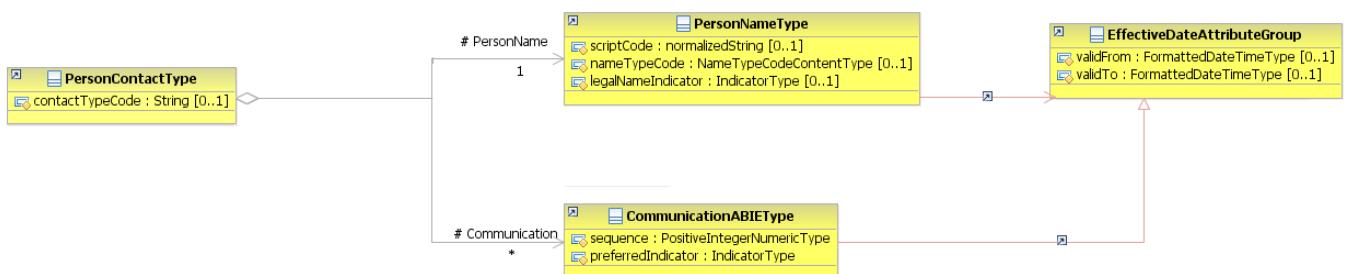

Figure 19: Contact Attribute Schema

Attributes	Description	Card.	Rule
contactTypeCode	The person's type of contact, such as "CompanyManager" or "WorkplaceContact". This is a free text element.	0..1	N/A
<b>PersonName sub-element</b>			
Attributes	Description	Card.	Rule
See section "4.6.3.2 Name Attributes" for more information			
<b>Communication sub-element</b>			
Attributes	Description	Card.	Rule
See section "4.6.4.2 Communication Attributes" for more information			

### 4.6.3 Sub-element: /Name (level 3)

#### 4.6.3.1 Name Element Description

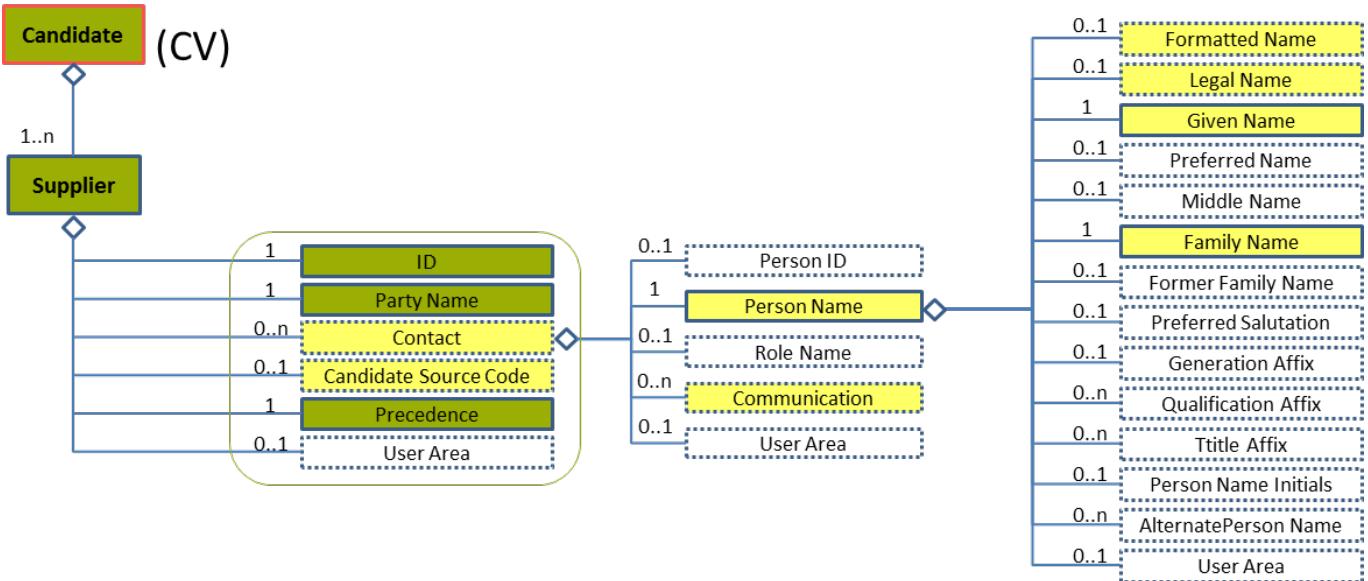

Figure 20: Name Level 3 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Example
<b>Name</b>	Name of the contact of the supplier	EURES Optional / 1	N/A	N/A
<b>Sub-elements</b>				
<b>Formatted Name</b>	This is a formatted presentation of a name (for example, a Person Name) that might alternatively be presented as discretely fielded components, or it could be a name with alternative formatted representations. The formatCode is an optional available attribute for specifying the applicable "mask" or type of format presentation to which the content conforms.	EURES Optional / 0..1	N/A	"Paula Cook", "James Black", etc.
<b>Legal Name</b>	The name that an individual is given at birth and/or is recognised by a government or other legal entity, or that appears on a birth certificate	EURES Optional / 0..1	N/A	"Paula Cook", "James Black", etc.
<b>Given Name</b>	A people given name or first name.	EURES Optional / 1	N/A	"Mark", "Silvia", etc.
<b>Family Name</b>	Contains a non-given name. This is an inherited name or one representing a family relationship, or in some cultural contexts a "Place Name" (where someone is from). In some cultural contexts, a single family name is typical, while in others there may be multiple family names. A "primary" attribute may be used in the case where there are multiple last names. A family name can have a "prefix," such as Von, De, Van, Al, etc. These can be represented using the FamilyName "prefix" attribute. Not all implementers may find it necessary to separate prefixes from the family name itself. Capturing the prefix and FamilyName as discrete fields can become important when formatting, or appearance may vary based on context. For example, in some cultural contexts it may be common to use a blank space as the delimiter between the prefix and the family name, while in others, a hyphen might be used. Separating the prefix from	EURES Optional / 1	N/A	"Smith", "Santos Tavares", "Van der Meyde", etc.

	the FamilyName allows such formatting requirements to be handled flexibly.			
--	--	--	--	--

#### 4.6.3.2 Name Attributes

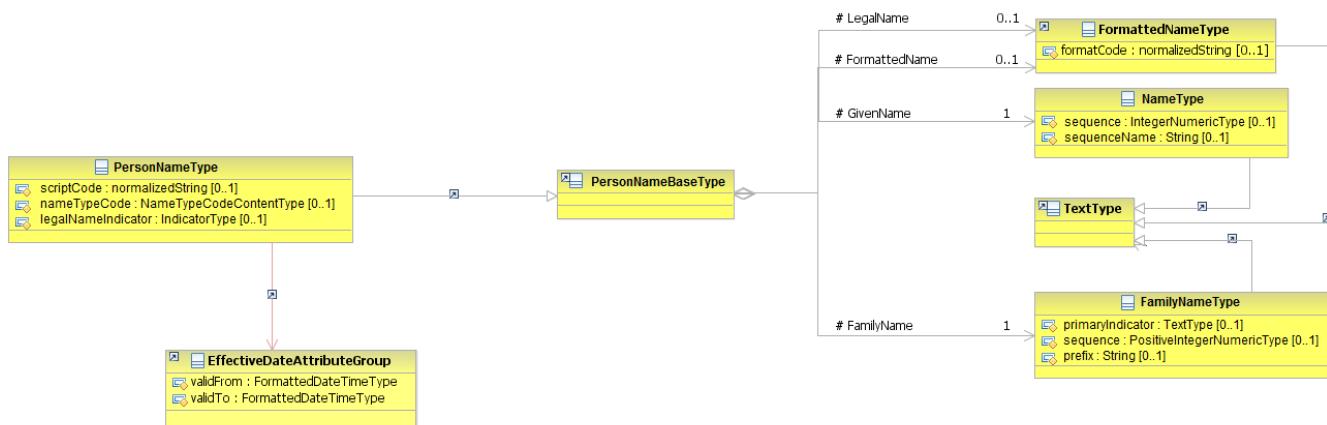

Figure 21: PersonName Attributes Schema

Attributes	Description	Card.	Rule
<b>scriptCode</b>	Type of alphabet that the name is written with such as "Roman", "Kenji", etc.	0..1	N/A
<b>nameTypeCode</b>	A code classifying the type of name, such as "CurrentName" or "FormerName" (full code list "4.28.19 Name Enum-Type Codes [CL32]" )  This is an HR-Open Standards open list.	0..1	<b>BR-COM-09:</b> The Open HR-Open Standards Code List "NameTypeCodeEnumType" must be used to codify the /PersonName /NameTypeCode.
<b>legalNameIndicator</b>	Boolean indicating if it is the legal name or not	0..1	N/A
<b>validFrom</b>	Validity start date for this Person Name	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this Person Name	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>LegalName sub-element</b>			
Attributes	Description	Card.	Rule
<b>formatCode</b>	Type of format shown	0..1	N/A
<b>FormattedName sub-element</b>			
Attributes	Description	Card.	Rule
The same as the "LegalName" sub-element			
<b>GivenName sub-element</b>			
Attributes	Description	Card.	Rule
<b>sequence</b>	Establishes the name order as an integer	0..1	N/A
<b>sequenceName</b>	Establishes the name order as a string	0..1	N/A
<b>FamilyName sub-element</b>			
Attributes	Description	Card.	Rule
<b>primaryIndicator</b>	Boolean indicating that it is a single name	0..1	N/A
<b>sequence</b>	Establishes the name order as an integer	0..1	N/A
<b>prefix</b>	A family name's prefix	0..1	N/A

#### 4.6.4 Sub-element: /Communication (level 3)

##### 4.6.4.1 Communication Element Description

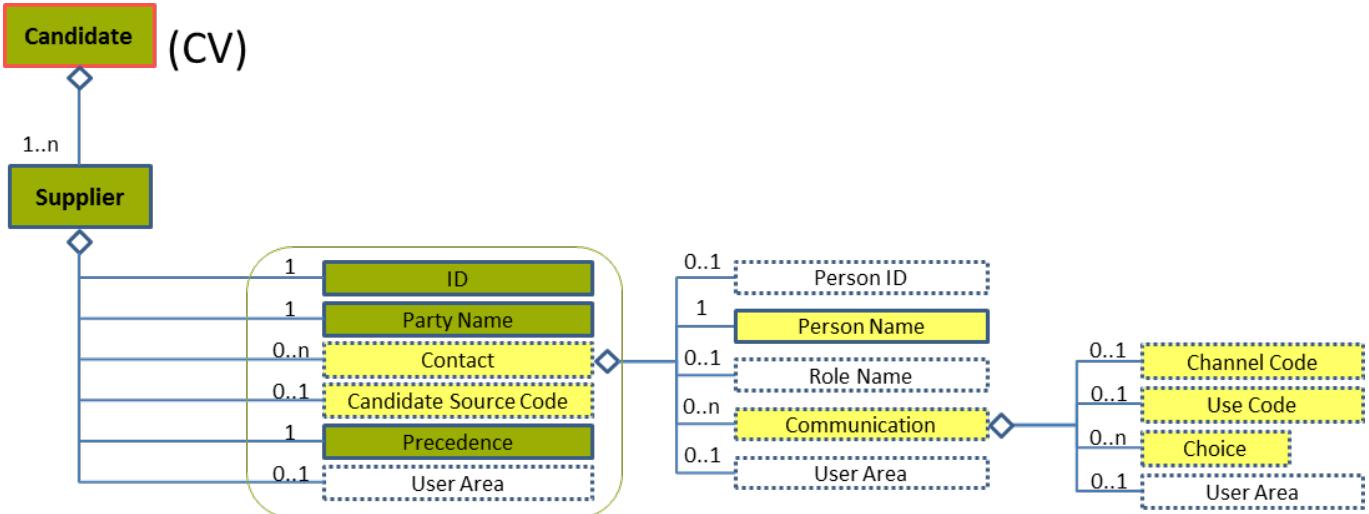

Figure 22: Communication Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Communication</b>	A person's contact information: ChannelCode, Address, URI –for email, for instance—, etc.	EURES Optional / 0..n	<b>BR-COM-10:</b> If the Communication element is filled in, at least one of its sub elements should be filled in too.	N/A
<b>Sub-elements</b>				
<b>Channel Code</b>	The communication channel used to contact a person or an organisation  This is an HR-Open Standards open list.	EURES Optional / 0..1	<b>BR-COM-13:</b> The Open HR-Open Standards Code List “ChannelCodeContentType” must be used to codify the /ChannelCode element.	“Telephone”, “MobileTelephone”, “Fax”, “Email”, “InstantMessage”, “Web”  Full code list: “4.28.2 Channel Type Codes [CL05]”
<b>Use Code</b>	The type of use given to the communication channel used to contact a person or an organisation  This is an HR-Open Standards open list.	EURES Optional / 0..1	<b>BR-COM-14:</b> The Open HR-Open Standards Code List “ContactUseCodeContentType” must be used to codify the /UseCode element.	“Personal”, “Business”  Full code list: “4.28.3 Contact Use Type Codes [CL06]”
<b>Choice</b>	Selection between the types of communication channels.  See section “4.6.5 Sub-element: /Choice (level 4)” for more information	N/A	N/A	N/A

#### 4.6.4.2 Communication Attributes

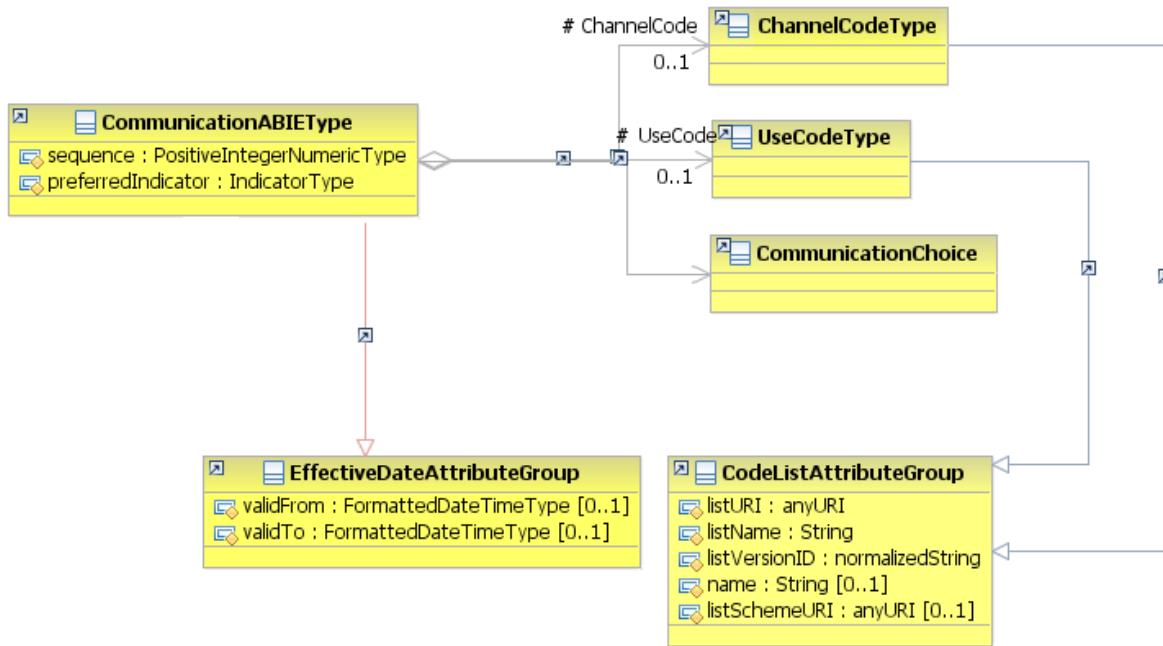

Figure 23: Communication Attributes Schema

Attributes	Description	Card.	Rule
<b>sequence</b>	Establishes the order of the contact data	0..1	N/A
<b>preferredIndicator</b>	Boolean indicating if the current contact data is the preferred one	0..1	N/A
<b>validFrom</b>	Validity start date for this Communication	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Date up to when the communication channel is available	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>ChannelCode sub-element</b>			
Attributes	Description	Card.	Rule
<b>listName</b>	The code list name	1	N/A
<b>listVersionID</b>	The code list identification	1	N/A
<b>name</b>	The text equivalent of the code content component	0..1	N/A
<b>listURI</b>	The Uniform Resource Identifier that identifies where the code list is located	1	N/A
<b>listSchemeURI</b>	The Uniform Resource Identifier that identifies where the code list scheme is located	0..1	N/A
<b>UseCode sub-element</b>			
Attributes	Description	Card.	Rule
The same as the "ChannelCode" sub-element			
<b>CommunicationChoice sub-element</b>			
Attributes	Description	Card.	Rule
See section "4.6.5.2 Choice Attributes" for more information			

## 4.6.5 Sub-element: /Choice (level 4)

### 4.6.5.1 Choice Element Description

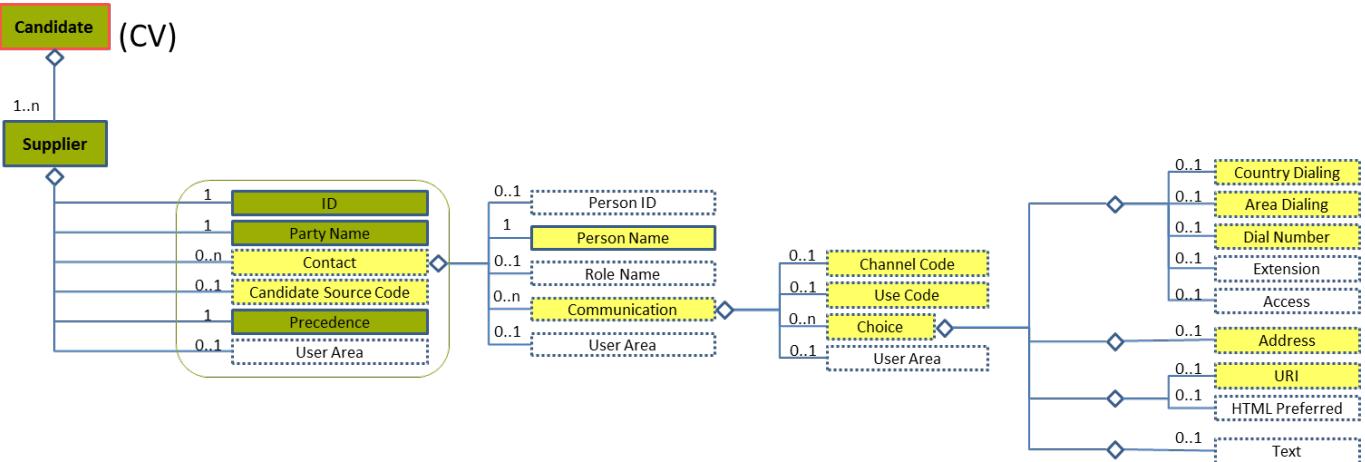

Figure 24: Choice Level 4 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Choice</b>	Selection between the types of channels 1-Address 2-Telephone 3-URL 4-Text	N/A	N/A	N/A
<b>Sub-elements</b>				
<b>Country Dialling</b>	The country dialling code for a contact number	EURES Optional / 0..1	N/A	"0032", "0034", etc.
<b>Area Dialling</b>	The area dialling code for a contact number	EURES Optional / 0..1	N/A	"2", "71, "93", etc.
<b>Dial Number</b>	The contact number, not including country dialling or area dialling codes	EURES Optional / 0..1	N/A	"3445654", "1234567", etc.
<b>Address</b>	Properties specifying an entity's physical location	EURES Optional / 0..1	N/A	N/A
See section "4.9.4.1 Address Element Description" for more information				
<b>URI</b>	Uniform Resource Identifier Reference (URI). A URI value can be absolute or relative, and may have an optional fragment identifier (i.e., it may be a URI Reference). This type should be used to specify that the value is to fulfil the role of a URI, as defined by [RFC 2396] and as amended by [RFC 2732].	EURES Optional / 0..1	N/A	"mymail@test.org", "mymail@noreply.com", etc.

## 4.7 /Person (level 1)

### 4.7.1 Person Element Description

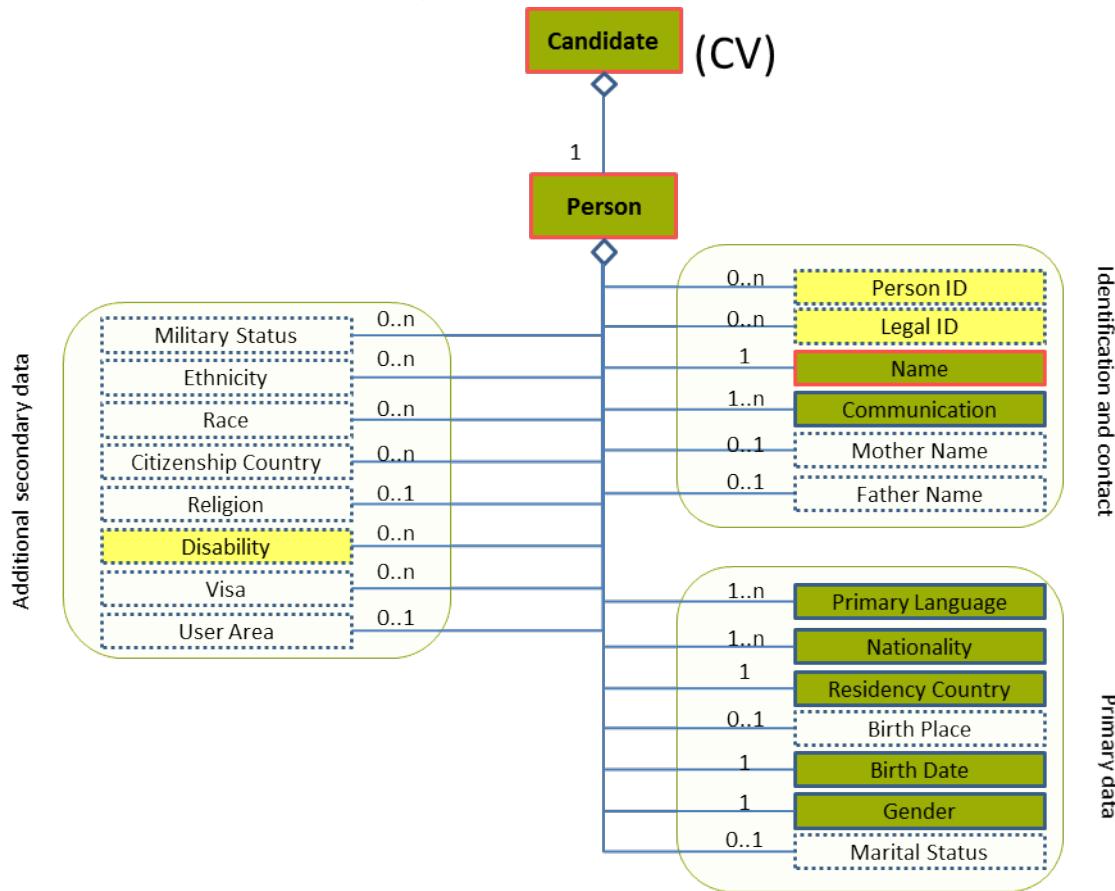

Figure 26: Person Level 1 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Person</b>	Personal details of the person seeking a job, such as the name, age, gender, and so on.	EURES Technical Minimum / 1	N/A	N/A
<b>Sub-elements</b>				
<b>Person ID</b>	Systemic identifiers only for this person “Usually fed by the document sender, the recipient also may (and usually does) add his/her own ID, in order to build complex transaction paths”.	EURES Optional / 0..n	<b>BR-CV-09:</b> If the identifier is not provided an automatic ID will be provided by the Interoperability Platform.	“PER-21987”, “PER-18911”, etc.
<b>Legal ID</b>	An identifier issued to a person by a governmental organisation, like a social security or driver’s license number.	EURES Optional / 0..n	N/A	“1111111A”, “12345678Z”, etc.
<b>Name</b>	A detailed set of data about the candidate’s names, such as his/her GivenName, FamilyName, MiddleName, Former Family Name, etc.	EURES Technical Minimum / 1	N/A	N/A
See section “4.8 /Person/Name (level 2)” for more information				
<b>Communication</b>	The candidate’s contact information. ChannelCode, Address, URI –for email, for instance—, etc.	EURES Conformant / 1..n	<b>BR-COM-10:</b> If the Communication element is filled in, at least one of its sub elements should be filled in too.	N/A

	See section “4.9 /Person/Communication (level 2)” for more information			
<b>Primary Language</b>	The candidate’s primary or preferred language or languages	EURES Conformant / 1..n	<b>BR-COM-11:</b> Compulsory use of the “LanguageCodes-CodeList.gc” list defined by EURES. This is based on ISO-639-1:2002 Alpha-2, which includes all world languages.  <b>BR-COM-43:</b> Multiple entries of this code list are allowed.	“AA” = Afar, “AB” = Abkhazian, etc.  Full code list: “4.28.15 Language Codes [CL24]”
<b>Nationality</b>	Code specifying the candidate’s nationality	EURES Conformant / 1..n	<b>BR-COM-12:</b> Compulsory use of the “Countries-CodeList.gc” list defined by EURES. This is based on ISO 3166-1 Alpha-2, which includes all countries of the world.  <b>BR-COM-43:</b> Multiple entries of this code list are allowed.	“AR” – Argentina, “AU” – Austria, “CS” – Costa Rica, etc.  Full code list: “4.28.4 Country Codes [CL07]”
<b>Residency Country</b>	Code specifying the country where the Candidate usually lives	EURES Conformant / 1	<b>BR-COM-12:</b> Compulsory use of the “Countries-CodeList.gc” list defined by EURES. This is based on ISO 3166-1 Alpha-2, which includes all countries of the world.	“AR” – Argentina, “AU” – Austria, “CS” – Costa Rica, etc.  Full code list: “4.28.4 Country Codes [CL07]”
<b>Birth Date</b>	The person’s date of birth	EURES Conformant / 1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.	1987-08-05
<b>Gender</b>	Code indicating the candidate’s gender  This is an HR-Open Standards open list	EURES Conformant / 1	<b>BR-CV-10:</b> Compulsory use of HR-Open Standards “GenderEnumType” to specify a Person’s Gender.	“NotKnown”, “Male”, “Female”, “NotSpecified”  Full code list: “4.28.13 Gender Enum-Type Codes [CL18]”
<b>Disability</b>	Describes a disability associated with a specific person.  The absence of a Disability element for a candidate will mean “No disabilities”.	EURES Optional / 0..n	N/A	N/A

## 4.8 /Person/Name (level 2)

### 4.8.1 Name Element Description

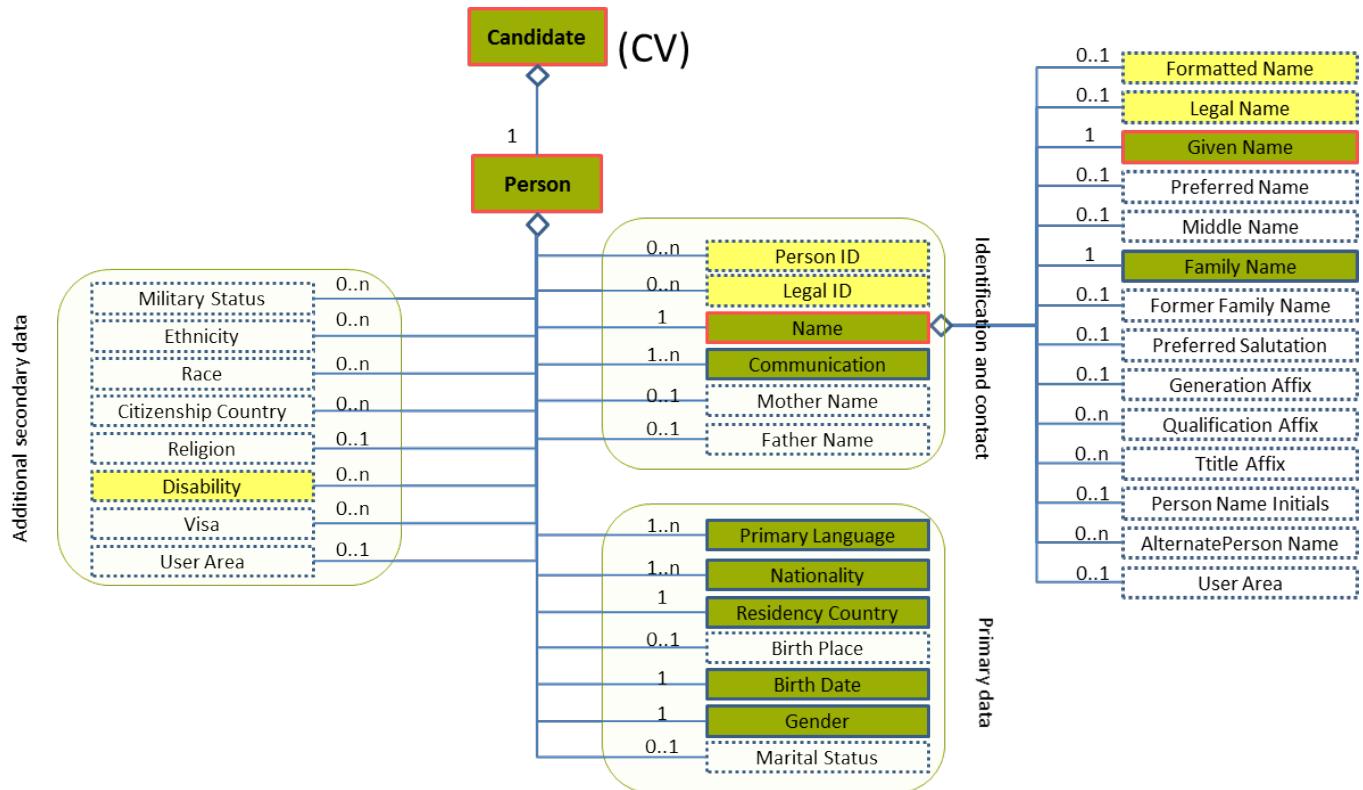

Figure 28: Name Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Example
<b>Name</b>	A detailed set of data about the names of the person's names, such as his/her GivenName, FamilyName, MiddleName, FormerFamilyName, etc.	EURES Technical Minimum / 1	N/A	N/A
<b>Sub-elements</b>				
<b>Formatted Name</b>	This is a formatted presentation of a name (for example, a Person Name) that might alternatively be presented as discretely fielded components, or it could be a name with alternative formatted representations. The formatCode is an optional available attribute for specifying the applicable "mask" or type of format presentation to which the content conforms.	EURES Optional / 0..1	N/A	"Paula Cook", "James Black", etc.
<b>Legal Name</b>	The name that an individual is given at birth and/or is recognised by a government or other legal entity, or that appears on a birth certificate	EURES Optional / 0..1	N/A	"Paula Cook", "James Black", etc.
<b>Given Name</b>	A people given name or first name.	EURES Technical Minimum / 1	N/A	"Mark", "Silvia", etc.
<b>Family Name</b>	Contains a non-given name. This is an inherited name or one representing a family relationship, or in some cultural contexts a "Place Name" (where someone is from). In some cultural contexts, a single family name is typical, while in others there may be multiple family names. A "primary" attribute may be used in the case where there are multiple last names. A family name can have a "prefix," such as Von, De, Van, Al, etc. These can be represented using the	EURES Conformant / 1	N/A	"Smith", "Santos Tavares", "Van der Meyde", etc.

	FamilyName "prefix" attribute. Not all implementers may find it necessary to separate prefixes from the family name itself. Capturing the prefix and FamilyName as discrete fields can become important when formatting, or appearance may vary based on context. For example, in some cultural contexts it may be common to use a blank space as the delimiter between the prefix and the family name, while in others, a hyphen might be used. Separating the prefix from the FamilyName allows such formatting requirements to be handled flexibly.			
--	--	--	--	--

#### 4.8.2 Name Attributes

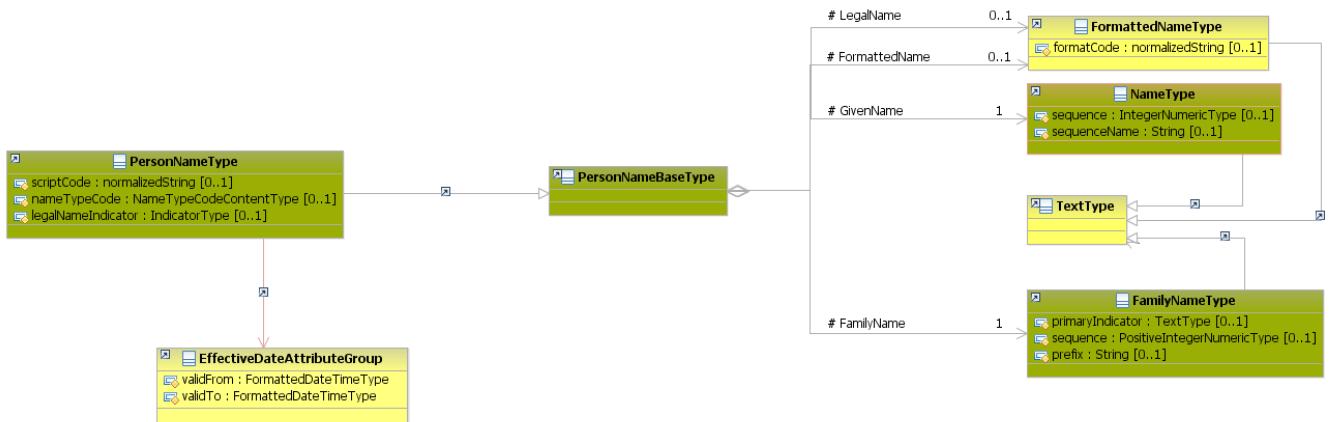

Figure 29: PersonName Attributes Schema

Attributes	Description	Card.	Rule
<b>scriptCode</b>	Type of alphabet that the name is written with such as "Roman", "Kenji", etc.	0..1	N/A
<b>nameTypeCode</b>	A code classifying the type of name, such as "CurrentName" or "FormerName" (full code list "4.28.19 Name Enum-Type Codes [CL32]" )  This is an HR-Open Standards open list.	0..1	<b>BR-COM-09:</b> The Open HR-Open Standards Code List "NameTypeCodeEnumType" must be used to codify the /PersonName /NameTypeCode.
<b>legalNameIndicator</b>	Boolean indicating if it is the legal name or not	0..1	N/A
<b>validFrom</b>	Validity start date for this Person Name	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this Person Name	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.

#### 4.8.3 Name Examples

This example shows how to fill in the candidate's legal and current name within the Name element.

```

<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" >
  <CandidatePerson>
    <PersonName legalNameIndicator="true" nameTypeCode="CurrentName">
      <!-- EURES Optional layer -->
      <FormattedName formatCode="Family Name, Given Name">
        Van Whye, John
      </FormattedName>
      <LegalName formatCode="Given Name Family Name">Johann Van
      Whye</LegalName>

      <!-- EURES Conformant layer required and optional -->
      <oa:GivenName>John</oa:GivenName>
      <FamilyName prefix="Van">Whye</FamilyName>
    </PersonName>
  </CandidatePerson>
</Candidate/>

```

## 4.9 /Person/Communication (level 2)

### 4.9.1 Communication Element Description

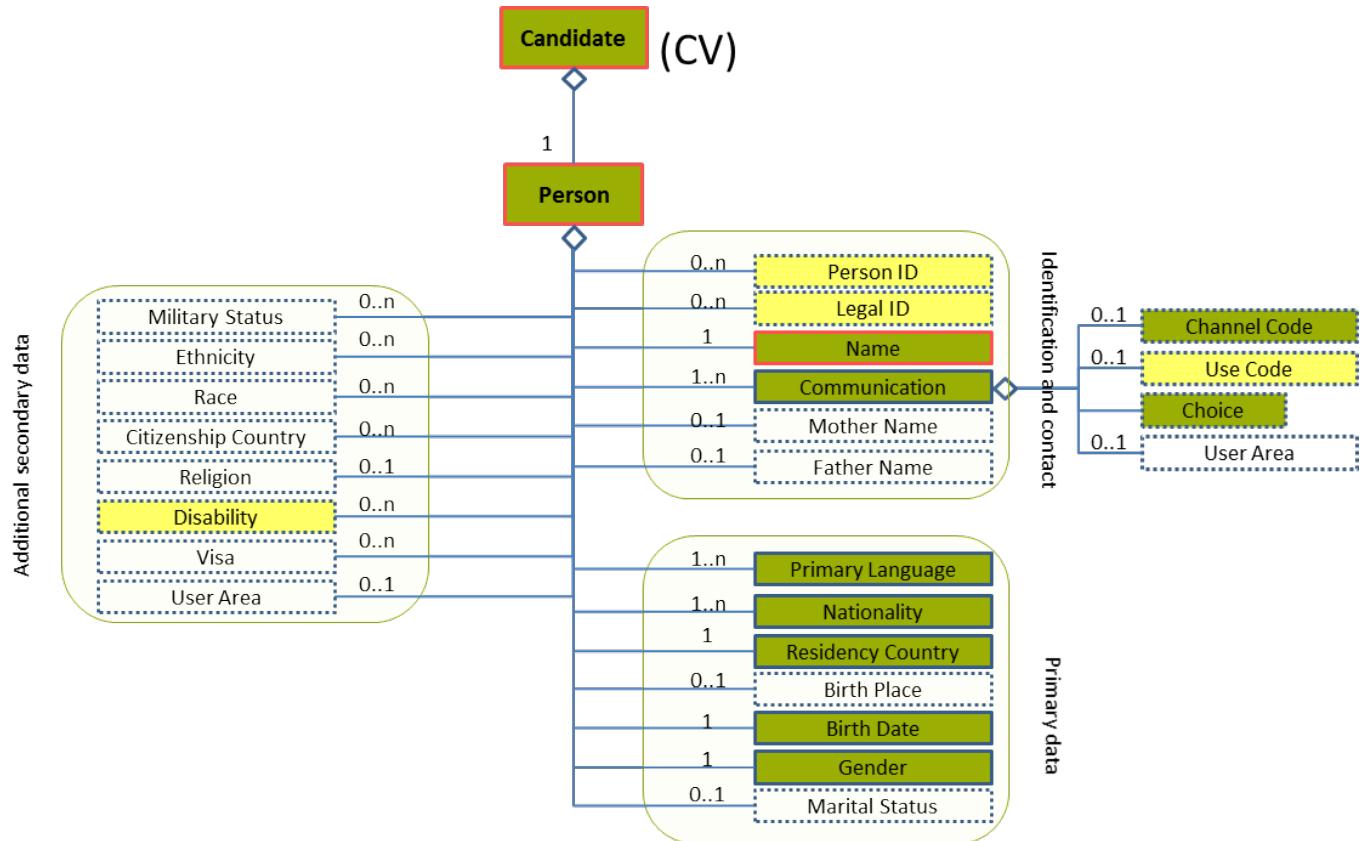

Figure 30: Communication Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Communication</b>	A person's contact information: ChannelCode, Address, URI –for email, for instance—, etc.	EURES Conformant / 1..n	<b>BR-COM-10:</b> If the Communication element is filled in, at least one of its sub elements should be filled in too.	N/A

Element	Description	Layer / Cardinality	Rule	Examples
Sub-elements				
Channel Code	The communication channel used to contact a person or an organisation  This is an HR-Open Standards open list.	EURES Conformant Optional / 0..1	BR-COM-13: The Open HR-Open Standards Code List “ChannelCodeContentType” must be used to codify the /ChannelCode element.	“Telephone”, “MobileTelephone”, “Fax”, “Email”, “InstantMessage”, “Web”  Full code list: “4.28.2 Channel Type Codes [CL05]”
Use Code	The type of use given to the communication channel used to contact a person or an organisation  This is an HR-Open Standards open list.	EURES Optional / 0..1	BR-COM-14: The Open HR-Open Standards Code List “ContactUseCodeContentType” must be used to codify the /UseCode element.	“Personal”, “Business”  Full code list: “4.28.3 Contact Use Type Codes [CL06]”
Choice	Selection between the types of communication channels.  See section “4.9.3 Sub-element: /Choice (level 3)” for more information	N/A	N/A	N/A

#### 4.9.2 Communication Attributes

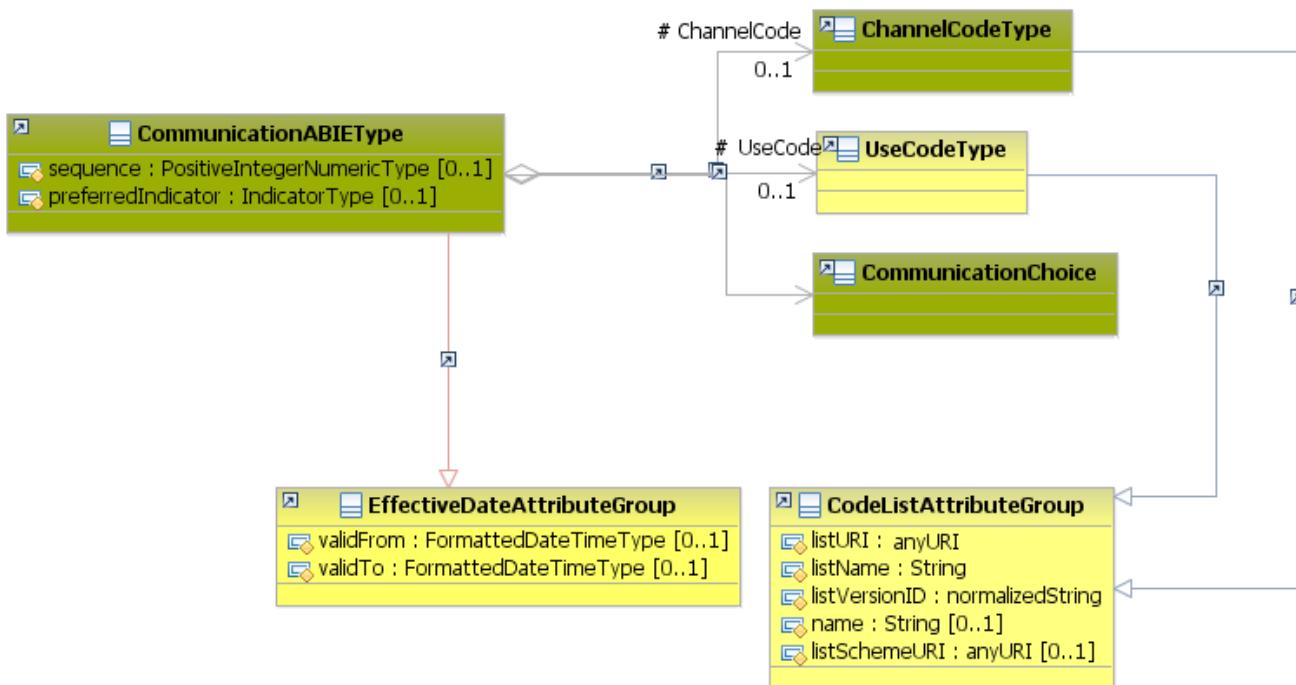

Figure 31: Communication Attributes Schema

Attributes	Description	Card.	Rule
<b>sequence</b>	Establishes the order of the contact data	0..1	N/A
<b>preferredIndicator</b>	Boolean indicating if the current contact data is the preferred one	0..1	N/A
<b>validFrom</b>	Validity start date for this Communication	0..1	BR-COM-06: Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Date up to when the communication channel is available	0..1	BR-COM-06: Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
ChannelCode sub-element			
Attributes	Description	Card.	Rule
<b>listName</b>	The code list name	1	N/A
<b>listVersionID</b>	The code list identification	1	N/A
<b>name</b>	The text equivalent of the code content	0..1	N/A

Attributes	Description	Card.	Rule
	component		
listURI	The Uniform Resource Identifier that identifies where the code list is located	1	N/A
listSchemeURI	The Uniform Resource Identifier that identifies where the code list scheme is located	0..1	N/A

#### 4.9.5.3 Choice Examples

This is an example of how to fill in a post office address in a line:

##### Address example:

Les Marchands de Bruxelles SA

Boîte postale 10 Bruxelles 1

1000 BRUSSELS

BELGIUM

```

<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd">
    <CandidatePerson>
        <Communication>
            <Address currentAddressIndicator="true" type="Residence">
                <oa:CityName>Brussels</oa:CityName>

                <oa:CountrySubDivisionCode
                    listName="EURES_CountrySubdivisionCodes" listVersionID="2013-
                    Level-3" name="Arr. de Bruxelles-Capitale"
                    listURI="http://ec.europa.eu/eurostat"
                    >BE100</oa:CountrySubDivisionCode>

                <CountryCode listName="Countries" listVersionID="3166-1-alpha-
                    2" name="Belgium"
                    listURI="http://ec.europa.eu/esco/ConceptScheme/country"
                    >BE</CountryCode>
                <oa:AddressLine>Les Marchands de Bruxelles SA, Boîte postale
                    10 Bruxelles 1, 1000 Brussels (Belgium)</oa:AddressLine>
            </Address>
        </Communication>
    </CandidatePerson>
</Candidate>

```

This is an example of how to fill in a standard address in specific fields:

**Address example:**

LOCAL 480, 4ème étage

ZONING INDUSTRIEL

Rue Louis Hap 25

1040 Etterbeek

Belgium

```
<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3

<b>listSchemeURI</b>	The Uniform Resource Identifier that identifies where the code list scheme is located	0..1	N/A

## 4.11 /Profile (level 1)

### 4.11.1 Profile Element Description

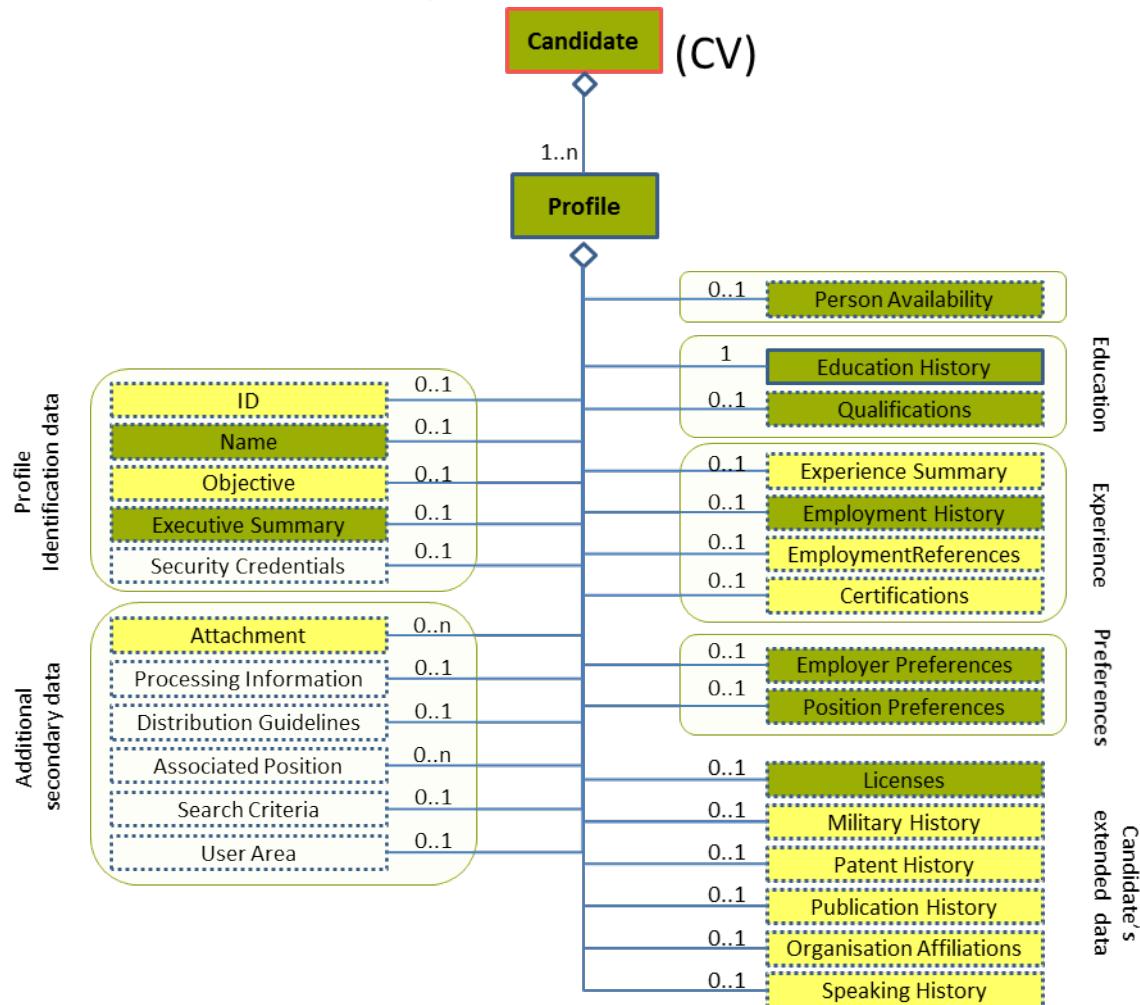

Figure 42: Profile Level 1 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Example
Profile	The candidate's structured set of characteristics, such as his/her Qualifications, Work Experience, and so on.  More than one profile is allowed in order to provide the information in different languages. Thus the need for cardinality 1..n.  It is the responsibility of the person who builds up the CV to make sure that a profile is expressed in the same language and those different profile language versions contain exactly the same information.	EURES Conformant / 1..n	<b>BR-COM-01:</b> If not otherwise specified, "EN" (English) is used as the default language.  <b>BR-COM-02:</b> Multiple profiles are allowed, but it must be expressed in different languages.	N/A
<b>Sub-elements</b>				
ID	Unique systemic identifiers for this Profile	EURES Optional / 0..1	<b>BR-CV-09:</b> If the identifier is not provided an automatic ID will be provided by the Interoperability Platform.	"PR-009", "ID-111", etc.
Name	A descriptive name for this Profile	EURES Conformant Optional / 0..1	N/A	"Profile 1. English", etc.
Person Availability	A detailed set of data about the person's availability	EURES Conformant	N/A	N/A

			Optional / 0.1		
See section “4.12 /Profile/Person Availability (level 2)” for more information					
<b>Objective</b>	Narrative description of the candidate’s overall intentions		EURES Optional / 0.1	N/A	“Job search”, etc.
<b>Executive Summary</b>	Narrative summary on the person and his/her competencies normally used as the CV presentation		EURES Conformant Optional / 0.1	N/A	“Presentation example”, etc.
<b>Employer Preferences</b>	Information about a candidate’s employer preferences		EURES Conformant Optional / 0.1	N/A	N/A
See section “4.19 /Profile/Employer Preferences (level 2)” for more information					
<b>Position Preferences</b>	Information about a candidate’s preferences in a position		EURES Conformant Optional / 0.1	N/A	N/A
See section “4.20 /Profile/Position Preferences (level 2)” for more information					
<b>Experience Summary</b>	Categorisation of the candidate’s Experience		EURES Optional / 0.1	N/A	N/A
See section “4.15 /Profile/Experience Summary (level 2)” for more information					
<b>Employment History</b>	Prior and current details of a person’s employment, work, or relevant experience that can be reported on a professional profile, CV, resume, employment application, or similar document		EURES Conformant Optional / 0.1	N/A	N/A
See section “4.16 /Profile/Employment History (level 2)” for more information					
<b>Education History</b>	Information documenting a person’s education, including data relevant to verifying such education, continuous education, schooling or training in preparation for work life; by extension or training obtained as an adult.		EURES Conformant / 1	N/A	N/A
See section “4.13 /Profile/Education History (level 2)” for more information					
<b>Licenses</b>	Contains details regarding one or more licenses (such as a driver’s licence)		EURES Conformant Optional / 0.1	N/A	N/A
See section “4.21 /Profile/Licenses (level 2)” for more information					
<b>Certifications</b>	Information about one or more certifications. Certifications are formal statements by an issuing authority that the certification holder has met educational or testing requirements associated with it.		EURES Optional / 0.1	N/A	N/A
See section “4.18 /Profile/Certifications (level 2)” for more information					
<b>Military History</b>	Information about the person’s military status		EURES Optional / 0.1	N/A	N/A
See section “4.22 /Profile/Military History (level 2)” for more information					
<b>Patent History</b>	Information about the Patents owned by the person		EURES	N/A	N/A

		Optional / 0..1		
See section "4.23 /Profile/Patent History (level 2)" for more information				
<b>Publication History</b>	Information about one or more publications text by the person	EURES Optional / 0..1	N/A	N/A
See section "4.24 /Profile/Publication History (level 2)" for more information				
<b>Speaking History</b>	Information about one or more events in which the person has spoken (as keynote speaker, for example)	EURES Optional / 0..1	N/A	N/A
See section "4.26 /Profile/Speaking History (level 2)" for more information				
<b>Qualifications</b>	Information related to matching capacities, knowledge, skills, abilities, awards and other resource deployment-related characteristics (including "competencies") offered by a candidate	EURES Conformant Optional / 0..1	N/A	N/A
See section "4.14 /Profile/Qualifications (level 2)" for more information				
<b>Organization Affiliations</b>	Details on one or more organisational affiliations, for example, membership in a trade or civic organisation, seat on a board of directors, membership in a union, etc.	EURES Optional / 0..1	N/A	N/A
See section "4.25 /Profile/Organization Affiliations (level 2)" for more information				
<b>Employment References</b>	Contains information on one or more people who may be a source of information about a person's skills, prior employment, character, or suitability for employment	EURES Optional / 0..1	N/A	N/A
See section "4.17 /Profile/Employment References (level 2)" for more information				
<b>Attachment</b>	Allows for embedding or referencing external documents or digital objects	EURES Optional / 0..n	N/A	N/A
See section "4.27 /Profile/Attachment (level 2)" for more information				

#### 4.11.2 Profile Attributes

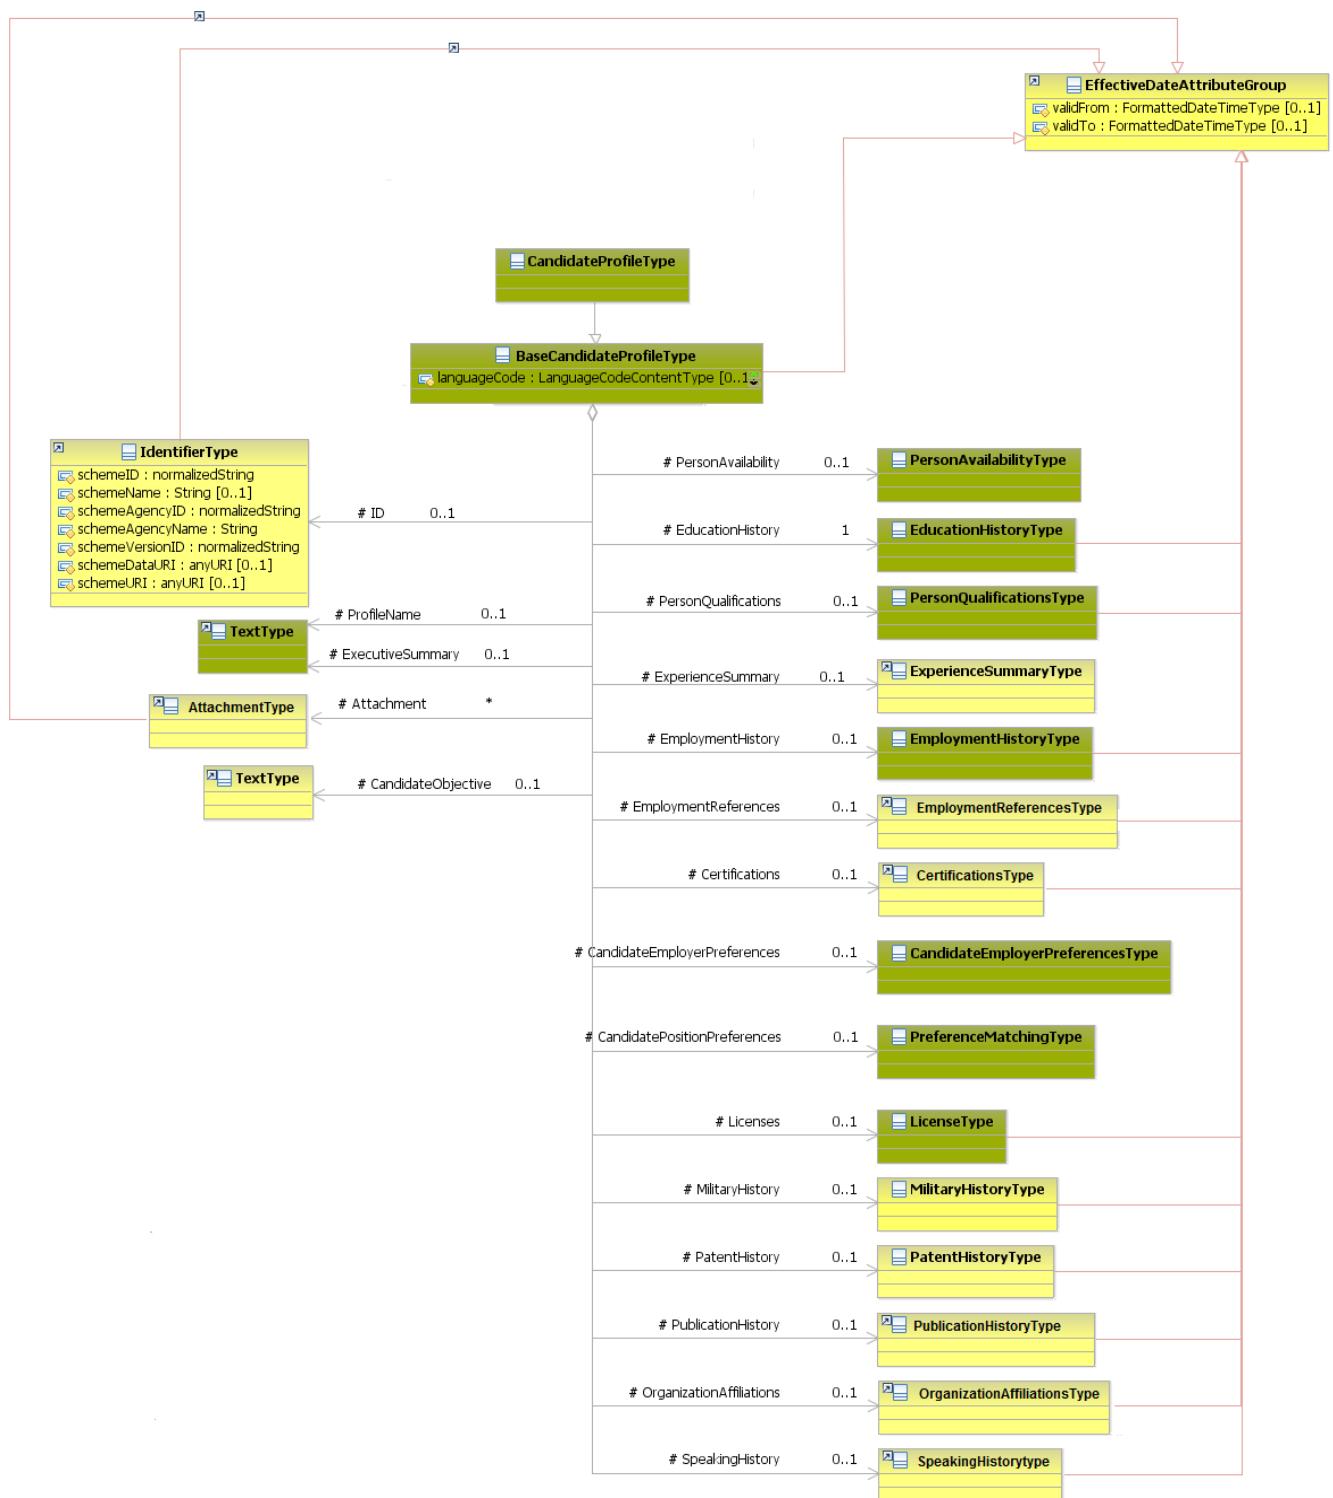

Figure 43: Profile Attributes Schema

Attributes	Description	Card.	Rule
<code>languageCode</code>	Language used throughout the whole document. Only official European Country languages are allowed.	0..1	<b>BR-COM-01:</b> If not otherwise specified, "EN" (English) is used as the default language.  <b>BR-COM-04:</b> Compulsory use of the "EURES_EULanguageCodes-CodeList.gc" list defined by EURES. Adapted EU countries only are used, based on ISO 639-1:2002 Alpha-2. If there is a code specified

			which is not a valid one, this language version of the CV is rejected.
<b>validFrom</b>	Validity start date for this entity's information	0..1	<b>BR-COM-05:</b> If not specified, the "validFrom" date will default to "assigned by EURES on reception".  <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this entity's information	0..1	<b>BR-COM-07:</b> If not specified, the "validTo" date will be decided by EURES depending on the transaction context.  <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.

#### 4.11.3 Profile Examples

The example below shows a CV XML with profiles in different languages, through the `LanguageCode` attribute.

```

<Candidate xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" xmlns="http://www.hr-xml.org/3"
xmlns:oa="http://www.openapplications.org/oagis/9"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" majorVersionID="3"
minorVersionID="2">
    <CandidateProfile languageCode="en">
        ...
        <CandidateObjective>Software engineer / Programmer</CandidateObjective>
        ...
    </CandidateProfile>

    <CandidateProfile languageCode="fr">
        ...
        <CandidateObjective>Ingénieur logiciel / Programmeur</CandidateObjective>
        ...
    </CandidateProfile>
</Candidate>
```

## 4.12 /Profile/Person Availability (level 2)

### 4.12.1 Person Availability Element Description

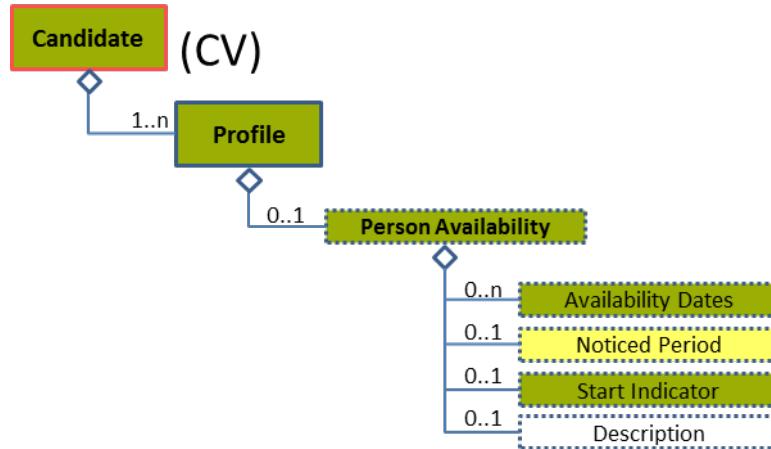

Figure 44: Person Availability Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Person Availability	Detailed set of data about the person's availability	EURES Conformant Optional / 0..1	N/A	N/A
<b>Sub-elements</b>				
Availability Dates	Start and end dates of availability	EURES Conformant Optional / 0..n	N/A	N/A
See section “4.12.4 Sub-element: /Availability Dates (level 3)” for more information				
Noticed Period	A period measured in number of days, weeks, or months in advance of which an employee must give notice of his or her intention to resign his or her employment	EURES Optional / 0..1	N/A	“5”, “2”, etc.
Start Indicator	An indicator as to whether the person is available to start immediately	EURES Conformant Optional / 0..1	N/A	“True” = This person is available to start immediately. “False” = This person is not available to start immediately.

### 4.12.2 Person Availability Attributes

Attributes	Description	Card.	Rule
This element has no attributes.			
<b>AvailabilityDates sub-element</b>			
Attributes	Description	Card.	Rule
See section "4.12.4.2 Availability Dates Attributes" for more information			
<b>NoticePeriodMeasure sub-element</b>			
Attributes	Description	Card.	Rule
<b>unitCode</b>	Code indicating the type of unit measure, such as "minutes" or "hours" (full code list "4.28.36 Unit Codes [CL54]" )	0..1	<b>BR-COM-36:</b> Compulsory use of the "EURES_UnitCodes-CodeList.gc" list defined by EURES. This is based on EU – Units of Measurement.
<b>type</b>	The description type	0..1	N/A
<b>InmediateStartIndicator sub-element</b>			
Attributes	Description	Card.	Rule
This sub-element has no attributes.			

### 4.12.3 Person Availability Examples

This example shows how to indicate that the candidate is available during certain dates, and that he/she needs to know it 2 weeks in advance.

```
<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" >
    <CandidateProfile languageCode="en">
        <PersonAvailability>
            <AvailabilityDates>
                <StartDateTime>2014-07-30</StartDateTime>
            </AvailabilityDates>
            <AvailabilityDates>
                <StartDateTime>2014-02-01</StartDateTime>
                <EndDateTime>2014-04-01</EndDateTime>
            </AvailabilityDates>

            <NoticePeriodMeasure unitCode="week">2</NoticePeriodMeasure>

            <InmediateStartIndicator>false</InmediateStartIndicator>
        </PersonAvailability>
    </CandidateProfile>
</Candidate>
```

### 4.12.4 Sub-element: /Availability Dates (level 3)

#### 4.12.4.1 Availability Dates Element Description

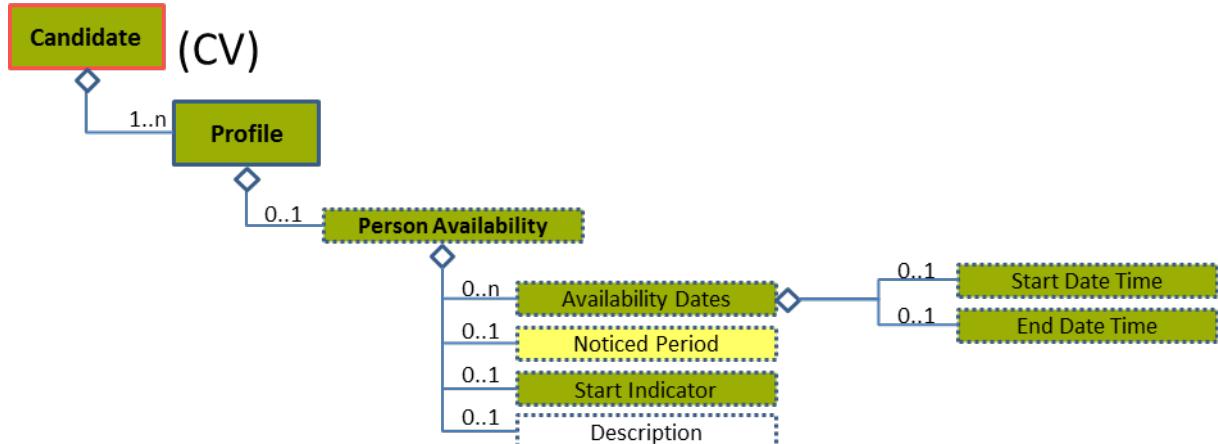

Figure 46: Availability Dates Level 3 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Availability Dates</b>	Start and end dates of availability	EURES Conformant Optional / 0..n	N/A	N/A
<b>Sub-elements</b>				
<b>Start Date Time</b>	The timestamp marking the beginning of a time period during which a related entity or status is effective or applicable	EURES Conformant Optional / 0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.	"2014-10-09"
<b>End Date Time</b>	The timestamp marking the end of a time period during which a related entity or status is effective or applicable	EURES Conformant Optional / 0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.	"2015-10-09"

### 4.14 /Profile/Qualifications (level 2)

#### 4.14.1 Qualifications Element Description

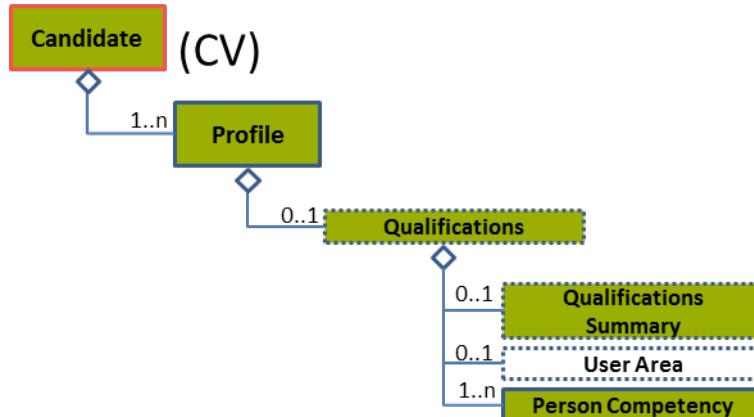

Figure 64: Qualifications Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Qualifications	Information related to matching capacities, knowledge, skills, abilities, awards and other resource deployment-related characteristics (including "competencies") offered by a candidate	EURES Conformant Optional / 0..1	N/A	N/A
<b>Sub-elements</b>				
Qualifications Summary	In the context of resumes, a "qualifications summary" is a paragraph or listing to "showcase" a candidate's most compelling skills and experience. In this context, the	EURES Conformant Optional	N/A	"Qualification summary", etc.

	"qualifications summary" may be persuasive or have self-marketing content versus a "formal recognition of achievement or competence". In other words, use of term "qualifications" sometimes encompasses both qualifications asserted or claimed as well as those that have been formally recognised by an "awarding organisation." It is used in the context of recruiting and staffing as a container of information related to matching knowledge, skills, abilities, and other resource deployment-related characteristics (including "competencies") offered by a candidate and/or requested by a potential employer or customer.	/ 0..1		
<b>Person Competency</b>	A specified person competency is a skill within the context of a personal record (profile, appraisal and assessment) that is assessed or asserted at a specified level of proficiency.	EURES Conformant / 1..n		N/A
See section "4.14.3 Sub-element: /Person Competency (level 3)" for more information				

#### 4.14.2 Qualifications Attributes

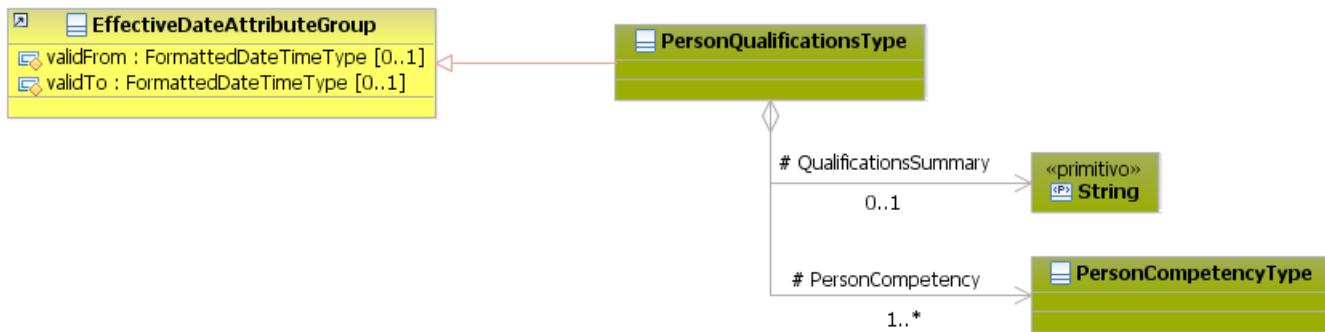

Figure 65: Qualifications Attributes Schema

Attributes	Description	Card.	Rule
<b>validFrom</b>	Validity start date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.

Attributes	Description	Card.	Rule
See section "4.14.3.2 Person Competency Attributes" for more information			

### 4.14.3 Sub-element: /Person Competency (level 3)

#### 4.14.3.1 Person Competency Element Description

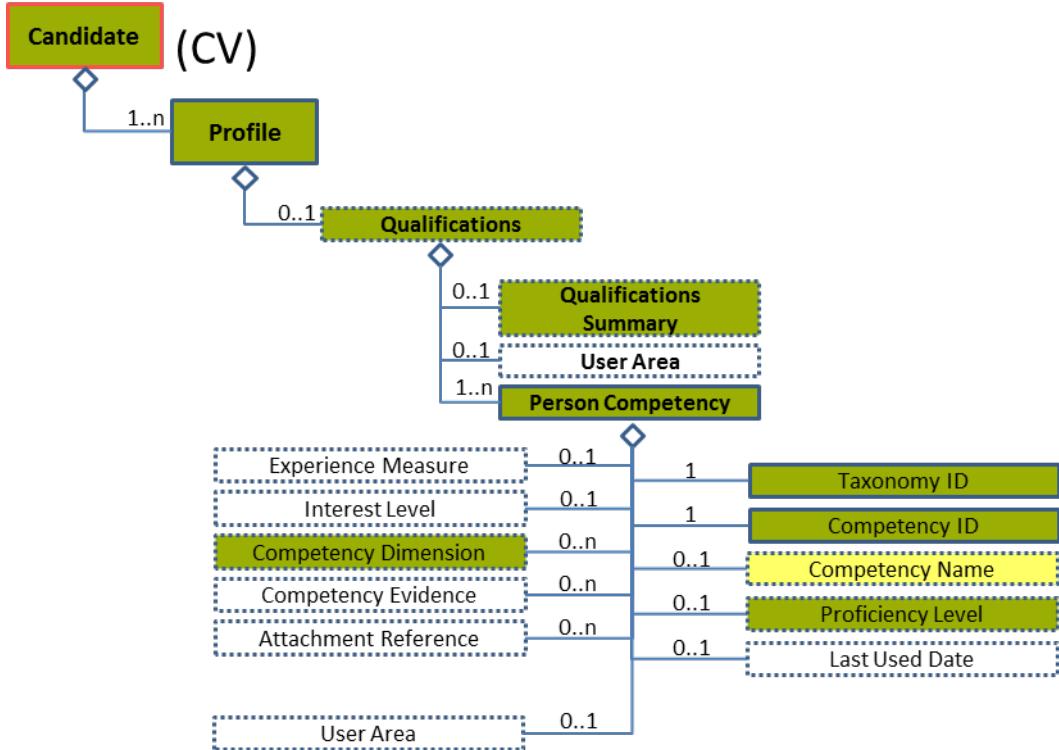

Figure 66: Person Competency Level 3 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Person Competency	A specified person competency is a skill within the context of a personal record (profile, appraisal and assessment) that is assessed or asserted at specified level of proficiency.	EURES Conformant / 1..n	N/A	N/A
<b>Sub-elements</b>				
Competency ID	Unique identifier for a skill or competency that depends on the taxonomy used. Taxonomy information is included in the ID attributes.	EURES Conformant / 1	BR-COM-46: Compulsory use of Language Code [CL24], based on ISO-639-1:2002 Alpha 2 (ISO), if TaxonomyID's value is "language".	"EN", "FR", etc.  Full code list: "4.28.15 Language Codes [CL24]"
Taxonomy ID	Unique identifier for the type of competency. The value is "language" if the competency is a language or "other", in the other competencies.	EURES Conformant / 1	N/A	"language", "other"
Competency Name	A legible, descriptive name for a given competency	EURES Optional / 0..1	N/A	"English-Language", "Social skills", etc.
Proficiency Level	The state or degree of mastery or adeptness obtained or achieved for a given competency. Proficiency levels are expressed as a score, a point scale, or a mark in a range of values.	EURES Conformant Optional / 0..1	N/A	N/A
See section "4.14.4 Sub-element: /Person Competency/Proficiency Level (level 4)" for more information				
Competency Dimension	A measurable characteristic of a competency	EURES Conformant Optional	N/A	N/A

See section “4.14.5 Sub-element: /Person Competency/Competency Dimension (level 4)” for more information

#### 4.14.3.2 Person Competency Attributes

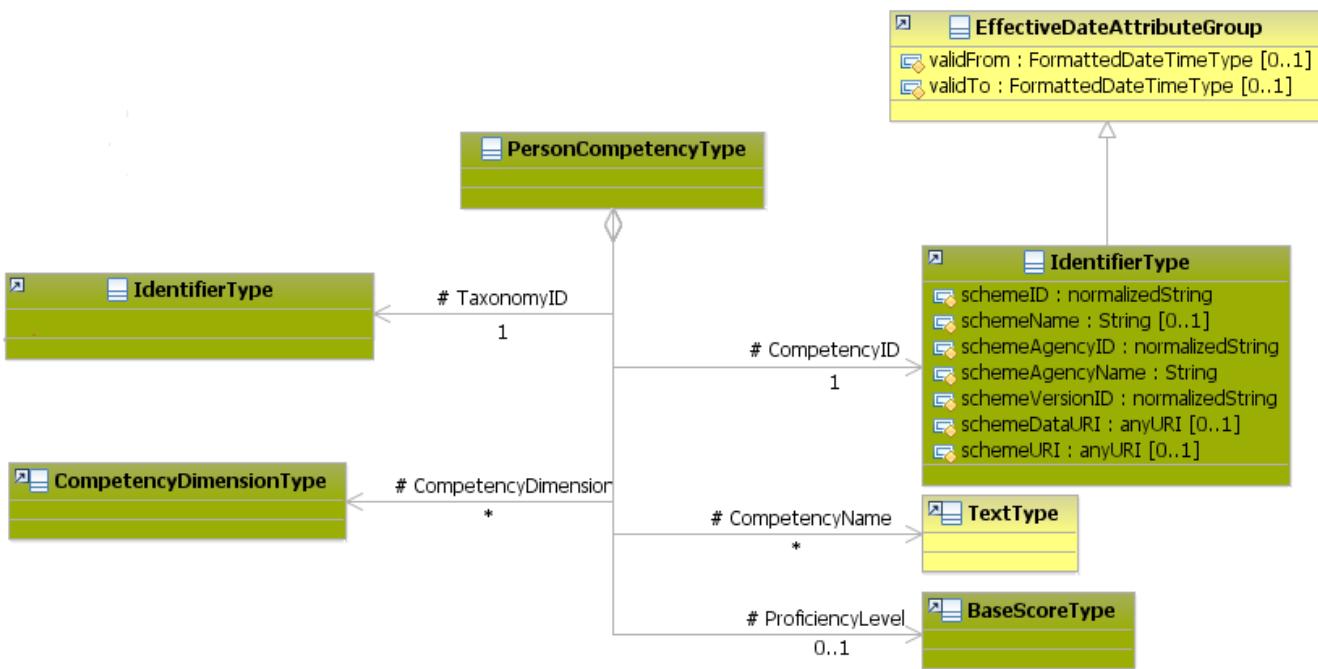

Figure 67: Person Competency Attributes Schema

Attributes	Description	Card.	Rule
This element has no attributes.			
<b>CompetencyID sub-element</b>			
Attributes	Description	Card.	Rule
<b>schemeID</b>	Identification of the identifier scheme	1	Depending on TaxonomyID's value, the value is: • Language skills: ISO-639-1/2-Languages
<b>schemeName</b>	The identification scheme name	0..1	Depending on TaxonomyID's value, the value is: • Language skills: ISO-639-1/2-Languages
<b>schemeAgencyID</b>	Identification of the agency that maintains the scheme	1	Depending on TaxonomyID's value, the value is: • Language skills: ISO
<b>schemeAgencyName</b>	The name of the agency that maintains the scheme	1	Depending on TaxonomyID's value, the value is: • Language skills: ISO
<b>schemeVersionID</b>	The identification scheme version	1	Depending on TaxonomyID's value, the value is: • Language skills: 639-1:2002 Alpha 2
<b>schemeDataURI</b>	The Uniform Resource Identifier that identifies where the data scheme is located	0..1	Depending on TaxonomyID's value, the value is: • Language skills: http://www.loc.gov
<b>schemeURI</b>	The Uniform Resource Identifier that identifies where the scheme is located	0..1	Depending on TaxonomyID's value, the value is: • Language skills: http://www.loc.gov
<b>validFrom</b>	Validity start date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.

#### CompetencyDimension sub-element

Attributes	Description	Card.	Rule
See section “4.14.5.2 Competency Dimension Attributes” for more information			

#### 4.14.3.3 Person Competency Examples

This is an example of how to add language skills. In this case, it adds French language skills, as defined by CEFR, with the proficiency level:

```
<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" >

    <CandidateProfile languageCode="en">
        <PersonQualifications>
            <PersonCompetency>
                <CompetencyID schemeID="ISO-639-1/2-Languages"
                    schemeAgencyID="ISO" schemeAgencyName="ISO"
                    schemeVersionID="639-1:2002 Alpha 2"
                    schemeDataURI="http://www.loc.gov">EN</CompetencyID>

                <TaxonomyID>language</TaxonomyID>

                <CompetencyName>French</CompetencyName>

                <ProficiencyLevel>
                    <ScoreText>A2</ScoreText>
                </ProficiencyLevel>

                <!--CompetencyDimension element may be filled in too. See the
                    description of this element. -->
            </PersonCompetency>
        </PersonQualifications>
    </CandidateProfile>
</Candidate>
```

This is an example of how to add other skills. In this case, it adds the Problems Management skill and is defined by a national agency.

The elements to define non-language skills are CompetencyID (it identifies the skills) and TaxonomyID (it identifies that it is a non-language skill):

```
<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" >
    <CandidateProfile languageCode="en">
        <PersonQualifications>
            <PersonCompetency>
                <CompetencyID schemeID="Identifier of schema"
                    schemeAgencyID="Identifier of the agency" schemeAgencyName="Name
                    of the agency" schemeVersionID="Version of the schema"
                    schemeDataURI="URL">Problems Management</CompetencyID>
                <TaxonomyID>other</TaxonomyID>

                <CompetencyName>Problems Management </CompetencyName>

            </PersonCompetency>
        </PersonQualifications>
    </CandidateProfile>
</Candidate>
```

#### 4.14.4 Sub-element: /Person Competency/Proficiency Level (level 4)

##### 4.14.4.1 Proficiency Level Element Description

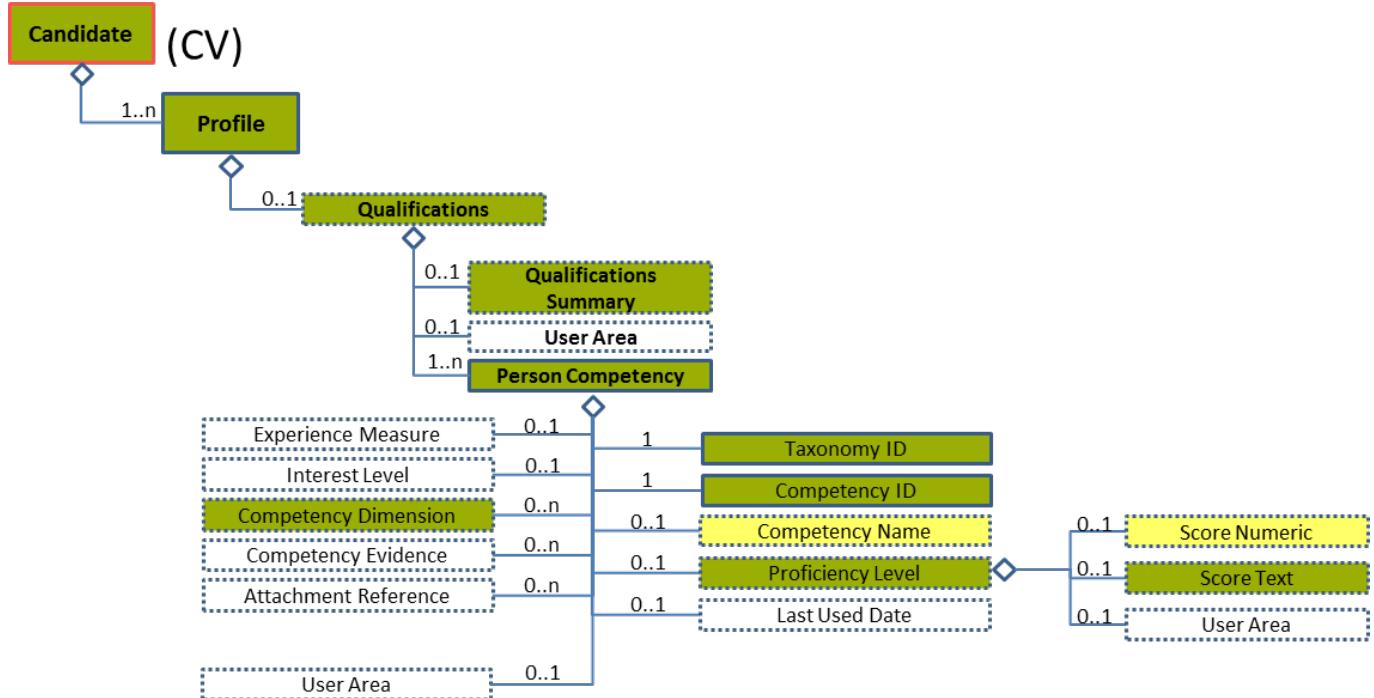

Figure 68: Proficiency Level Level 4 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Proficiency Level</b>	The state or degree of mastery or adeptness obtained or achieved for a given competency. A proficiency level is expressed as a score a point scale or a mark among range of values.	EURES Conformant Optional / 0..1	<b>BR-COM-49:</b> If “CompetencyDimension / TypeCode” is specified, “ProficiencyLevel” is mandatory.	N/A
<b>Sub-elements</b>				
<b>Score Numeric</b>	A numerical record of the marks allotted to individuals in the measurement of abilities, capacity to learn, personality assessment, or in other measurable characteristics (e.g. credit worthiness), including a set of attributes to identify the scoring scheme and its characteristics	EURES Optional / 0..1	N/A	“1”, “2”, “3”, etc.
<b>Score Text</b>	A non-numerical or text representation of a score. A record of the marks allotted to an individual in measuring his/her abilities, capacity to learn, personality assessment, or in other measurable characteristics (e.g., credit worthiness). It represents either the total number of points awarded, or a general standard achieved, including a set of attributes to identify the scoring scheme	EURES Conformant Optional / 0..1	<b>BR-COM-47:</b> Compulsory use of Language Proficiency Codes [CL25], if TaxonomyID’s value is “language”.	“A1”, “A2”, “B1”, etc. Full code list: “4.28.16 Language Proficiency Codes [CL25]”

#### 4.14.4.2 Proficiency Level Attributes

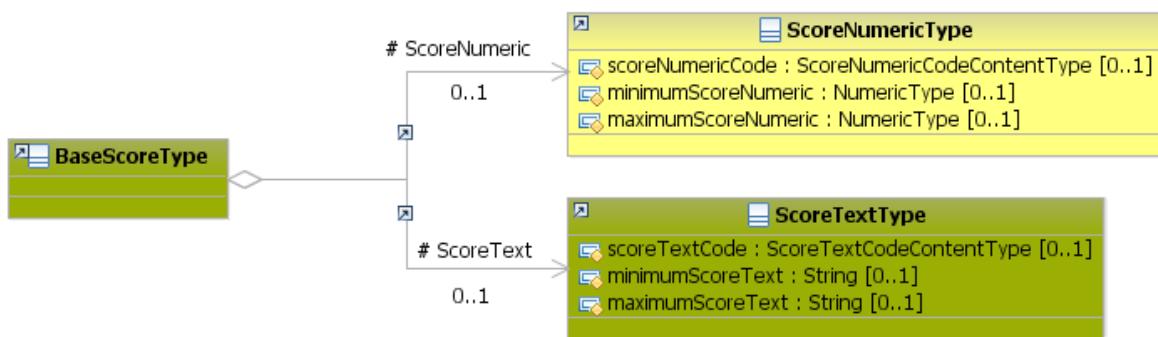

Figure 69: Proficiency Level Attributes Schema

Attributes	Description	Card.	Rule
This element has no attributes.			
	<b>ScoreText sub-element</b>		
Attributes	Description	Card.	Rule
<b>scoreTextCode</b>	The score text	0..1	N/A
<b>minimumScoreText</b>	The minimum score	0..1	N/A
<b>maximumScoreText</b>	The maximum score	0..1	N/A
	<b>ScoreNumeric sub-element</b>		
Attributes	Description	Card.	Rule
<b>scoreNumericCode</b>	The numeric type of scoring scheme	0..1	N/A
<b>minimumScoreNumeric</b>	The minimum score	0..1	N/A
<b>maximumScoreNumeric</b>	The maximum score	0..1	N/A

#### 4.14.4.3 Proficiency Level Examples

This example shows how to fill in the score as a text with CEFR taxonomy, where the minimum value is Basic User and the maximum Proficient User.

```

<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" >

    <CandidateProfile languageCode="en">
        <PersonQualifications>

Attributes	Description	Card.	Rule
This element has no attributes.			
<b>CategoryCode sub-element</b>			
Attributes	Description	Card.	Rule
<b>listName</b>	The code list name	1	N/A
<b>listVersionID</b>	The code list identification	1	N/A
<b>name</b>	The text equivalent of the code content component	0..1	N/A
<b>listURI</b>	The Uniform Resource Identifier that identifies where the code list is located	1	N/A
<b>listSchemeURI</b>	The Uniform Resource Identifier that identifies where the code list scheme is located	0..1	N/A
<b>Measure sub-element</b>			
Attributes	Description	Card.	Rule
<b>unitCode</b>	Code indicating the type of unit measure, such as "minutes" or "hours" (full code list "4.28.36 Unit Codes [CL54]" )	1	<b>BR-COM-36:</b> Compulsory use of the "EURES_UnitCodes-CodeList.gc" list defined by EURES. This is based on EU – Units of Measurement.
<b>type</b>	The description type	0..1	N/A
<b>Description sub-element</b>			
Attributes	Description	Card.	Rule
<b>type</b>	The description type	0..1	N/A

## 4.16 /Profile/Employment History (level 2)

### 4.16.1 Employment History Element Description

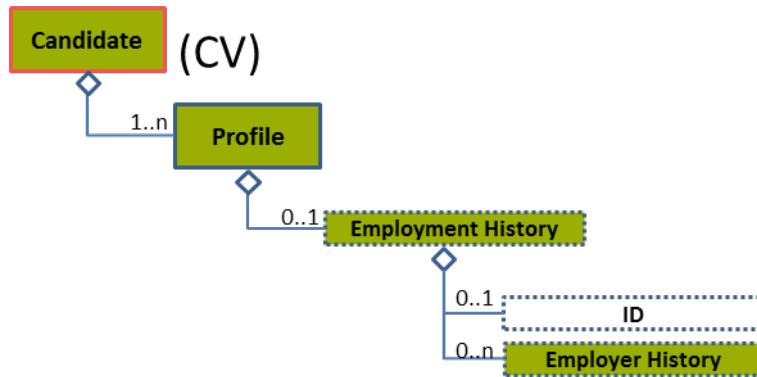

Figure 78: Employment History Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Employment History</b>	The prior and current details of a person's employment, work, or relevant experience as they would be reported in a professional profile, CV, resume, employment application, or similar document	EURES Conformant Optional / 0..1	N/A	N/A
<b>Sub-elements</b>				
<b>Employer History</b>	Details regarding a person's tenure while working for an employer	EURES Conformant Optional / 0..n	N/A	N/A

See section “4.16.3 Sub-element: /Employer History (level 3)” for more information

### 4.16.2 Employment History Attributes

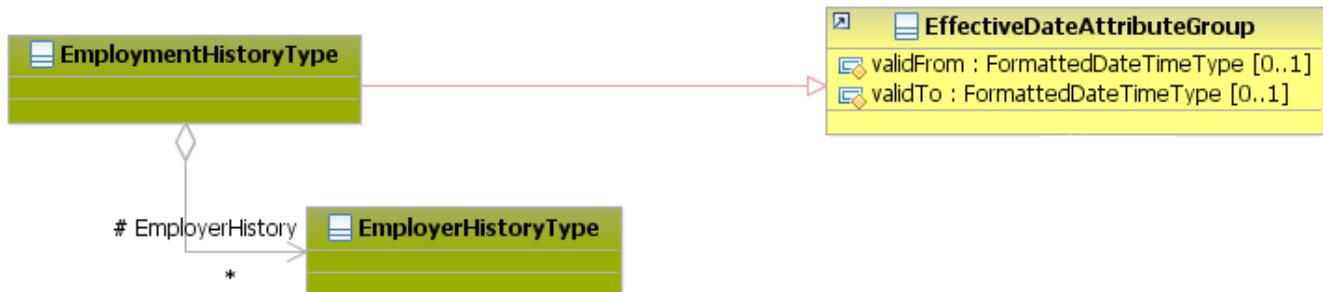

Figure 79: Employment History Attributes Schema

Attributes	Description	Card.	Rule
<b>validFrom</b>	Validity start date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>EmployerHistory sub-element</b>			
Attributes	Description	Card.	Rule
See section “4.16.3.2 Employer History Attributes” for more information			

### 4.16.3 Sub-element: /Employer History (level 3)

#### 4.16.3.1 Employer History Element Description

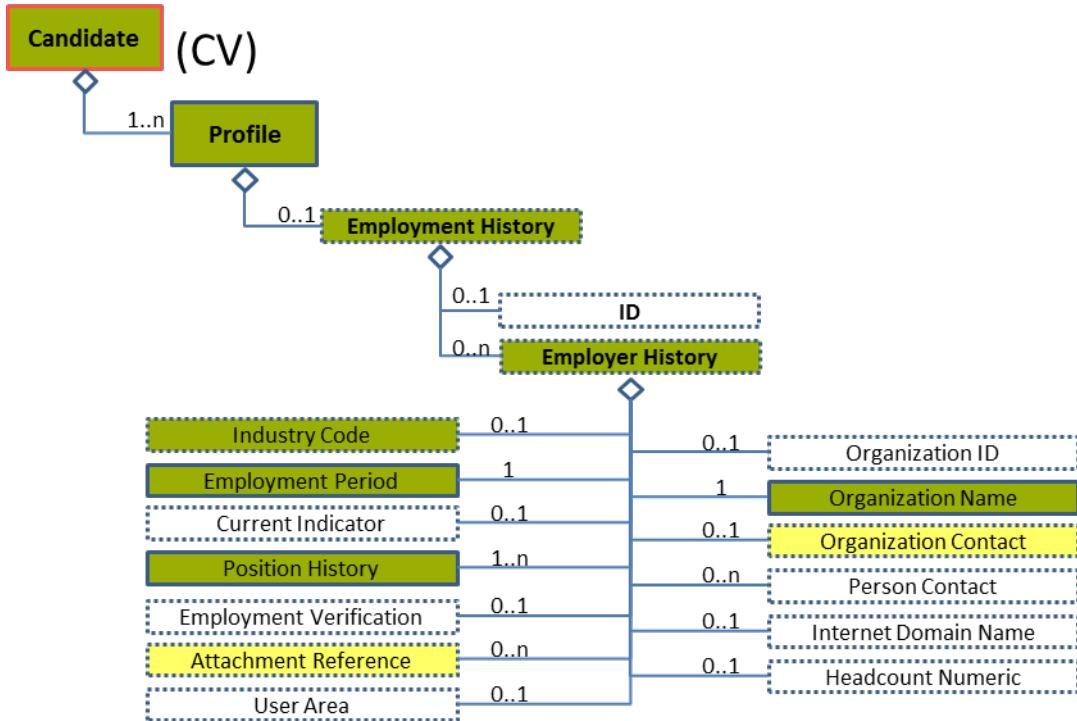

Figure 80: Employer History Level 3 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Employer History</b>	Details about a person's tenure while working for an employer. This element is optional as there could be candidates without work experience. If it is not filled out, it means that the candidate does not have work experience, or he/she does not want to fill it out.	EURES Conformant Optional / 0..n	N/A	N/A
<b>Sub-elements</b>				
<b>Organization Name</b>	Usually an official or legal name by which to refer to an organisation	EURES Conformant / 1	N/A	"Wellness Healthcare", "Police Department", etc.
<b>Organization Contact</b>	An Organisation's contact information	EURES Optional / 0..1	N/A	N/A
See section "4.16.4 Sub-element: /Employer History/Organization Contact (level 4)" for more information				
<b>Industry Code</b>	A code classifying the industry of the related organisation, position, or other entity.	EURES Conformant Optional / 0..1	<b>BR-COM-20:</b> Compulsory use of the "NACE-CodeList.gc" list defined by EURES. This is based on EU NACE.  Full code list: "4.28.18 NACE Codes [CL31]"	"01" = Agriculture, "02" = Forestry, etc.
<b>Employment Period</b>	Provides flexible options for representing employment period data	EURES Conformant / 1	N/A	N/A
See section "4.16.5 Sub-element: /Employer History/Employment Period (level 4)" for more information				
<b>Position</b>	Details about the person's tenure within	EURES	N/A	N/A

History	the position	Conformant / 1..n		
See section “4.16.8 Sub-element: /Employer History/Position History (level 4)” for more information				
Attachment Reference	Reference to external documents attached	EURES Optional / 0..n	N/A	N/A
See section “4.16.10 Sub-element: /Employer History/Attachment Reference (level 4)” for more information

#### 4.17.4 Sub-element: /Referee/Person Name (level 4)

##### 4.17.4.1 Person Name Element Description

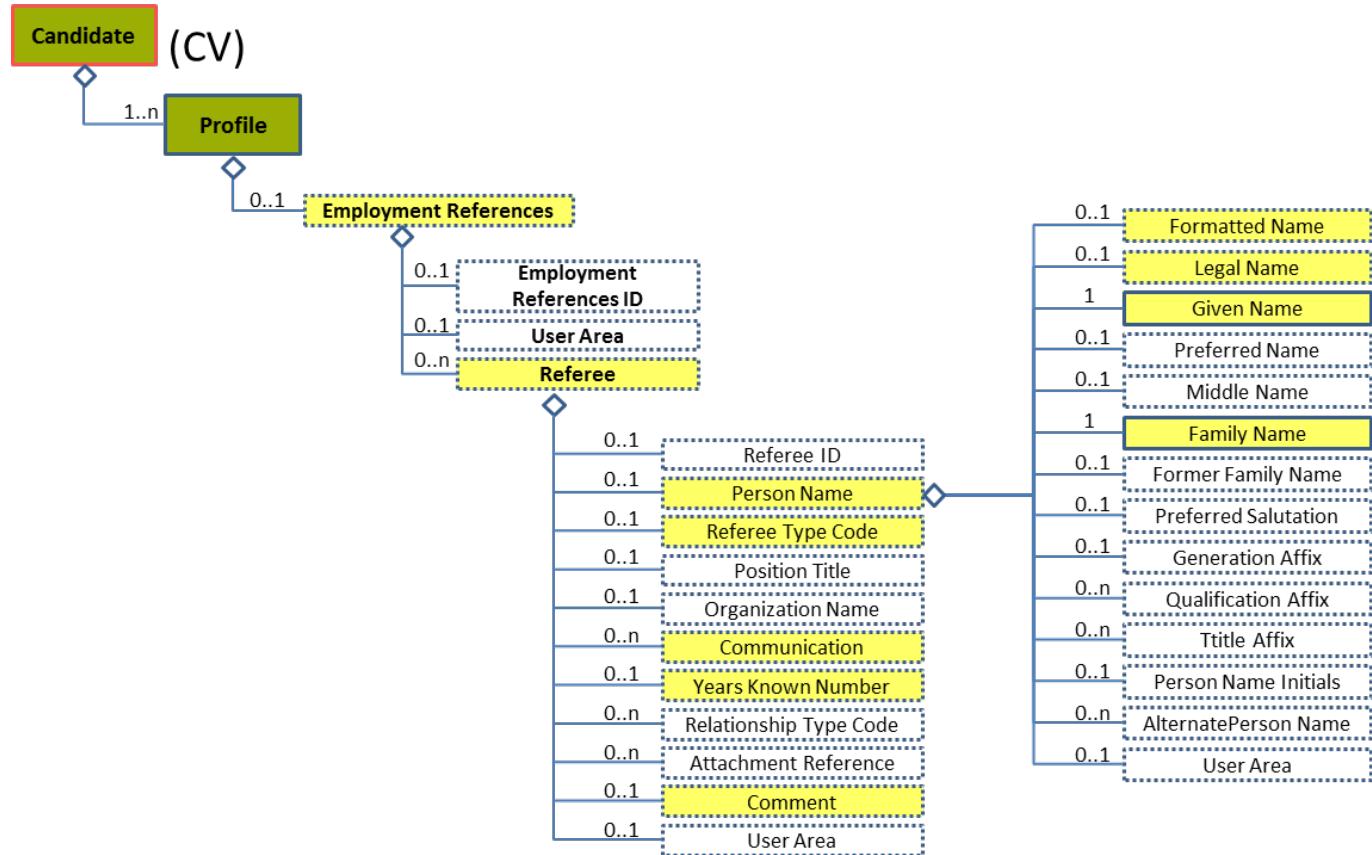

Figure 100: Person Name Level 4 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Person Name</b>	A component for capturing summary or fine-grain data that makes up a person's name	EURES Optional / 0..1	N/A	N/A
<b>Sub-elements</b>				
<b>Formatted Name</b>	This is a formatted presentation of a name (for example, a Person Name) that might alternatively be presented as discretely fielded components, or it could be a name with alternative formatted representations. The formatCode is an optional available attribute for specifying the applicable "mask" or type of format presentation to which the content conforms.	EURES Optional / 0..1	N/A	"Paula Cook", "James Black", etc.
<b>Legal Name</b>	The name that an individual is given at birth and/or is recognised by a government or other legal entity, or that appears on a birth certificate	EURES Optional / 0..1	N/A	"Paula Cook", "James Black", etc.
<b>Given Name</b>	A person's given name or first name.	EURES Optional /	N/A	"Mark", "Silvia", etc.

Element	Description	Layer / Cardinality	Rule	Examples
<b>Family Name</b>	Contains a non-given name. This is an inherited name or one representing a family relationship, or in some cultural contexts a "Place Name" (where someone is from). In some cultural contexts, a single family name is typical, while in others there may be multiple family names. A "primary" attribute may be used in the case where there are multiple last names. A family name can have a "prefix," such as Von, De, Van, Al, etc. These can be represented using the FamilyName "prefix" attribute. Not all implementers may find it necessary to separate prefixes from the family name itself. Capturing the prefix and FamilyName as discrete fields can become important when formatting, or appearance may vary based on context. For example, in some cultural contexts it may be common to use a blank space as the delimiter between the prefix and the family name, while in others, a hyphen might be used. Separating the prefix from the FamilyName allows such formatting requirements to be handled flexibly.	1 EURES Optional / 1	N/A	"Smith", "Santos Tavares", "Van der Meyde", etc.

#### 4.17.4.2 Person Name Attributes

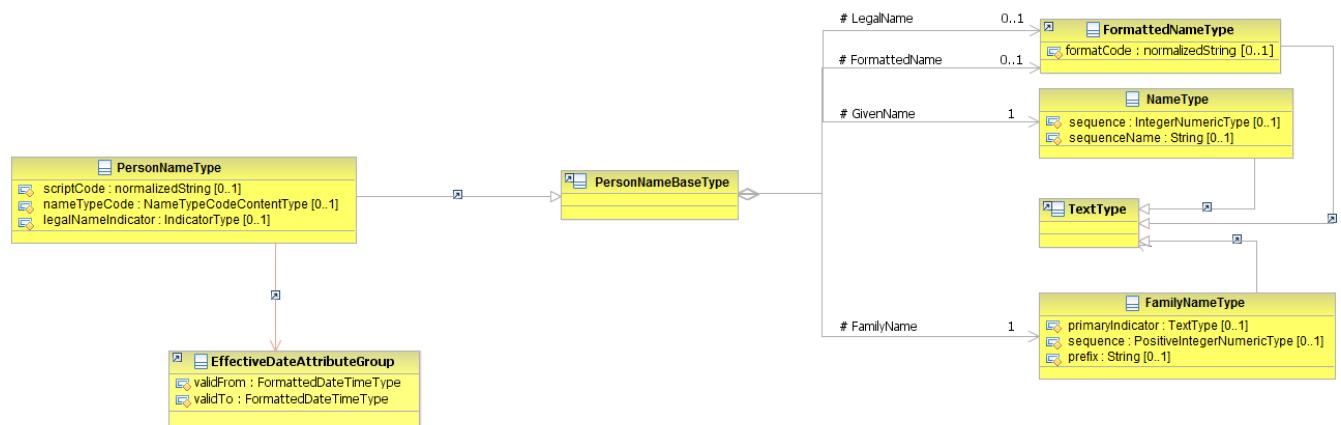

Figure 101: PersonName Attributes Schema

Attributes	Description	Card.	Rule
<b>scriptCode</b>	Type of alphabet that the name is written with such as "Roman", "Kenji", etc.	0..1	N/A
<b>nameTypeCode</b>	A code classifying the type of name, such as "CurrentName" or "FormerName" (full code list "4.28.19 Name Enum-Type Codes [CL32]" )  This is an HR-Open Standards open list.	0..1	<b>BR-COM-09:</b> The Open HR-Open Standards Code List "NameTypeCodeEnumType" must be used to codify the /PersonName /NameTypeCode.
<b>legalNameIndicator</b>	Boolean indicating if it is the legal name or not	0..1	N/A
<b>validFrom</b>	Validity start date for this Person Name	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this Person Name	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.

## 4.20 /Profile/Position Preferences (level 2)

### 4.20.1 Position Preferences Element Description

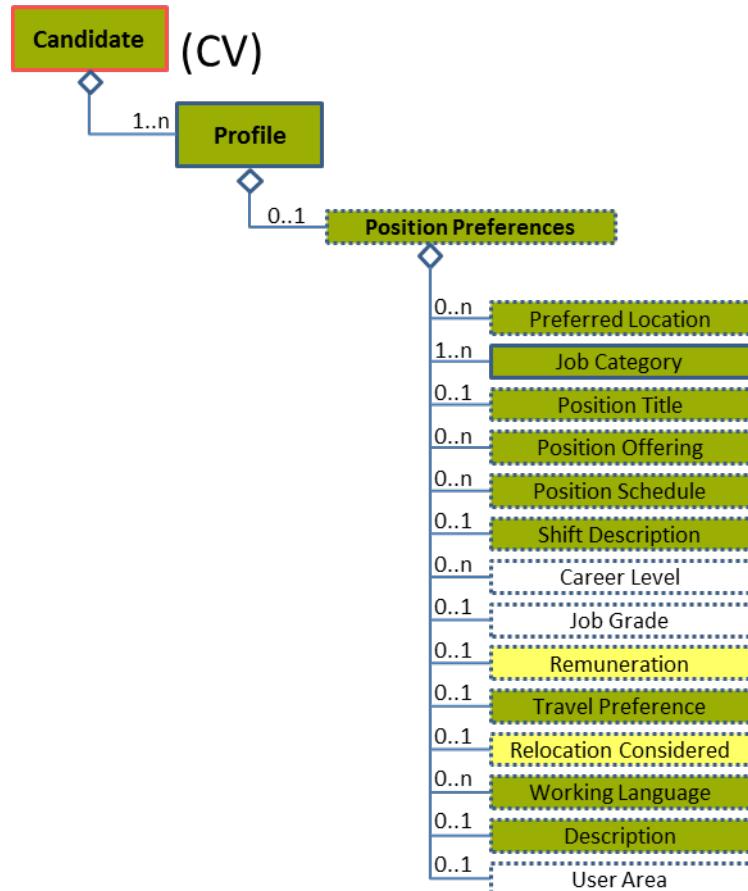

Figure 118: Position Preferences Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Position Preferences</b>	Information about a candidate's preferences in a position	EURES Conformant Optional / 0..1	N/A	N/A
<b>Sub-elements</b>				

<b>Preferred Location</b>	Location of the preferred position	EURES Conformant Optional / 0..n	N/A	N/A
See section “4.20.3 Sub-element: /Preferred Location (level 3)” for more information				
<b>Job Category</b>	Category of the job	EURES Conformant Optional / 1..n	N/A	N/A
See section “4.20.5 Sub-element: /Job Category (level 3)” for more information				
<b>Position Title</b>	A short phrase describing the position as it would be listed on a business card or in a company directory	EURES Conformant Optional / 0..1	N/A	“President”, “Chief Executive Officer”, etc.
<b>Position Offering</b>	These values are descriptive in classifying a position opportunity  This is an HR-Open Standards open list.	EURES Conformant Optional / 0..n	<b>BR-COM-38:</b> Compulsory use of the “PositionOfferingCodeContentType” list.  <b>BR-COM-43:</b> Multiple entries of this code list are allowed.	“DirectorHire”, “Temporary”, “TemporaryToHire”, “ContractToHire”, Etc.  Full code list: “4.28.24 Position Offering Codes [CL37]”
<b>Position Schedule</b>	Describes a position’s general schedule  This is an HR-Open Standards open list.	EURES Conformant Optional / 0..n	<b>BR-COM-39:</b> Compulsory use of the “PositionScheduleCodeContentType” list.  <b>BR-COM-43:</b> Multiple entries of this code list are allowed.	“FullTime”, “PartTime”, “FlexTime”, “Any”  Full code list: “4.28.25 Position Schedule Codes [CL38]”
<b>Shift Description</b>	Descriptive information about a work shift. “Shift” refers to a portion or division of time during which employees or resources are scheduled to be engaged or on-duty.	EURES Conformant Optional / 0..1	N/A	“Description about a work shift”, etc.
<b>Remuneration</b>	Remuneration offered	EURES Optional / 0..1	N/A	N/A
See section “4.20.6 Sub-element: /Offered Remuneration (level 3)” for more information				
<b>Travel Preference</b>	Travel Preference details	EURES Conformant Optional / 0..1	N/A	N/A
See section “4.20.10 Sub-element: /Travel Preference (level 3)” for more information				
<b>Relocation Considered</b>	Indicates if a candidate would consider moving to a new city or location for a suitable position	EURES Optional / 0..1	N/A	N/A
See section “4.20.11 Sub-element: /Relocation Considered (level 3)” for more information				
<b>Working Language</b>	A code classifying the language or languages used within the workplace or associated with work. This is intended to communicate general information about the language(s) used within the work environment or general information about a candidate’s specific language preferences. This component might be offered as descriptive “pre-qualification” information on a position announcement. It	EURES Conformant Optional / 0..n	<b>BR-COM-11:</b> Compulsory use of the “LanguageCodes-CodeList.gc” list defined by EURES. This is based on ISO-639-1:2002 Alpha-2, which includes all world languages.	“aa” = Afar, “ab” = Abkhazian, etc.  Full code list: “4.28.15 Language Codes [CL24]”

	might appear within the context of a Candidate Profile as a general statement of a candidate's general language capabilities or preferences. WorkingLanguageCode is not intended as a statement of language proficiency or specific requirement relating to language proficiency. Specific information regarding language proficiency should be covered either within PersonCompetency or as may be appropriate.		<b>BR-COM-43:</b> Multiple entries of this code list are allowed.	
<b>Description</b>	Description of position preferences	EURES Conformant Optional / 0..1	N/A	"Description of the position preferences", etc.

## 4.20.5 Sub-element: /Job Category (level 3)

### 4.20.5.1 Job Category Element Description

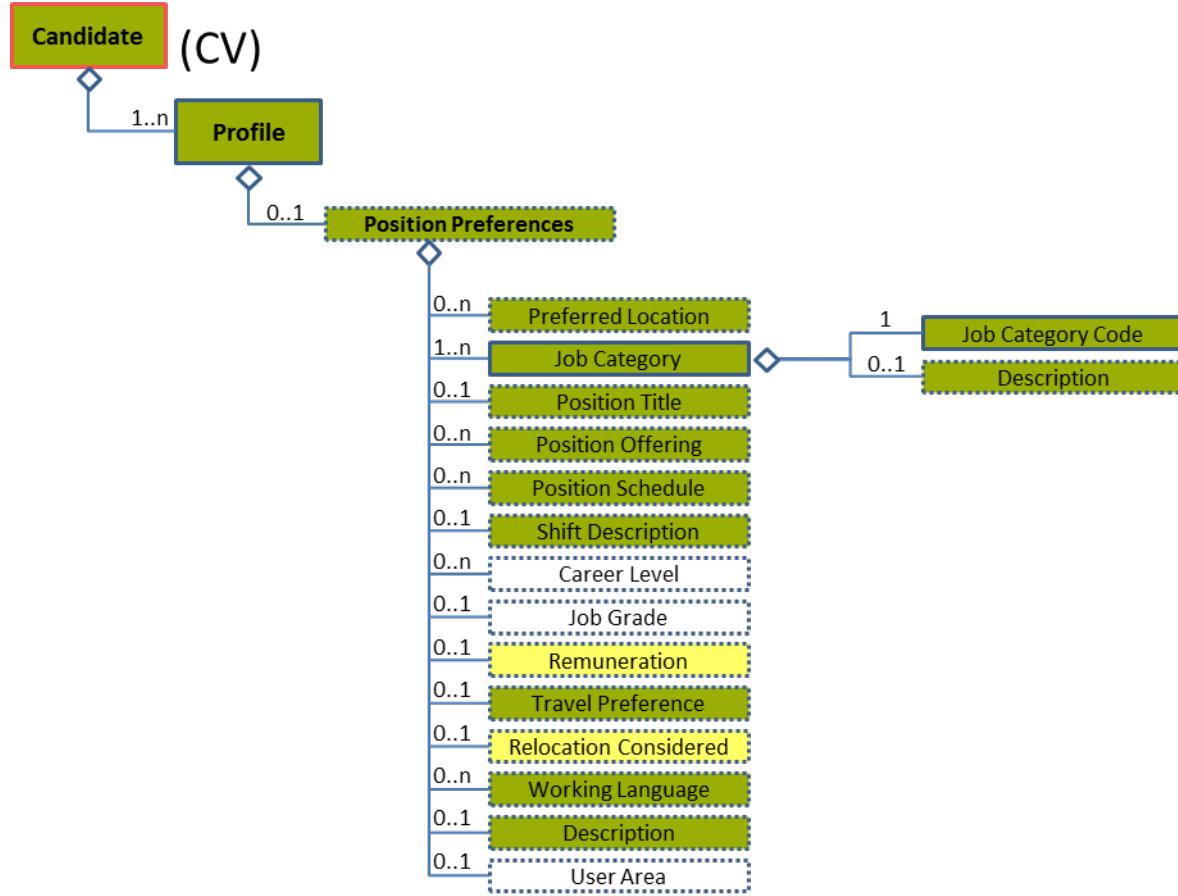

Figure 124: Job Category Level 3 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Job Category	Category of the job	EURES Conformant / 1..n	N/A	N/A
<b>Sub-elements</b>				
Job Category Code	A code classifying the type or category of a job. This may be used for its occupational classification. The JobCategoryCode will usually be repeatable so that a single job could be classified across multiple dimensions. The JobCategoryCode could be used to classify the job by industry, but note that an explicit IndustryCode is available in contexts such as PositionOrganizationDetails.	EURES Conformant / 1	<b>BR-COM-29:</b> Compulsory use of the "ISCO2008-CodeList.gc" list defined by EURES and based on ISCO-08. Alternatively, use of ESCO Occupations – version 1.0. <sup>3</sup>	"1" – Managers, "12" – Administrative, etc.  Full code list: "4.28.14 Job Category Codes [CL20]"
Description	Job category Description	EURES Conformant Optional / 0..1	N/A	"Description of job category", etc.

#### 4.20.5.2 Job Category Attributes

#### 4.22.3 Sub-element: /Military Service (level 3)

##### 4.22.3.1 Military Service Element Description

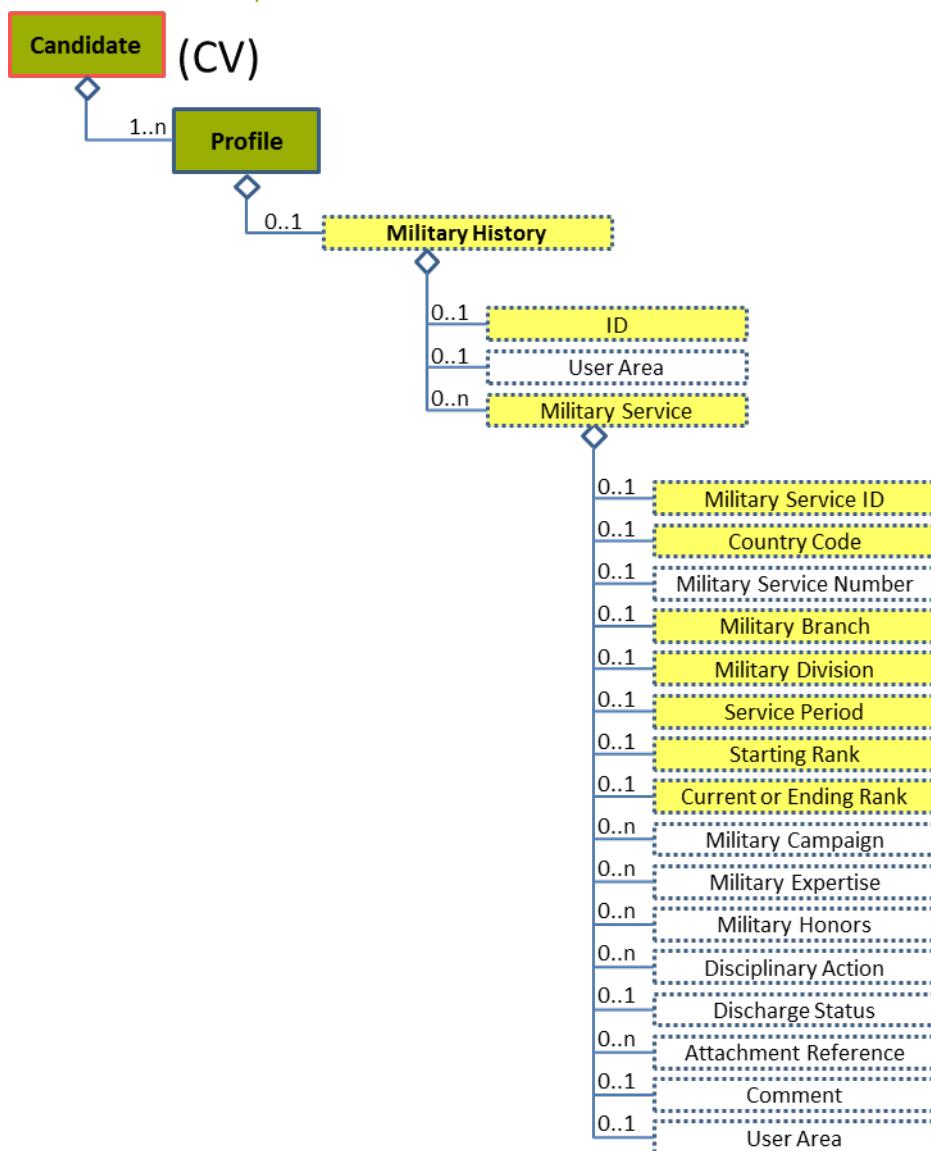

Figure 149: Military Service Level 3 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Military Service	Description of military service	EURES Optional / 0..n	N/A	N/A
Sub-elements				
Military Service ID	Identifier of military service	EURES Optional /	N/A	"MS-291", "MS-121", etc.

		0..1		
Country Code	A code specifying the country where the candidate did/does military service	EURES Optional / 0..1	BR-COM-12: Compulsory use of the "Countries-CodeList.gc" list defined by EURES. This is based on ISO 3166-1 Alpha-2, which includes all countries of the world.	"AR" – Argentina, "AU" – Austria, "CS" – Costa Rica, etc. Full code list: "4.28.4 Country Codes [CL07]"
Military Branch	The military office or department in which the person served	EURES Optional / 0..1	N/A	"Army", "Navy", etc.
Military Division	A portion of an army or fleet, consisting of a definite number of troops or vessels, under one commanding officer; also applied to a definite portion of a squadron or battalion	EURES Optional / 0..1	N/A	"Air assault", "Armoured", "Infantry", etc.
Service Period	The period of military service	EURES Optional / 0..1	N/A	N/A
See section "4.22.4 Sub-element: /Military Service/Service Period (level 4)" for more information				
Starting Rank	Start rank	EURES Optional / 0..1	N/A	"Subordinate officer", "Air officer", etc.
Current or Ending Rank	Current or final rank	EURES Optional / 0..1	N/A	"Warrant officer", "General", etc.

#### 4.22.3.2 Military Service attributes

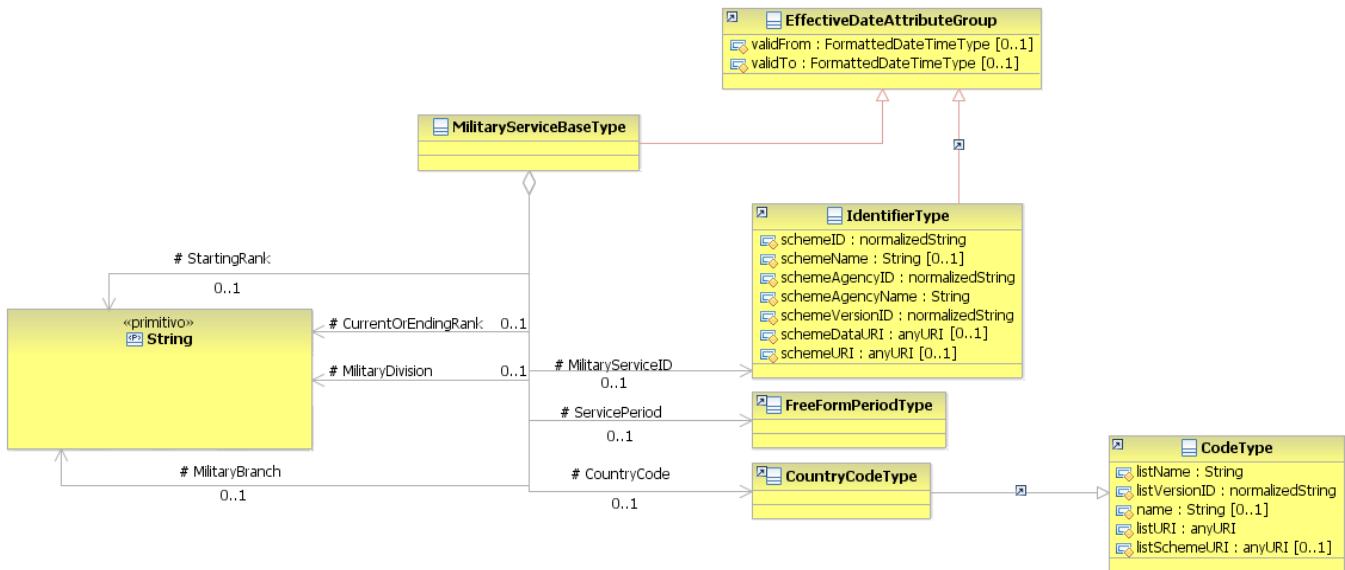

Figure 150: Military Service Attributes schema

Attributes	Description	Card.	Rule
<b>validFrom</b>	Validity start date for this entity's information	0..1	<b>BR-COM-05:</b> If not specified, the "validFrom" date will default to "assigned by EURES on reception". <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this entity's information	0..1	<b>BR-COM-07:</b> If not specified, the "validTo" date will be decided by EURES depending on the transaction context. <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>MilitaryServiceID sub-element</b>			

Attributes	Description	Card.	Rule
<b>schemeID</b>	Identification of the identifier scheme	1	N/A
<b>schemeName</b>	The identification scheme name	0..1	N/A
<b>schemeAgencyID</b>	Identification of the agency that maintains the scheme	1	N/A
<b>schemeAgencyName</b>	The name of the agency that maintains the scheme	1	N/A
<b>schemeVersionID</b>	The identification scheme version	1	N/A
<b>schemeDataURI</b>	The Uniform Resource Identifier that identifies where the data scheme is located	0..1	N/A
<b>schemeURI</b>	The Uniform Resource Identifier that identifies where the scheme is located	0..1	N/A
<b>validFrom</b>	Validity start date for this entity's information.	0..1	<b>BR-COM-05:</b> If not specified, the "validFrom" date will default to "assigned by EURES on reception". <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this entity's information	0..1	<b>BR-COM-07:</b> If not specified, the "validTo" date will be decided by EURES depending on the transaction context. <b>BR-COM-08:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.

This element has no attributes.			
<b>Name sub-element</b>			
Attributes	Description	Card.	Rule
<b>sequence</b>	Establishes the order of the contact data	0..1	N/A
<b>sequenceName</b>	Establishes the order of the contact data	0..1	N/A

## 4.23.5 Sub-element: /Patent/Patent Status (level 4)

### 4.23.5.1 Patent Status Element Description

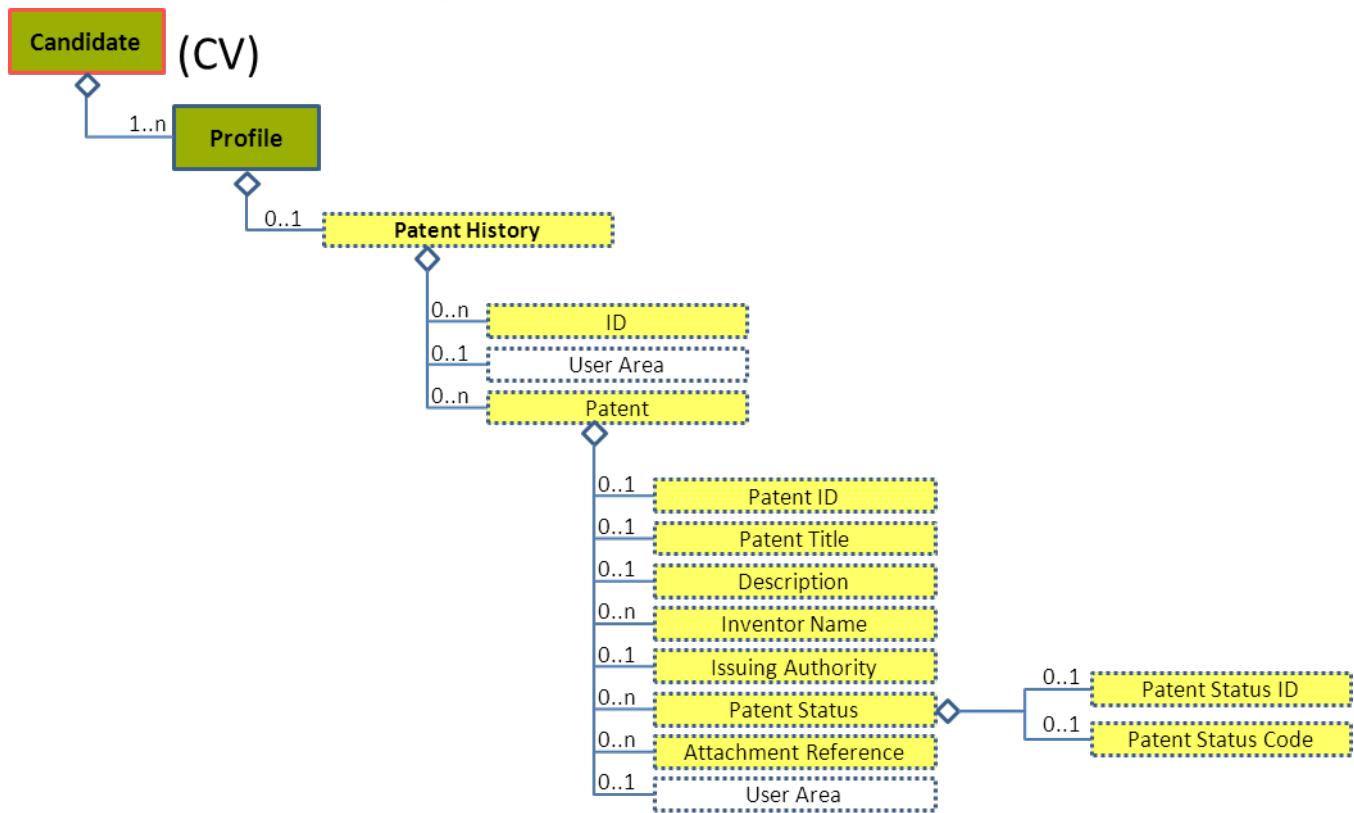

Figure 159: Patent Status 3 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Patent Status	The status of the patent. These stages or steps would generally be set by the government agency administering patent applications, for example, "patent pending".	EURES optional / 0..n	N/A	N/A
<b>Sub-elements</b>				
Patent Status ID	The identifier of the patent status	EURES Optional / 0..1	N/A	"PS-1234", "344", etc.
Patent Status Code	A code classifying the current or reported status of the associated patent  This is an HR-Open Standards open list.	EURES Optional / 0..1	<b>BR-CV-26:</b> Compulsory use of the "PatentStatusCode" list.	"PatentIssued", "PatentPending", "PatentFiled"  Full code list: "4.28.23 Patent Status Enum-Type Codes [CL36]"

#### 4.23.5.2 Patent Status Attributes

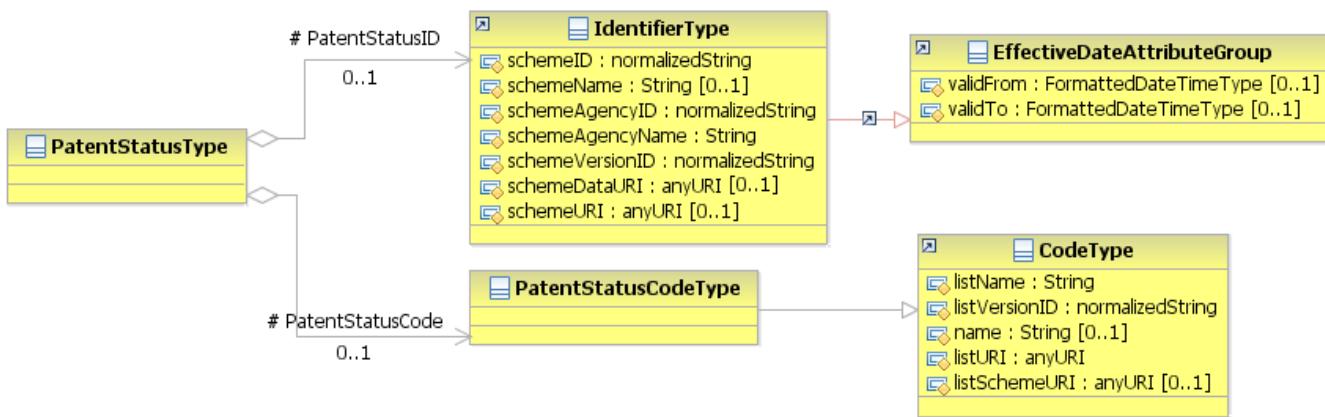

Figure 160: PatentStatus Attributes Schema

Attributes	Description	Card.	Rule
This element has no attributes.			
<b>PatentStatusID sub-element</b>			
Attributes	Description	Card.	Rule
<b>schemeID</b>	Identification of the identifier scheme	1	N/A
<b>schemeName</b>	The identification scheme name	0..1	N/A
<b>schemeAgencyID</b>	Identification of the agency that maintains the scheme	1	N/A
<b>schemeAgencyName</b>	The name of the agency that maintains the scheme	1	N/A
<b>schemeVersionID</b>	The identification scheme version	1	N/A
<b>schemeDataURI</b>	The Uniform Resource Identifier that identifies where the data scheme is located	0..1	N/A
<b>schemeURI</b>	The Uniform Resource Identifier that identifies where the scheme is located	0..1	N/A
<b>validFrom</b>	Validity start date for this entity's information.	0..1	<b>BR-COM-05:</b> If not specified, the "validFrom" date will default to "assigned by EURES on reception". <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this entity's information	0..1	<b>BR-COM-07:</b> If not specified, the "validTo" date will be decided by EURES depending on the transaction context. <b>BR-COM-08:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>PatentStatusCode sub-element</b>			
Attributes	Description	Card.	Rule
<b>listName</b>	The code list name	1	N/A
<b>listVersionID</b>	The code list identification	1	N/A
<b>name</b>	The text equivalent of the code content component	0..1	N/A
<b>listURI</b>	The Uniform Resource Identifier that identifies where the code list is located	1	N/A
<b>listSchemeURI</b>	The Uniform Resource Identifier that identifies where the code list scheme is located	0..1	N/A

## 4.23.6 Sub-element: /Patent/Attachment Reference (level 4)

### 4.23.6.1 Attachment Reference Element Description

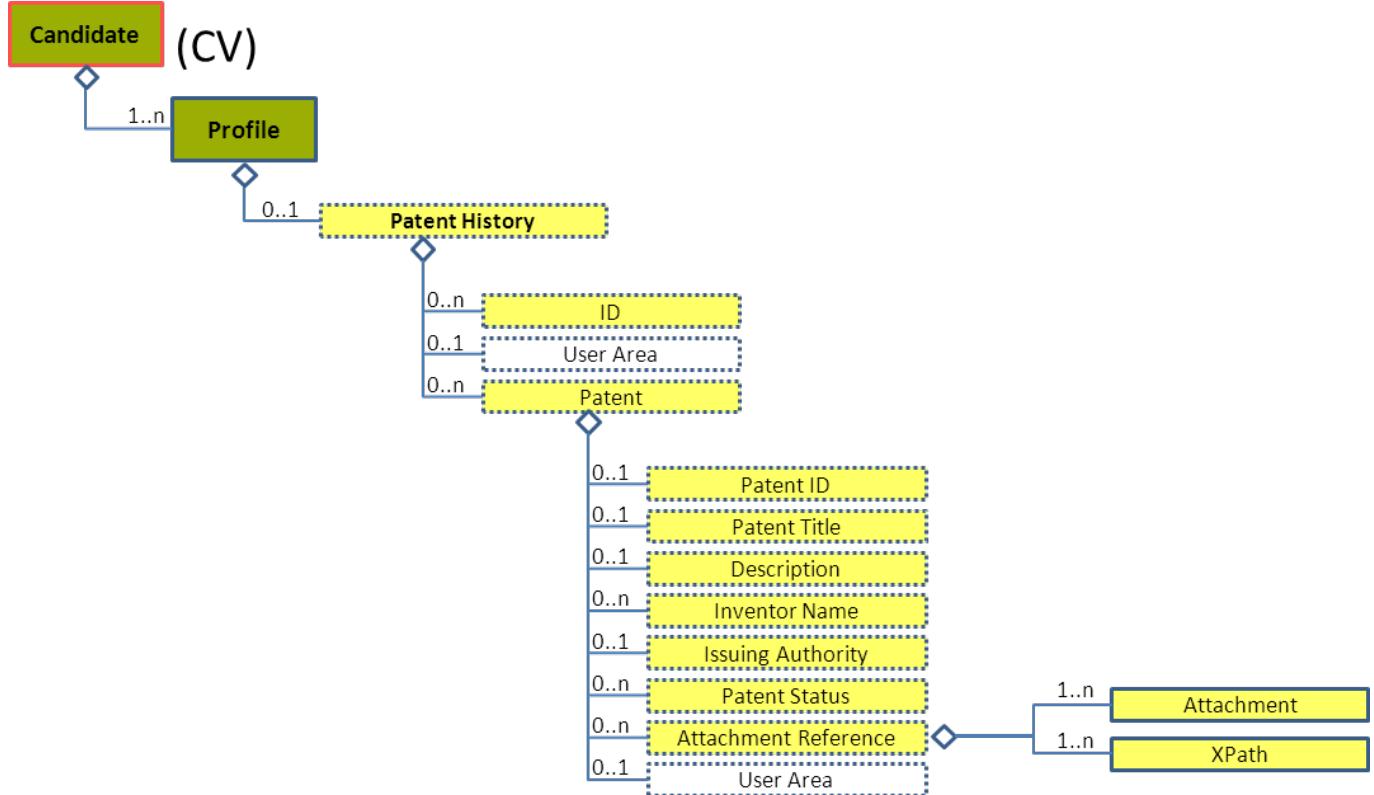

Figure 161: Attachment Reference Level 4 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Attachment Reference	Reference to the external documents attached	EURES Optional / 0..n	N/A	N/A
<b>Sub-elements</b>				
The same as "4.16.10.1 Attachment Reference Element Description"

Attributes	Description	Card.	Rule
The same as "4.16.10.2 Attachment Reference Attributes".			

## 4.24 /Profile/Publication History (level 2)

### 4.24.1 Publication History Element Description

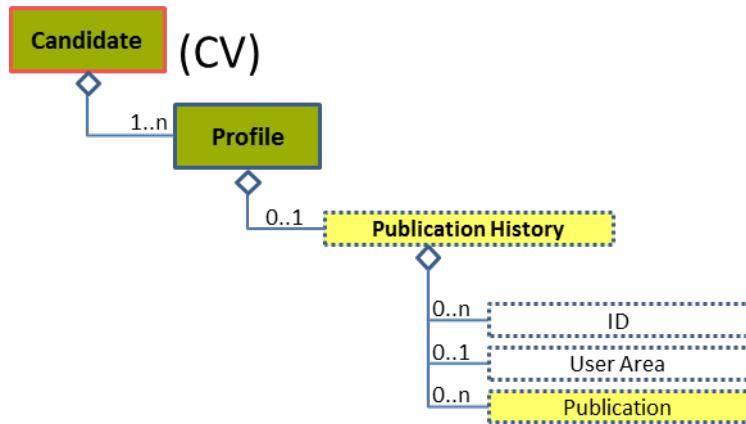

Figure 163: Publication History Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Publication History	A collection of information about one or more text publications by the Candidate	EURES Optional / 0..1	N/A	N/A
<b>Sub-elements</b>				
Publication	A book, map, engraving, photograph, piece of music, or other work	EURES Optional / 0..n	N/A	N/A
See section “4.24.3 Sub-element: /Publication (level 3)” for more information				

### 4.24.2 Publication History Attributes

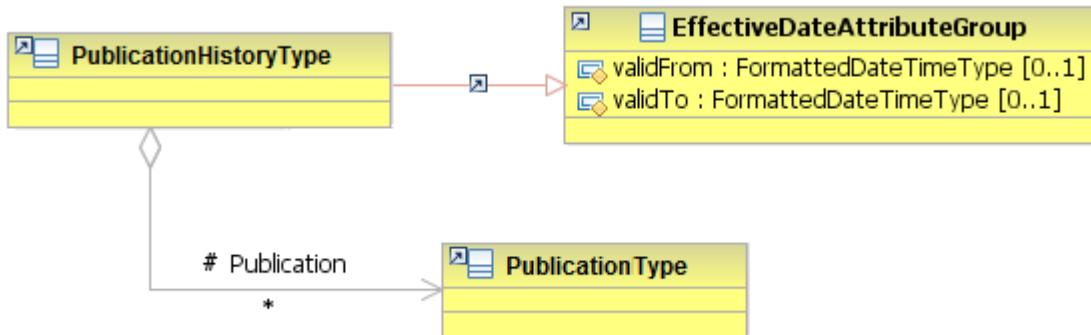

Figure 164: Publication History Attributes Schema

Attributes	Description	Card.	Rule
validFrom	Validity start date for this entity's information	0..1	<b>BR-COM-05:</b> If not specified, the “validFrom” date will default to “assigned by EURES on reception”. <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
validTo	Validity end date for this entity's information	0..1	<b>BR-COM-07:</b> If not specified, the “validTo” date will be decided by EURES depending on the transaction context. <b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>Publication sub-element</b>			
Attributes	Description	Card.	Rule
See section “4.24.3.2 Publication Attributes” for more information			

### 4.24.3 Sub-element: /Publication (level 3)

#### 4.24.3.1 Publication Element Description

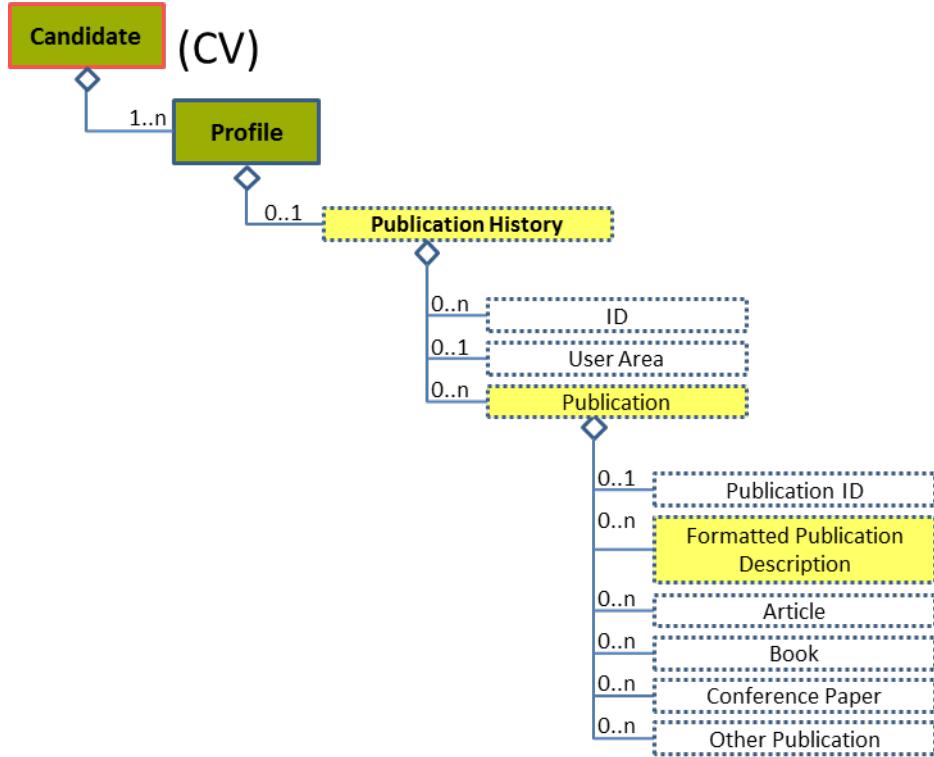

Figure 165: Publication Level 3 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Publication	A book, map, engraving, photograph, piece of music, or other work	EURES Optional / 0..n	N/A	N/A
<b>Sub-elements</b>				
Formatted Publication Description	An unfiled or formatted description of a publication	EURES Optional / 0..n	N/A	"Article about Machine Learning in the Weekend Magazine"

#### 4.24.3.2 Publication Attributes

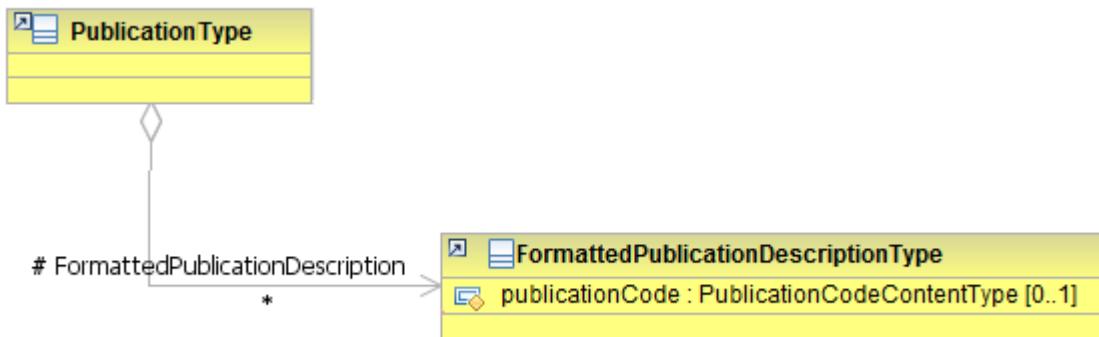

Figure 166: Publication Attributes Schema

Attributes	Description	Card.	Rule
This element has no attributes.			
FormattedPublicationDescription sub-element			

Attributes	Description	Card.	Rule
<b>publicationCode</b>	Code to describe the type of publication  This is an HR-Open Standards code list (full code list "4.28.30 Publication Enum-Type Codes [CL59]"")	0..1	<b>BR-CV-27:</b> Compulsory use of the "PublicationCode" list.

## 4.25 /Profile/Organization Affiliations (level 2)

### 4.25.1 Organization Affiliations Element Description

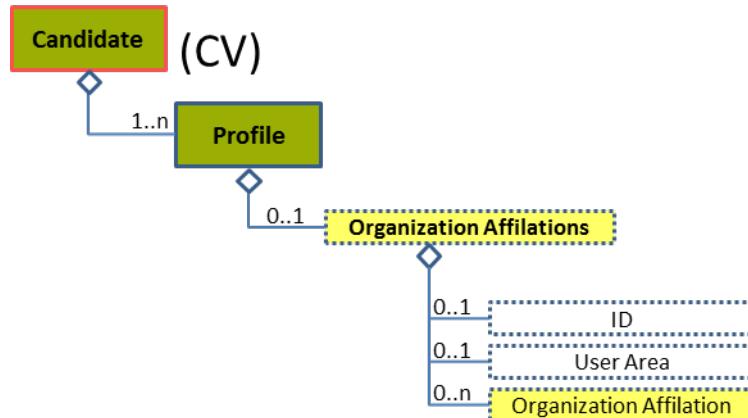

Figure 167: Organization Affiliations Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Organization Affiliations</b>	Contains details on one or more organization affiliations. For example, membership in a trade or civic organization, seat on an organization's board of directors, membership in a union, etc.	EURES Optional / 0..1	N/A	N/A
<b>Sub-elements</b>				
<b>Organization Affiliation</b>	Contains information about a person's affiliation with a trade, professional, or similar organization or group formed around a common purpose or cause	EURES Optional / 0..n	N/A	N/A

See section "4.25.3 Sub-element: /Organization Affiliation (level 3)" for more information

### 4.25.2 Organization Affiliations Attributes

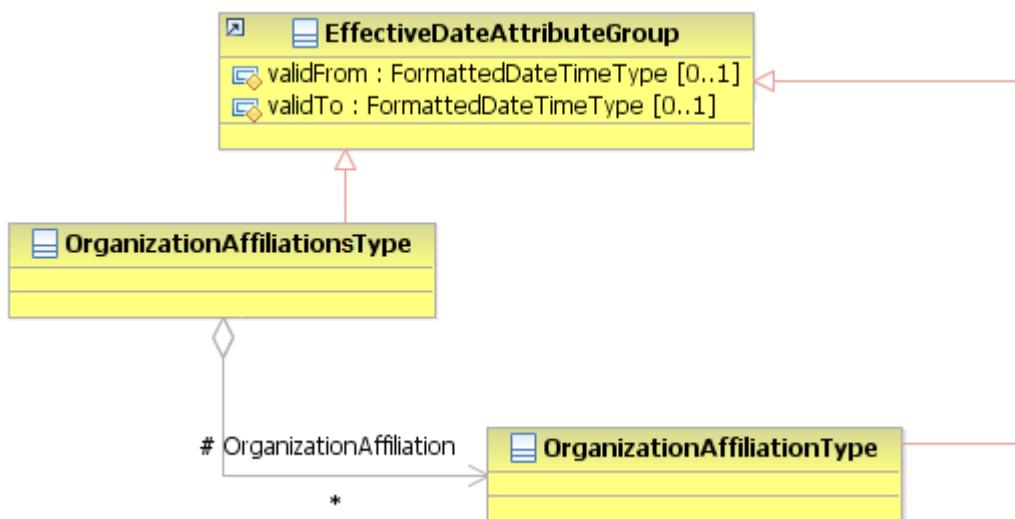

Figure 168: Organization Affiliations Attributes Schema

Attributes	Description	Card.	Rule
<b>validFrom</b>	Validity start date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.

Attributes	Description	Card.	Rule
validTo	Validity end date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.

Attributes	Description	Card.	Rule
See section “4.26.3.2 Speaking Event Attributes” for more information			

### 4.26.3 Sub-element: /Speaking Event (level 3)

#### 4.26.3.1 Speaking Event Element Description

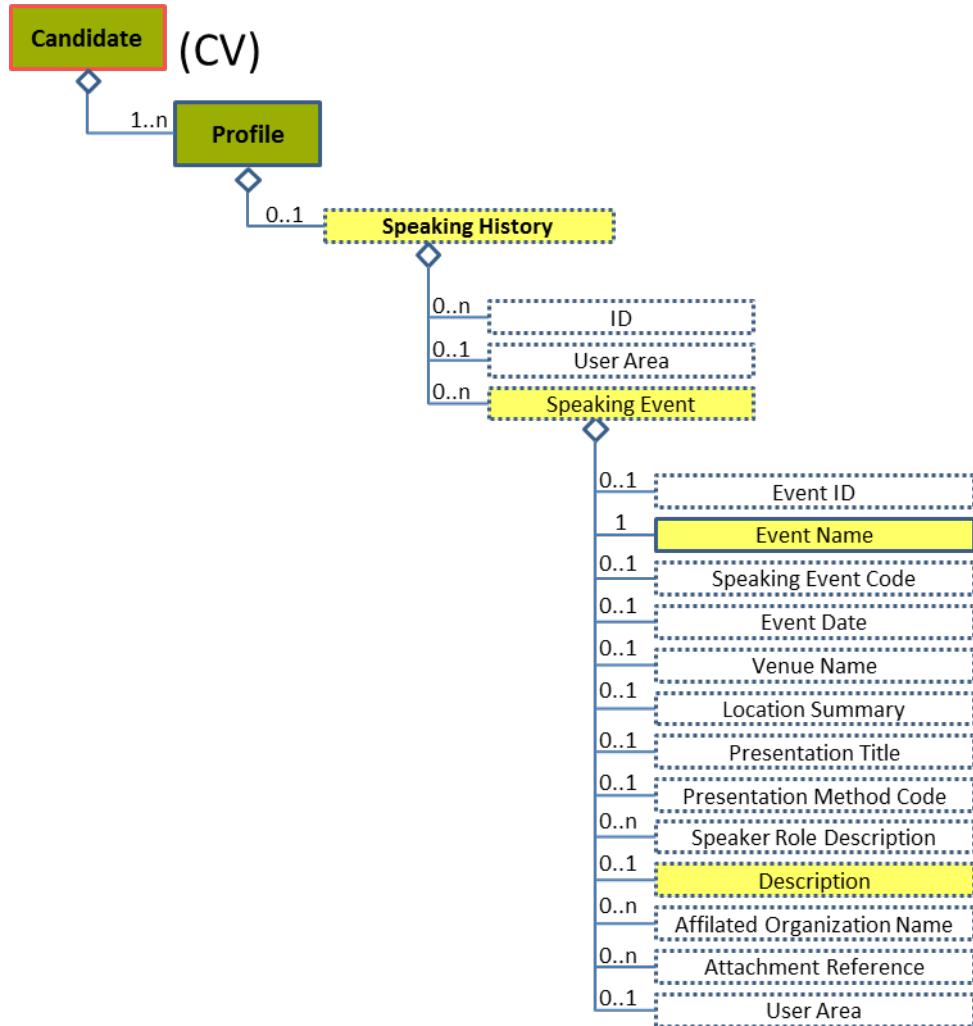

Figure 173: Speaking Event Level 3 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
<b>Speaking Event</b>	Contains a set of details about an event in which the associated person was a lecturer or presenter.	EURES Optional / 0..n	N/A	N/A
<b>Sub-elements</b>				
<b>Event Name</b>	The name of the speaking event	EURES Optional / 1	N/A	“Event’s name”, etc.
<b>Description</b>	Description of the speaking event	EURES Optional / 0..1	N/A	“Description of the speaking event”

#### 4.26.3.2 Speaking Event Attributes

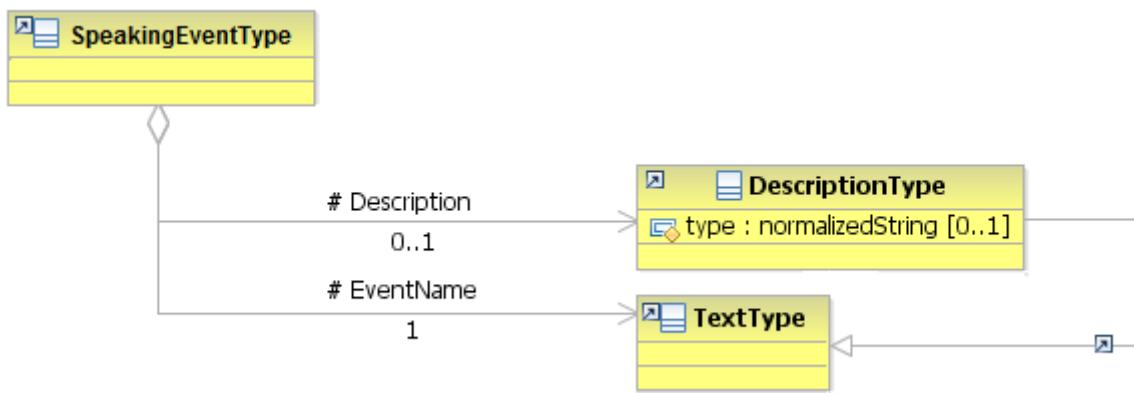

Figure 174: Speaking Event Attributes Schema

Attributes	Description	Card.	Rule
This element has no attributes.			
<b>Description sub-element</b>			
Attributes	Description	Card.	Rule
<b>type</b>	The comment type.	0..1	N/A
<b>EventName sub-element</b>			
Attributes	Description	Card.	Rule
This sub-element has no attributes.			

## 4.27 /Profile/Attachment (level 2)

### 4.27.1 Attachment Element Description

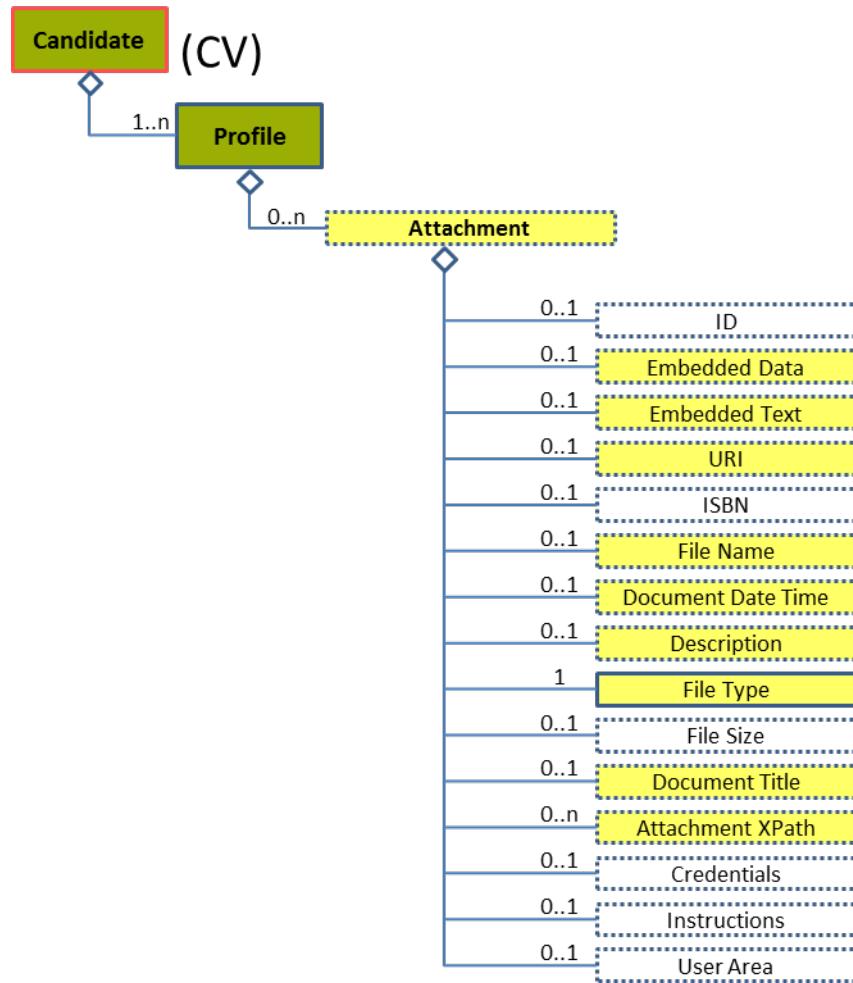

Figure 175: Attachment Level 2 Entity Diagram

Element	Description	Layer / Cardinality	Rule	Examples
Attachment	Allows for embedding or referencing external documents or digital objects	EURES Optional / 0..n	<b>BR-COM-42:</b> An Attachment shall not embed and simultaneously refer to an URI that contains the same document. External references to documents, using the URI element, are the recommended method (when possible) for attaching documents.	N/A
<b>Sub-elements</b>				
Embedded Data	Allows the data to be embedded directly into the BOD instance	EURES Optional / 0..1	N/A	-
Embedded Text	Embedded text	EURES Optional / 0..1	N/A	"Embedded text"
URI	Represents a Uniform Resource Identifier Reference (URI). An URI value can be absolute or relative, and may have an optional fragment identifier (i.e., it may be a URI Reference). This type should be used to specify the intention that the value	EURES Optional / 0..1	N/A	"http://uri.org", etc.

	fulfils the role of a URI, as defined by [RFC 2396] and as amended by [RFC 2732].				
<b>File Name</b>	Indicates the name of the File being referenced	EURES Optional / 0..1	N/A	"File Name"	
<b>Document Date Time</b>	The date and/or time associated with the current or referenced version of a document	EURES Optional / 0..1	N/A	"2012/12/23", etc.	
<b>Description</b>	Description of the attachment	EURES Optional / 0..1	N/A	"Description of the attachment"	
<b>File Type</b>	Identifies the type of the file type of the attachment	EURES Conformant Optional / 1	<b>BR-COM-35:</b> Compulsory use of the "EURES_FileTypeCode-CodeList.gc" list defined by EURES. Full code list: "4.28.12 File-Type Codes [CL17]"	"PDF", "DOC", etc.	
<b>Document Title</b>	The name of the associated document	EURES Optional / 0..1	N/A	"Photo", "Europass CV", etc.	
<b>Attachment XPath</b>	Path to the external documents attached	EURES Optional / 0..n	N/A	"/Candidate/CandidatePerson", etc.	

#### 4.27.2 Attachment Attributes

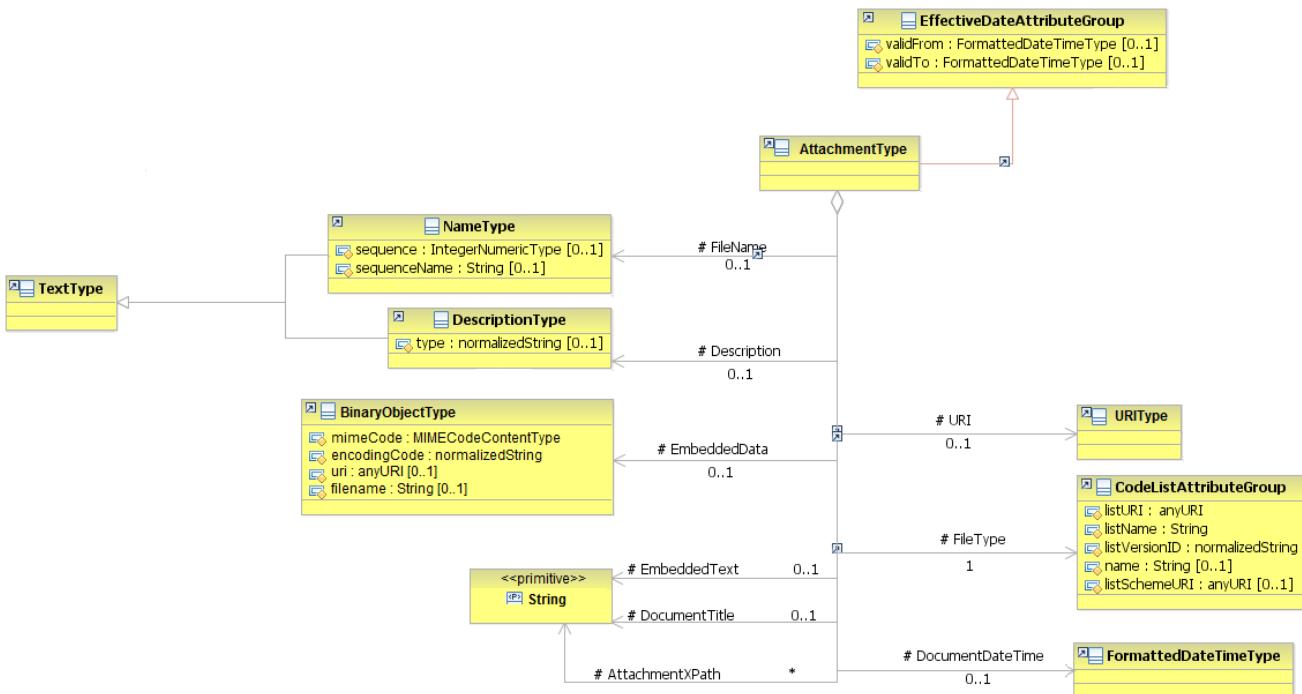

Figure 176: Attachment Attributes Schema

Attributes	Description	Card.	Rule
<b>validFrom</b>	Validity start date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>validTo</b>	Validity end date for this entity's information	0..1	<b>BR-COM-06:</b> Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.
<b>URI sub-element</b>			
Attributes	Description	Card.	Rule
This sub-element has no attributes.			
<b>FileType sub-element</b>			
Attributes	Description	Card.	Rule
<b>listName</b>	The code list name	1	N/A
<b>listVersionID</b>	The code list identification	1	N/A
<b>name</b>	The text equivalent of the code content	0..1	N/A

	component		
listURI	The Uniform Resource Identifier that identifies where the code list is located	1	N/A
listSchemeURI	The Uniform Resource Identifier that identifies where the code list scheme is located	0..1	N/A
<b>DocumentDateTime sub-element</b>			
Attributes	Description	Card.	Rule
This sub-element has no attributes.			
<b>FileName sub-element</b>			
Attributes	Description	Card.	Rule
sequence	Establishes the order of the contact data	0..1	N/A
sequenceName	Establishes the order of the contact data	0..1	N/A
<b>Description sub-element</b>			
Attributes	Description	Card.	Rule
type	The comment type	0..1	N/A
<b>EmbeddedData sub-element</b>			
Attributes	Description	Card.	Rule
mimeCode	Codes that specify the data mime code	1	<b>BR-COM-50:</b> Compulsory use of Mime Codes [CL56].
encodingCode	The data encoding type	1	<b>BR-COM-51:</b> Only 'base64Binary' is allowed.
uri	The URI of the file.	0..1	N/A
filename	The name of the file.	0..1	N/A

#### 4.27.3 Attachment Examples

This is an example of how to fill in the elements of an attached document:

```
<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" >

    <CandidateProfile languageCode="en">
        <Attachment>
            <oa:URI>http://europass.cedefop.europa.eu/es/documents/curriculum-
vitae/examples/pdf_en_GB-a.pdf</oa:URI>
            <oa:Description>CV in PDF format</oa:Description>
            <oa:FileType listName="EURES_FileTypeCode" listVersionID="1.0"
name="PDF document"
listURI="https://ec.europa.eu/eures">PDF</oa:FileType>
            <DocumentTitle>pdf_en_GB-a</DocumentTitle>
        </Attachment>
    </CandidateProfile>
</Candidate>
```

This is an example of how to fill in an embedded document:

```
<Candidate xmlns="http://www.hr-xml.org/3" xsi:schemaLocation="http://www.hr-xml.org/3
..../Developer/Nouns/Candidate.xsd" >
    <CandidateProfile languageCode="en">
        <Attachment>
            <oa:EmbeddedData mimeCode="image/jpeg"
encodingCode="base64Binary">/9j/4AAQSkZJRgABAQAAAQABAAAD//gA7Q1JFQVRPU
jog</oa:EmbeddedData>
            <oa:FileName>candidate_photo.jpg</oa:FileName>
            <DocumentDateTime>2013-01-30</DocumentDateTime>
            <oa:Description>Candidate's photo</oa:Description>
            <oa:FileType listName="EURES_FileTypeCode" listVersionID="1.0"
name="photo" listURI="https://ec.europa.eu/eures">photo</oa:FileType>
            <DocumentTitle>Photo</DocumentTitle>
            <AttachmentXPath>/Candidate/CandidatePerson</AttachmentXPath>
        </Attachment>
    </CandidateProfile>
</Candidate>
```

## 4.28 Code Lists

Code Lists are tables containing codes or values representing concepts that have been agreed amongst several parties as having exactly the same meaning for all.

HR-Open Standards 3.1 provides many Code Lists for many different concepts. HR-Open Standards Code Lists are based on W3C XSD Enumeration Schemas. The new EURES CV specifications re-use a large bunch of these Code Lists.

In addition to the HR-Open Standards Code Lists, EURES also defines several different Code Lists based on the OASIS Code Lists specification, another representation method that is compatible with the HR-Open Standards specification. Detailed information about this specification can be found here:

[https://www.oasis-open.org/committees/tc\\_home.php?wg\\_abbrev=codelist](https://www.oasis-open.org/committees/tc_home.php?wg_abbrev=codelist)

Thus, these code lists could be defined as:

- **HR-Open Standards**: code lists defined and maintained by HR-Open Standards organisation.
- **EURES standards**: code lists defined and maintained by international entities, such as NUTS or ISO.
- **EURES standards new**: code lists defined and maintained by EURES, and therefore, they are only used by EURES.

A set of attributes must be filled in for each code list not representing the HR-Open Standards.

Attributes	Description	Card.
<b>listName</b>	Code list name	1
<b>listVersionID</b>	Code list identification	1
<b>name</b>	Text equivalent of the code content component	0..1
<b>listURI</b>	The Uniform Resource Identifier that identifies where the code list is located	1
<b>listSchemeURI</b>	The Uniform Resource Identifier that identifies where the code list scheme is located	0..1

The following is an explanation of the code lists, including the standard version used, the values of the attributes and some examples. Identification is also added in order to relate the same codes with the EURES-JV-StandardStaticModel (RD01 – “EURES Job Vacancy Data Standard description”).

### 4.28.1 Candidate Source Type Codes [CL04]

These codes classify the source that supplied the CV's candidate.

The values come from a **HR-Open Standards list**, and the values can be:

Code	Description
<b>JobBoard</b>	Website advertising job vacancies
<b>StaffingAgency</b>	Employment Services
<b>Intermediary</b>	Intermediary supplier
<b>Referrer</b>	Recommendation supplier

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	CandidateSourceCodeType
<b>listVersionID</b>	1.0
<b>name</b>	{Code name or description}
<b>listURI</b>	<a href="http://www.hr-xml.org/">http://www.hr-xml.org/</a>
<b>listSchemeURI</b>	<a href="http://www.hr-xml.org/3..../Developer/Common/CodeLists.xsd">http://www.hr-xml.org/3..../Developer/Common/CodeLists.xsd</a>

This example fills in candidate source as an *intermediary* code:

```

<CandidateSourceCode listName="CandidateSourceCodeType" listVersionID="1.0"
name="Intermediary supplier" listURI="http://www.hr-xml.org/"
listSchemeURI="http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd"
>intermediary</CandidateSourceCode>

```

#### 4.28.2 Channel Type Codes [CL05]

These codes classify the communication channel used to contact a person or organisation.

Their values come from a **HR-Open Standards list**, and the values could be:

Code	Description
<b>Telephone</b>	The communication channel is the telephone number.
<b>MobileTelephone</b>	The communication channel is the cell phone number.
<b>Fax</b>	The communication channel is the fax number.
<b>Email</b>	The communication channel is the email address.
<b>InstantMessage</b>	The communication channel is the instant message.
<b>Web</b>	The communication channel is the web address.

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	ChannelCodeContentType
<b>listVersionID</b>	1.0
<b>name</b>	{Code name or description}
<b>listURI</b>	http://www.hr-xml.org/
<b>listSchemeURI</b>	http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd

This example fills in the communication channel as a *telephone* code:

```

<ChannelCode listName="ChannelCodeContentType" listVersionID="1.0" name="Telephone"
listURI="http://www.hr-xml.org/" listSchemeURI="http://www.hr-xml.org/3
..../Developer/Common/CodeLists.xsd"
>telephone</ChannelCode>

```

#### 4.28.3 Contact Use Type Codes [CL06]

These codes classify the type of use given to the communication channel to contact a person or an organisation.

Their values come from a **HR-Open Standards list**, and the values could be:

Code	Description
<b>personal</b>	The communication channel is for personal use.
<b>business</b>	The communication channel is for business communication.

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	ContactUseCodeContentType
<b>listVersionID</b>	1.0
<b>name</b>	{Code name or description}
<b>listURI</b>	http://www.hr-xml.org/
<b>listSchemeURI</b>	http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd

This example fills in the communication use as a *personal* code:

```

<UseCode listName="ContactUseCodeContentType" listVersionID="1.0" name="Personal"
listURI="http://www.hr-xml.org/" listSchemeURI="http://www.hr-xml.org/3
..../Developer/Common/CodeLists.xsd"
>Personal</UseCode>

```

#### 4.28.4 Country Codes [CL07]

The country codes are given in the following table. Note that, for two countries (Greece (EL) and United Kingdom (UK))<sup>4</sup> the code used differs from the ISO code.

The standard used is **EURES Standards: ISO 3166-1-alpha-2 code (ISO adapted to EC codification)**. The values are in the ISO website:

- [http://www.iso.org/iso/country\\_codes/iso\\_3166\\_code\\_lists/country\\_names\\_and\\_code\\_elements.htm](http://www.iso.org/iso/country_codes/iso_3166_code_lists/country_names_and_code_elements.htm)

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	Countries
<b>listVersionID</b>	3166-1-alpha-2
<b>name</b>	{Code name or description}
<b>listURI</b>	http://ec.europa.eu/esco/ConceptScheme/country
<b>listSchemeURI</b>	PENDING DEFINITION

This example fills in the country as *Belgium* code:

```
<CountryCode listName="Countries" listVersionID="3166-1-alpha-2" name="Belgium"
listURI="http://ec.europa.eu/esco/ConceptScheme/country"
>BE</CountryCode>
```

#### 4.28.5 Country Subdivision Codes [CL08]

These codes are the regions of the European Union countries.

The standard used is the **EURES Standards: NUTS 2013 – Level 3**<sup>5</sup>. The values are in the official website:

- [http://eur-lex.europa.eu/legal-content/EN/TXT/?qid=1412243003302&uri=CELEX:32014R0868#ntr2-L\\_2014241EN.01000101-E0002](http://eur-lex.europa.eu/legal-content/EN/TXT/?qid=1412243003302&uri=CELEX:32014R0868#ntr2-L_2014241EN.01000101-E0002)

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	EURES_CountrySubdivisionCodes
<b>listVersionID</b>	2013-Level-3
<b>name</b>	{Code name or description}
<b>listURI</b>	http://ec.europa.eu/eurostat
<b>listSchemeURI</b>	PENDING DEFINITION

This example fills in the country as *Belgium* code:

```
<oa:CountrySubDivisionCode listName="EURES_CountrySubdivisionCodes"
listVersionID="2013-Level-3" name="Arr. Antwerpen"
listURI="http://ec.europa.eu/eurostat"
>BE211</oa:CountrySubDivisionCode>
```

#### 4.28.6 Currency Codes [CL09]

These codes specify the types of currency in the EEA / EFTA and Switzerland.

The standard used is the **EURES Standards: ISO 4217:2008<sup>6</sup>, adapted to EEA/EFTA<sup>7</sup>** and including Switzerland.

<sup>4</sup> Country names of the Member States of EU: <http://publications.europa.eu/code/en/en-370100.htm>

<sup>5</sup> NUTS 2013: [http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts\\_nomenclature/introduction](http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts_nomenclature/introduction)

<sup>6</sup> ISO – ISO-4217:2008: [http://www.iso.org/iso/catalogue\\_detail?csnumber=46121](http://www.iso.org/iso/catalogue_detail?csnumber=46121)

Code	Description
EUR	Euro
BGN	Lev
CHF	Swiss franc
CZK	Czech koruna
DKK	Danish krone
GBP	Pound sterling
HRK	Kuna
HUF	Forint
ISK	Króna
LTL	Litas
NOK	Norwegian krone
PLN	Złoty
RON	Romanian leu
SEK	Krona

The code attribute values are as follows:

Attributes	Value
listName	EURES_CurrencyCodes
listVersionID	4217:2008
name	{Code name or description}
listURI	<a href="http://www.iso.org/iso/">http://www.iso.org/iso/</a>
listSchemeURI	PENDING DEFINITION

As currency is filled in as attribute, it is filled in differently:

```
<RemunerationReferenceAmount currencyID="EUR">25000</RemunerationReferenceAmount>
```

#### 4.28.7 Degree Codes [CL10]<sup>7</sup>

Codes used to specify the degree certification obtained.

**EURES Standards: ESCO Qualifications**<sup>8</sup> are the standard used. The values are in the ESCO official website:

- <https://ec.europa.eu/ESCO/portal/browse?type=Qualification>

The code attribute values are as follows:

Attributes	Value
listName	ESCO_Qualifications
listVersionID	ESCOv1
name	{Code name or description}
listURI	PENDING
listSchemeURI	PENDING

This example fills in the PMP qualification:

```
<DegreeTypeCode listName="ESCO_Qualifications" listVersionID="ESCOv1" name="PMP"
listURI="PENDING"
>http://ec.europa.eu/esco/qualification/23847</DegreeTypeCode>
```

#### 4.28.8 Dimension Codes [CL11]

These are the codes used to classify the language competency dimension.

Two standards could be used to classify the dimensions:

<sup>7</sup> Official currencies of the Member States of EU: <http://publications.europa.eu/code/en/en-370302.htm>

<sup>9</sup> CEFR: [http://www.coe.int/t/dg4/linguistic/CADRE1\\_EN.asp](http://www.coe.int/t/dg4/linguistic/CADRE1_EN.asp)

- The EURES Standard, based on CEFR<sup>9</sup>:

Code	Description
CEF-Understanding-Listening	Listening comprehension
CEF-Understanding-Reading	Reading comprehension
CEF-Speaking-Interaction	Spoken interaction
CEF-Speaking-Production	Spoken production
CEF-Writing-Interaction	Written interaction
CEF-Writing-Production	Written production

The code attribute values are as follows:

Attributes	Value
listName	EURES_Dimension
listVersionID	1.0
name	{Code name or description}
listURI	http://www.coe.int
listSchemeURI	PENDING DEFINITION

This example fills in the *Spoken interaction* skill:

```
<CompetencyDimensionTypeCode listName="EURES_Dimension" listVersionID="1.0"
name="Spoken interaction" listURI="http://www.coe.int" listSchemeURI="PENDING"
>CEF-Speaking-Interaction</CompetencyDimensionTypeCode>
```

- The EURES Standards: ESCO Skills/Competences<sup>1011</sup>. The values are in the ESCO official website:
  - <https://ec.europa.eu/esco/portal/browse?type=Skill>

The code attribute values are as follows:

Attributes	Value
listName	ESCO_Skills
listVersionID	ESCOv1
name	{Code name or description}
listURI	PENDING
listSchemeURI	PENDING

This example fills in the *Spoken interaction* skill:

```
<CompetencyDimensionTypeCode listName="ESCO_Skills" listVersionID="ESCOv1"
name="Spoken interaction" listURI="PENDING" listSchemeURI="PENDING"
>http://ec.europa.eu/esco/skill/367171</CompetencyDimensionTypeCode>
```

#### 4.28.9 Disability Level Code [CL12]

These are the codes used to classify the level of disability.

The New EURES Standard is used.

Code	Description
1	Needs another person's assistance with daily life tasks
2	Inability to perform one or more sensory or physical functions
3	Experiences difficulties in multiple sensory or physical functions
4	Experiences difficulty in just one function
5	No limitations in functioning

<sup>9</sup> CEFR: [http://www.coe.int/t/dg4/linguistic/CADRE1\\_EN.asp](http://www.coe.int/t/dg4/linguistic/CADRE1_EN.asp)

<sup>10</sup> In version 1.2, ESCO Skills are not validated.

<sup>11</sup> In version 1.2, ESCO Skills are not validated.

The code attribute values are as follows:

Attributes	Value
listName	EURES_DisabilityLevelCode
listVersionID	1.0
name	{Code name or description}
listURI	<a href="https://ec.europa.eu/eures">https://ec.europa.eu/eures</a>
listSchemeURI	PENDING DEFINITION

This example fills in *No limitations in functioning* in the disability level:

```
<DisabilityLevelCode listName="EURES_DisabilityLevelCode" listVersionID="1.0"
name="No limitations" listURI="http://ec.europa.eu/eures"
>5</DisabilityLevelCode>
```

#### 4.28.10 Drivers License Codes [CL14]

Codes used to specify a type of drivers licence.

The **EURES Standards: Directive 2006/126/EC (EU)**<sup>12</sup> standard is used.

Code	Description
AM	Mopeds
A1	Motorcycles and motor tricycles not exceeding a certain power level The minimum age for category A1 is 16 years.
A2	Motorcycles not exceeding a certain power level The minimum age for category A2 is 18 years.
A	Motor tricycles not exceeding a certain power level and a minimum age of 21 years.
B1	Quadricycles The minimum age for category B1 is 16 years,
B	Motor vehicles not exceeding certain authorised mass. The minimum age for category B is 18 years.
BE	A combination of vehicles consisting of a tractor vehicle in category B and a trailer or semi-trailer not exceeding a certain mass The minimum age for category BE is 18 years.
C1	Motor vehicles which are between mass The minimum age for category C1 is 18 years.
C1E	A combination of vehicles consisting of a tractor vehicle in category B or C1 and a trailer or semi-trailer which are between mass The minimum age for category C1E is 18 years.
C	Motor vehicles whose maximum authorised exceed a mass and carriage of no more than eight passengers, including the driver Motor vehicles in this category may be combined with a trailer not exceeding a maximum authorised mass. The minimum age for category C is 21 years.
CE	A combination of vehicles where the tractor vehicle is category C and its trailer or semi-trailer does not exceed a maximum authorised mass The minimum age for categories CE is 21 years.
D1	Motor vehicles or carriage of no more than 16 passengers including the driver and with a maximum length Motor vehicles in this category may be combined with a trailer not exceeding a maximum authorised mass. The minimum age for categories D1 is 21 years.
D1E	A combination of vehicles where the tractor vehicle is category C1 and its trailer does not exceed a maximum authorised mass. The minimum age for categories D1E is fixed at 21 years.
DE	Combination of vehicles where the tractor vehicle is in category D and its trailer not exceeds a maximum authorised mass. The minimum age for categories DE is fixed at 24 years.

The code attribute values are as follows:

<sup>12</sup> EU – Directive 2006/126/EU: <http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2006:403:0018:0060:EN:PDF>

Attributes	Value
listName	EURES_LicenceTypeCode
listVersionID	2006/126/EC
name	{Code name or description}
listURI	<a href="https://ec.europa.eu/eures">https://ec.europa.eu/eures</a>
listSchemeURI	Placeholder

This example fills in the A1 driver's license:

```
<LicenseTypeCode listName="EURES_LicenceTypeCode" listVersionID="2006/126/EC"
name="A1" listURI="http://ec.europa.eu/eures"
>A1</LicenseTypeCode>
```

#### 4.28.11 Education Level Codes [CL15]

The Education level the jobseeker has completed.

Two standards can be used to classify the education level:

- The EURES Standards: ISCED-2011 (UNESCO)<sup>13</sup>.

Code	Description
0	Early childhood education
1	Primary education
2	Lower secondary education
3	Upper secondary education
4	Post-secondary non-tertiary education
5	Short-cycle tertiary education
6	Bachelor or equivalent level
7	Masters or equivalent level
8	Doctoral or equivalent level

The code attribute values are as follows:

Attributes	Value
listName	EURES_ISCDEDucationLevel
listVersionID	2011
name	{Code name or description}
listURI	<a href="https://ec.europa.eu/eures">https://ec.europa.eu/eures</a>
listSchemeURI	Placeholder

This example fills in Master's code:

```
<EducationLevelCode listName="EURES_ISCDEDucationLevel" listVersionID="2011"
name="Master" listURI="http://ec.europa.eu/eures"
>7</EducationLevelCode>
```

- The EURES Standards: EQF (European Qualifications Framework)<sup>14</sup>

Code	Description
1	Basic general knowledge. Basic skills required to carry out simple tasks. Work or study under direct supervision in a structured context.
2	Basic factual knowledge of a field of work or study. Basic cognitive and practical skills required to use relevant information in order to carry out tasks and to solve routine problems using simple rules and tools. Work or study under supervision with some autonomy.
3	Knowledge of facts, principles, processes and general concepts, in a field of work or study.

<sup>13</sup> UNESCO – ISCED 2011: <http://www.uis.unesco.org/EDUCATION/Pages/international-standard-classification-of-education.aspx>

<sup>14</sup> EQF: [http://ec.europa.eu/eqf/home\\_en.htm](http://ec.europa.eu/eqf/home_en.htm)

Code	Description
	A range of cognitive and practical skills required to accomplish tasks and solve problems by selecting and applying basic methods, tools, materials and information. Take responsibility for completion of tasks in work or study; adapt own behaviour to circumstances in solving problems.
4	Factual and theoretical knowledge in broad contexts within a field of work or study. A range of cognitive and practical skills required to generate solutions to specific problems in a field of work or study. Exercise self-management within the guidelines of work or study contexts that are usually predictable, but are subject to change; supervise the routine work of others, taking some responsibility for the evaluation and improvement of work or study activities.
5	Comprehensive, specialised, factual and theoretical knowledge within a field of work or study and an awareness of the boundaries of that knowledge. A comprehensive range of cognitive and practical skills required to develop creative solutions to abstract problems. Exercise management and supervision in contexts of work or study activities where there is unpredictable change review and develop performance of self and others.
6	Advanced knowledge of a field of work or study, involving a critical understanding of theories and principles. Advanced skills, demonstrating mastery and innovation, required to solve complex and unpredictable problems in a specialised field of work or study. Manage complex technical or professional activities or projects, taking responsibility for decision making in unpredictable work or study contexts; take responsibility for managing professional development of individuals and groups.
7	Highly specialised knowledge, some of which is at the forefront of knowledge in a field of work or study, as the basis for original thinking and/or research; critical awareness of knowledge issues in a field and at the interface between different fields. Specialised problem-solving skills required in research and/or innovation in order to develop new knowledge and procedures and to integrate knowledge from different fields. Manage and transform work or study contexts that are complex, unpredictable and require new strategic approaches; take responsibility for contributing to professional knowledge and practice and/or for reviewing the strategic performance of teams.
8	Knowledge at the most advanced frontier of a field of work or study and at the interface between fields. The most advanced and specialised skills and techniques, including synthesis and evaluation, required to solve critical problems in research and/or innovation and to extend and redefine existing knowledge or professional practice. Demonstrate substantial authority, innovation, autonomy, scholarly and professional integrity and sustained commitment to the development of new ideas or processes at the forefront of work or study contexts including research.

The code attribute values are as follows:

Attributes	Value
listName	EURES_EQF
listVersionID	2008/C11/01
name	{Code name or description}
listURI	http://ec.europa.eu/esco/ConceptScheme/EQF2012/ConceptScheme
listSchemeURI	http://ec.europa.eu/esco/ConceptScheme/EQF2012/ConceptScheme

This example fills in the Masters code:

```
<EducationLevelCode listName="EURES_EQF" listVersionID="2008/C11/01" name="Master"
listURI="http://ec.europa.eu/esco/ConceptScheme/EQF2012/ConceptScheme"
listSchemeURI="http://ec.europa.eu/esco/ConceptScheme/EQF2012/ConceptScheme"
>7</EducationLevelCode>
```

The relationship between these code lists is as follows:

EQF	1	2	3	4	5	6	7	8
ISCED 2011	-	-	-	-	5	6	7	8

As can be seen, the ISCED 2011 codes from 0 to 4 do not match the EQF.

#### 4.28.12 File-Type Codes [CL17]

Codes used to identify the file type of the attachment

The **EURES Standard** is used.

Code	Description
photo	Image
doc	Word document
pdf	Adobe PDF

The code attribute values are as follows:

Attributes	Value
listName	EURES_FileTypeCode
listVersionID	1.0
name	{Code name or description}
listURI	https://ec.europa.eu/eures
listSchemeURI	Placeholder

This example fills in the certificate as evidence:

```
<oa:FileType listName="EURES_FileTypeCode" listVersionID="1.0" name="Image"
listURI="http://ec.europa.eu/eures"
>photo</oa:FileType>
```

#### 4.28.13 Gender Enum-Type Codes [CL18]

These codes classify the candidate's gender.

Their values come from a **HR OS-Standards list**:

Code	Description
NotKnow	The gender is not provided.
Male	The candidate is a man.
Female	The candidate is a woman.
NotSpecified	The gender is not applicable.

The code attribute values are as follows:

Attributes	Value
listName	GenderEnumType
listVersionID	1.0
name	{Code name or description}
listURI	http://www.hr-xml.org/
listSchemeURI	http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd

This example fills in the jobseeker's gender:

```
<GenderCode listName="GenderEnumType" listVersionID="1.0" name="Woman"
listURI="http://www.hr-xml.org/" listSchemeURI="http://www.hr-xml.org/3
..../Developer/Common/CodeLists.xsd"
>Female</GenderCode>
```

#### 4.28.14 Job Category Codes [CL20]

These are the codes classifying the type of job, which may be used for occupational classification.

Two standards can be used to classify the education level:

- The **EURES Standards: ISCO-08 (ISCO)**<sup>15</sup> taxonomy, this is the minimal required:

<http://www.ilo.org/public/english/bureau/stat/isco/isco08/>

<sup>15</sup> ISCO – ISCO-08: <http://www.ilo.org/public/english/bureau/stat/isco/isco08/>

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	ISCO2008
<b>listVersionID</b>	2008
<b>name</b>	{Code name or description}
<b>listURI</b>	<a href="http://ec.europa.eu/esco/ConceptScheme/ISCO2008">http://ec.europa.eu/esco/ConceptScheme/ISCO2008</a>
<b>listSchemeURI</b>	<a href="http://ec.europa.eu/esco/ConceptScheme/ISCO2008">http://ec.europa.eu/esco/ConceptScheme/ISCO2008</a>

This example fills in the job category as an ISCO code:

```
<JobCategoryCode listName="ISCO2008" listVersionID="2008" name="Legislators"
listURI="http://ec.europa.eu/esco/ConceptScheme/ISCO2008"
listSchemeURI="http://ec.europa.eu/esco/ConceptScheme/ISCO2008"
>1111</JobCategoryCode>
```

- The **EURES Standards: ESCO Occupations**<sup>163</sup> taxonomy, it will become mandatory from 2020:

<https://ec.europa.eu/esco/occupationbrowser>

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	ESCO_Occupations
<b>listVersionID</b>	ESCOv1
<b>name</b>	{Code name or description}
<b>listURI</b>	PENDING
<b>listSchemeURI</b>	PENDING

This example fills in the job category as an ESCO code:

```
<JobCategoryCode listName="ESCO_Occupations" listVersionID="ESCOv1" name="Head of
division" listURI="PENDING" listSchemeURI="PENDING"
>http://ec.europa.eu/esco/occupation/15690</JobCategoryCode>
```

#### 4.28.15 Language Codes [CL24]

These codes include all languages of the world, because the candidate can speak any of them.

The standard used is **EURES Standards: ISO-639-1:2002 Alpha 2 (ISO)**<sup>17</sup>, because:

- It is more restrictive
- It focuses on languages for which specialized terminologies have been developed.

The full code list is shown in: [http://www.loc.gov/standards/iso639-2/php/English\\_list.php](http://www.loc.gov/standards/iso639-2/php/English_list.php)

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	ISO-639-1/2-Languages
<b>listVersionID</b>	639-1:2002 Alpha 2
<b>name</b>	{Code name or description}
<b>listURI</b>	<a href="http://www.loc.gov">http://www.loc.gov</a>
<b>listSchemeURI</b>	Placeholder

This example fills in the English language:

<sup>17</sup> ISO – ISO-639-1:2002 Alpha 2: [http://www.iso.org/iso/catalogue\\_detail?csnumber=22109](http://www.iso.org/iso/catalogue_detail?csnumber=22109)

<sup>17</sup> ISO – ISO-639-1:2002 Alpha 2: [http://www.iso.org/iso/catalogue\\_detail?csnumber=22109](http://www.iso.org/iso/catalogue_detail?csnumber=22109)

```
<PrimaryLanguageCode listName="ISO-639-1/2-Languages" listVersionID="639-1:2002
Alpha 2" name="English" listURI="http://www.loc.gov"
>EN</PrimaryLanguageCode>
```

#### 4.28.16 Language Proficiency Codes [CL25]

Language Proficiency is the level of proficiency in a language.

The standard used is the **EURES Standards: CEFR (Common European Framework of Reference for Language)**<sup>18</sup>.

Code	Description
A1	Beginner
A2	Elementary
B1	Intermediate
B2	Upper intermediate
C1	Advanced
C2	Proficiency

The code attribute values are as follows:

Attributes	Value
listName	EURES_ProficiencyLevel
listVersionID	1.0
name	{Code name or description}
listURI	http://www.coe.int
listSchemeURI	Placeholder

As currency is filled in as an attribute, it is filled in differently:

```
<ScoreText minimumScoreText="C2" maximumScoreText="A1">
```

#### 4.28.17 Members Countries from Europe [CL29]

These codes are the European Union countries.

The standard used is the European Union countries based on **EURES Standards: ISO 3166 alpha-2**<sup>19</sup>, adapted to Member States<sup>20</sup>.

Code	Description
AT	Austria
BE	Belgium
BG	Bulgaria
CY	Cyprus
CZ	Czech Republic
DK	Denmark
EE	Estonia
FI	Finland
FR	France
DE	Germany
GR	Greece
HR	Croatia
HU	Hungary
IR	Ireland
IT	Italy
LV	Latvia
LT	Lithuania
LU	Luxembourg
MT	Malta

<sup>18</sup> CEFR: [http://www.coe.int/t/dg4/linguistic/CADRE1\\_EN.asp](http://www.coe.int/t/dg4/linguistic/CADRE1_EN.asp)

<sup>19</sup> ISO-3166 Alpha-2: [http://www.iso.org/iso/country\\_codes/iso\\_3166\\_code\\_lists/country\\_names\\_and\\_code\\_elements.htm](http://www.iso.org/iso/country_codes/iso_3166_code_lists/country_names_and_code_elements.htm)

<sup>20</sup> Member States of the European Union: <http://publications.europa.eu/code/en/en-370100.htm>

Code	Description
NL	Netherlands
PL	Poland
PT	Portugal
RO	Romania
SK	Slovakia
SI	Slovenia
ES	Spain
SE	Sweden
UK	United Kingdom

The code attribute values are as follows:

Attributes	Value
listName	EURES_MemberCountries
listVersionID	3166-1-alpha-2
name	{Code name or description}
listURI	http://www.iso.org/iso/
listSchemeURI	PENDING DEFINITION

This example fills in the country as *Belgium* code:

```
<CountryCode listName="EURES_MemberCountries" listVersionID="3166-1-alpha-2"
  name="Belgium" listURI="http://www.iso.org/iso/" listSchemeURI="PENDING"
>BE</CountryCode>
```

#### 4.28.18 NACE Codes [CL31]

NACE Codes (Statistical classification of economic activities in the European Community) identify the current or past job's business sector or industry.

The **EURES Standards: EU<sup>21</sup>** is the standard used.

The list is provided on its website [http://ec.europa.eu/competition/mergers/cases/index/nace\\_all.html](http://ec.europa.eu/competition/mergers/cases/index/nace_all.html)

The code attribute values are as follows:

Attributes	Value
listName	NACE_r2
listVersionID	NACE REVISION 2
name	{Code name or description}
listURI	http://ec.europa.eu/esco/ConceptScheme/NACErev2/cs
listSchemeURI	Placeholder

This example fills in industry code as *central banking*:

```
<IndustryCode listName="NACE_r2" listVersionID="NACE REVISION 2" name="central
  banking" listURI="http://ec.europa.eu/esco/ConceptScheme/NACErev2/cs"
>K64.1.1</IndustryCode>
```

#### 4.28.19 Name Enum-Type Codes [CL32]

These codes classify the type of name.

Their values come from an **HR-Open Standards list**, and it is an enumeration:

Code	Description
CurrentName	The name indicated is the current name.
FormerName	The name indicated is prior to marriage.

<sup>21</sup> EU – NACE: [http://ec.europa.eu/competition/mergers/cases/index/nace\\_all.html](http://ec.europa.eu/competition/mergers/cases/index/nace_all.html)

Code	Description
<b>BirthName</b>	The name indicated is the name given at birth.
<b>Alias</b>	The name indicated is a pseudonym.

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	NameTypeCodeEnumType
<b>listVersionID</b>	1.0
<b>name</b>	{Code name or description}
<b>listURI</b>	http://www.hr-xml.org/
<b>listSchemeURI</b>	http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd

This example fills in with the jobseeker's name as the *birthName*:

```
<PersonName nameTypeCode="BirthName"/>
```

#### 4.28.20 Official Languages in European Country Codes [CL33]

These codes are only the official languages in European Countries<sup>22</sup>.

The standard used is **EURES Standards: ISO-639-1:2002 Alpha 2 (ISO)**<sup>23</sup> because:

- It is more restrictive
- It focuses on languages for which specialized terminologies have been developed.

Code	Description
<b>bg</b>	Bulgarian
<b>cs</b>	Czech
<b>da</b>	Danish
<b>de</b>	German
<b>el</b>	Greek
<b>en</b>	English
<b>es</b>	Spanish
<b>et</b>	Estonian
<b>fi</b>	Finnish
<b>fr</b>	French
<b>ga</b>	Irish
<b>hr</b>	Croatian
<b>hu</b>	Hungarian

Code	Description
<b>is</b>	Icelandic
<b>it</b>	Italian
<b>lt</b>	Lithuanian
<b>lv</b>	Latvian
<b>mt</b>	Maltese
<b>nl</b>	Dutch
<b>no</b>	Norwegian
<b>pl</b>	Polish
<b>pt</b>	Portuguese
<b>ro</b>	Romanian
<b>sk</b>	Slovak
<b>sl</b>	Slovenian
<b>sv</b>	Swedish

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	EURES_EULanguageCodes
<b>listVersionID</b>	639-1:2002
<b>name</b>	{Code name or description}
<b>listURI</b>	http://www.loc.gov
<b>listSchemeURI</b>	PENDING DEFINITION

This example fills in the English language:

```
<CandidateProfile languageCode="en"/>
```

#### 4.28.21 Organization Ownership Codes [CL34]

These codes classify the organisation ownership.

<sup>22</sup> Official languages in EU: <http://publications.europa.eu/code/en/en-370200.htm>

<sup>23</sup> ISO – ISO-639-1:2002 Alpha 2: [http://www.iso.org/iso/catalogue\\_detail?csnumber=22109](http://www.iso.org/iso/catalogue_detail?csnumber=22109)

Their values come from an **HR-Open Standards** list:

Code	Description
<b>public</b>	
<b>private</b>	
<b>non-profit</b>	
<b>government</b>	

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	OrganizationOwnershipTypeCodeContentType
<b>listVersionID</b>	1.0
<b>name</b>	{Code name or description}
<b>listURI</b>	http://www.hr-xml.org/
<b>listSchemeURI</b>	http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd

This example fills in the preferred organisation ownership as private:

```
<OrganizationOwnershipTypeCode listName="OrganizationOwnershipTypeCodeContentType"
listVersionID="1.0" name="private" listURI="http://www.hr-xml.org/"
listSchemeURI="http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd">
private</OrganizationOwnershipTypeCode>
```

#### 4.28.22 Organization Size Codes [CL35]

These codes classify an organisation's size or business scope.

The standards used to classify small and medium-sized enterprises are **EURES Standards: EU – C (2003) 1422<sup>24</sup>**. Large enterprises have been added, as described in **Eurostat<sup>25</sup>**, to cover all sizes.

Code	Description
<b>microenterprise</b>	0 to 9 people
<b>smallenterprise</b>	10 to 49 people
<b>medium-sizedenterprise</b>	50 to 249 people
<b>largeenterprise</b>	More than 250 people

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	EURES_OrganizationSize
<b>listVersionID</b>	(2003)1422
<b>name</b>	{Code name or description}
<b>listURI</b>	https://ec.europa.eu/eures
<b>listSchemeURI</b>	Placeholder

This example fills in the preferred organisation size as a small enterprise:

```
<OrganizationSizeCode listName="EURES_OrganizationSize" listVersionID="(2003)1422"
name="small enterprise" listURI="https://ec.europa.eu/eures">
smallenterprise</OrganizationSizeCode>
```

#### 4.28.23 Patent Status Enum-Type Codes [CL36]

These codes describe the status of the patent.

Their values come from an **HR-Open Standards** list, and it is an enumeration:

<sup>24</sup> EU – C (2003) 1422: <http://publications.europa.eu/code/en/en-5000300.htm>

<sup>25</sup> Eurostat – Enterprise size: [http://epp.eurostat.ec.europa.eu/statistics\\_explained/index.php/Glossary:Large\\_enterprises](http://epp.eurostat.ec.europa.eu/statistics_explained/index.php/Glossary:Large_enterprises)

Code	Description
PatentIssued	The patent has been issued.
PatentPending	The patent's processing is pending.
PatentFiled	The patent has been filed.

This example fills in the patent status as issued:

```
<PatentStatus>PatentIssued</PatentStatus>
```

#### 4.28.24 Position Offering Codes [CL37]

These codes classify the preferred contract type.

Their values come from an **HR-Open Standards list** and **EURES Standard**:

Code	Description
DirectHire	Hired directly by the employee, without any external staffing
Temporary	Position only for certain period
TemporaryToHire	Position starting as a temporary job, with the option of a permanent job
ContractToHire	Position starting as a contract job, with the option of a permanent job
Contract	Contract hire
Internship	Period of job training
Apprenticeship	Combines job training with academic education
Seasonal	Temporary and short-term job
OnCall	Position on an "as needed" basis
RecruitmentReserve	Candidate is on the waiting list for the job vacancy

The code attribute values are as follows:

Attributes	Value
listName	PositionOfferingTypeCodeContentType
listVersionID	1.0
name	{Code name or description}
listURI	http://www.hr-xml.org/
listSchemeURI	http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd

This example fills in the jobseeker's preferred contract type as temporary:

```
<PositionOfferingTypeCode listName="PositionOfferingTypeCodeContentType"
listVersionID="1.0" name="temporary job" listURI="http://www.hr-xml.org/"
listSchemeURI="http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd">
Temporary</PositionOfferingTypeCode>
```

#### 4.28.25 Position Schedule Codes [CL38]

These codes classify the general schedule.

Their values come from an **HR-Open Standards list**:

Code	Description
FullTime	Minimum number of hours defined by the employer
PartTime	Fewer hours per week than a full-time job
FlexTime	Variable work schedule
Any	Any type of schedule is allowed

The code attribute values are as follows:

Attributes	Value
listName	PositionScheduleCodeContentType
listVersionID	1.0
name	{Code name or description}

<b>listURI</b>	http://www.hr-xml.org/
<b>listSchemeURI</b>	http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd

This example fills in the jobseeker's preferred schedule as part time:

```
<PositionScheduleTypeCode listName="PositionScheduleCodeContentType"
listVersionID="1.0" name="part time job" listURI="http://www.hr-xml.org/"
listSchemeURI="http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd"
>PartTime</PositionOfferingTypeCode>
```

#### 4.28.26 Position Seeking Status Enum Type [CL39]

The position seeking statuses are given in the following table.

These values come from an **HR-Open Standards** list:

Code	Description
<b>Active</b>	The candidate is actively engaged in a job search.
<b>Passive</b>	The candidate is passively considering opportunities.
<b>NotConsideringPositions</b>	The candidate is not considering job opportunities.

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	PositionSeekingCodeContentType
<b>listVersionID</b>	1.0
<b>name</b>	{Code name or description}
<b>listURI</b>	http://www.hr-xml.org/
<b>listSchemeURI</b>	http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd

This example fills in with the jobseeker's position status as *active*:

```
<PositionSeekingStatusCode listName="PositionSeekingCodeContentType"
listVersionID="1.0" name="active" listURI="http://www.hr-xml.org/"
listSchemeURI="http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd"
>Active</PositionSeekingSeekingCode>
```

#### 4.28.27 Postcodes [CL40]

These codes are the Address postcodes.

The standard used is the **NUTS 2013 and National Institutes**<sup>26</sup>, but not all countries use this standard. Eight European Countries use their own Institutions to define their postcodes.

The following countries use their own Institutional standards:

Country	Institute	Website
<b>Greece</b>	ELTA Hellenic Post	www.elta-net.gr
<b>Spain</b>	Correos	www.correos.es
<b>France</b>	La Poste - D.A.E.I.	www.mediapost.fr
<b>Netherlands</b>	TPG Post International	www.cendris.com
<b>Poland</b>	Poczta Polska	www.poczta-polska.pl
<b>Slovenie</b>	Posta Slovenije d.o.o.	www.posta.si
<b>Finland</b>	Suomen Posti	www.posti.fi
<b>Sweden</b>	Posten Sverige AB	www.postnummerservice.se

The code attribute values are as follows:

<sup>26</sup> NUTS 2013 and National Institutes:

[http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts\\_nomenclature/correspondence\\_tables/postcodes\\_and\\_nuts](http://epp.eurostat.ec.europa.eu/portal/page/portal/nuts_nomenclature/correspondence_tables/postcodes_and_nuts)

Attributes	Value
listName	EURES_PostalCodes
listVersionID	2010
name	{Code name or description}
listURI	http://epp.eurostat.ec.europa.eu/ (the countries that are not within the NUTS 2008 standards, this value will be the Institute's website)
listSchemeURI	PENDING DEFINITION

This example fills in the *Brussels* postcode:

```
<oa:PostalCode listName="EURES_PostalCodes" listVersionID="2010" name="Brussels"
listURI="https://ec.europa.eu/eures" listSchemeURI="PENDING"
>1020</oa:PostalCode>
```

#### 4.28.28 Precedence Enum-Type Codes [CL41]

This enumeration indicates the priority of the supplier, among others.

Its values come from an **HR-Open Standards** list:

Code	Description
1	Primary
2	Secondary
3	Tertiary
4	Quaternary
5	Quinary

This example fills in the precedence code as primary:

```
<PrecedenceCode>1</PrecedenceCode>
```

#### 4.28.29 Processing instruction codes [CL43]

Codes mandate the execution of a processing task on reception of a CV.

The **EURES Standard** is used and has the following structure: *hide+“element’s name”*.

Code	Description
hideCandidateName	Hide the jobseeker’s Name
hideCandidateDateOfBirth	Hide the jobseeker’s date of birth
hideCandidatePhoto	Hide the jobseeker’s photo
hideCandidateStreet	Hide the jobseeker’s street
hideCandidatePost	Hide the jobseeker’s postal code
hideCandidateCity	Hide the city where the jobseeker lives
hideCandidateRegion	Hide the region where the jobseeker lives
hideCandidateCountry	Hide the country where the jobseeker lives
hideCandidateLanguage	Hide the jobseeker’s primary language
hideCandidatePhone	Hide the jobseeker’s phone number
hideCandidateNation	Hide the jobseeker’s nationality
hideCandidateDrivingLicence	Hide the jobseeker’s driving license
hideCandidateWorkExperience	Hide the jobseeker’s work experience
hidePreviousEmployerData	Hide the previous employer data where the jobseeker worked.
hideCandidateEducation	Hide the jobseeker’s education
hideWorkingLanguages	Hide the jobseeker’s working languages
hideDesiredOccupation	Hide the jobseeker’s desired occupation
hideDesiredConditions	Hide the conditions of the jobseeker’s desired occupation
hidePresentationCoverLetter	Hide the jobseeker’s experience summary
hidePresentationVideo	Hide the jobseeker’s presentation video
hideAttachedDocuments	Hide the jobseeker’s attached documents
hideDesiredLocation	Hide the jobseeker’s desired location
hideCompanyDescription	Hide the company description of a job vacancy

The code attribute values are as follows:

Attributes	Value
listName	EURES_CV_ProcessingInstructionsCodes
listVersionID	1.0
name	{Code name or description}
listURI	https://ec.europa.eu/eures
listSchemeURI	PENDING DEFINITION

This example fills in the option of hide the previous employer data:

```
<ProcessingInstructionCode listName="EURES_CV_ProcessingInstructionsCode"
listVersionID="1.0" name="hide previous employer data"
listURI="https://ec.europa.eu/eures" listSchemeURI="PENDING"
>hidePreviousEmployerData</ProcessingInstructionCode>
```

#### 4.28.30 Publication Enum-Type Codes [CL59]

This enumeration indicates the type of publication.

Its values come from an **HR-Open Standards list**:

Code	Description
Article	Article
Book	Book
Conference	Conference
Other	Other type of publication

This example fills in the publication type as Article:

```
<FormattedPublicationDescription publicationCode="Article">Article about Machine
Learning in the Weekend Magazine</FormattedPublicationDescription>
```

#### 4.28.31 Referee Enum-Type Codes [CL46]

These codes classify the references.

Their values come from an **HR-Open Standards list**, and it is an enumeration:

Code	Description
Professional	It is a professional reference.
Personal	It is a personal reference.
Verification	It verifies the CV.

This example fills in the employer reference as professional:

```
<RefereeTypeCode>Personal</RefereeTypeCode>
```

#### 4.28.32 Remuneration Basis Codes [CL48]

These codes classify the primary or fundamental basis upon which pay is calculated for the position.

Their values come from an **HR-Open Standards list**:

Code	Description
Hourly	The candidate is paid according to the work done.
Salaried	Fix base paid
SalariedPlusCommission	Fix base paid, plus commission
CommissionOnly	Commissions paid

The code attribute values are as follows:

Attributes	Value
listName	RemunerationBasisCodeContentType
listVersionID	1.0
name	{Code name or description}
listURI	http://www.hr-xml.org/
listSchemeURI	http://www.hr-xml.org/3 ../Developer/Common/CodeLists.xsd

This example fills in the remuneration basis as *salaried*:

```
<RemunerationBasisCode listName="RemunerationBasisCodeContentType"
listVersionID="1.0" name="salaried" listURI="http://www.hr-xml.org/"
listSchemeURI="http://www.hr-xml.org/3 ../Developer/Common/CodeLists.xsd"
>Salaried</RemunerationBasisCode>
```

#### 4.28.33 Remuneration Type Codes [CL49]

These codes classify the type of pay or remuneration.

Their values come from an **HR-Open Standards** list:

Code	Description
BasePay	Initial rate of compensation
Commission	Commission paid
Bonus	Extra salary paid
ShortTermIncentive	Bonus to encourage the employee
ShiftPremium	Additional pay for working split shifts

The code attribute values are as follows:

Attributes	Value
listName	RemunerationTypeCodeContentType
listVersionID	1.0
name	{Code name or description}
listURI	http://www.hr-xml.org/
listSchemeURI	http://www.hr-xml.org/3 ../Developer/Common/CodeLists.xsd

This example fills in the remuneration type as *base pay*:

```
<RemunerationTypeCode listName="RemunerationTypeCodeContentType"
listVersionID="1.0" name="base pay" listURI="http://www.hr-xml.org/"
listSchemeURI="http://www.hr-xml.org/3 ../Developer/Common/CodeLists.xsd"
>BasePay</RemunerationTypeCode>
```

#### 4.28.34 Remuneration Rate Interval Codes [CL50]

An interval of time is used to express a rate of pay or remuneration.

Their values come from a **HR-Open Standards** list:

Code	Description
Hour	Remuneration per hour.
Day	Remuneration per day.
Week	Remuneration per week.
TwoWeeks	Remuneration per two weeks.
FourWeeks	Remuneration per four weeks.
HalfMonth	Remuneration per half month.
Month	Remuneration per month.
TwoMonths	Remuneration per two months.

Code	Description
Quarter	Remuneration per quarter.
SeasonalTerm	Remuneration per seasonal term.
HalfYear	Remuneration per half year.
Year	Remuneration per year.
QuarterToDate	Remuneration per quarter to date.
YearToDate	Remuneration per year to date.
Once	Whole remuneration.

The code attribute values are as follows:

Attributes	Value
listName	PayRateIntervalCodeContentType
listVersionID	1.0
name	{Code name or description}
listURI	http://www.hr-xml.org/
listSchemeURI	http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd

This example fills in with an interval of payment per year:

```
<RemunerationRateIntervalCode listName="PayRateIntervalCodeContentType"
listVersionID="1.0" name="per year" listURI="http://www.hr-xml.org/"
listSchemeURI="http://www.hr-xml.org/3 ..../Developer/Common/CodeLists.xsd"
>Year</RemunerationRateIntervalCode>
```

#### 4.28.35 Social Benefits Codes [CL52]

Social benefits codes specify an additional benefit beyond the salary.

The **EURES standard New** is used:

Code	Description
1	Accommodation included
2	Meals included
3	Relocation assisted
4	Travel expenses
5	Medical insurance
6	Dental insurance
7	Vision insurance
8	Life insurance
9	Short-term disability insurance
10	Long-term disability insurance
11	Retirement plan
12	Vehicle consideration
13	Relocation assistance
14	Expatriate benefits
15	Other benefits

The code attribute values are as follows:

Attributes	Value
listName	EURES_SocialBenefitsCodes
listVersionID	1.0

<b>name</b>	{Code name or description}
<b>listURI</b>	<a href="https://ec.europa.eu/eures">https://ec.europa.eu/eures</a>
<b>listSchemeURI</b>	PENDING DEFINITION

This example fills in a benefit of life insurance:

```
<OtherBenefitsTypeCode listName="EURES_SocialBenefitsCodes" listVersionID="1.0"
name="life insurance" listURI="https://ec.europa.eu/eures" listSchemeURI="PENDING"
>8</OtherBenefitsTypeCode>
```

#### 4.28.36 Unit Codes [CL54]

These codes classify the type of unit measurement.

The standard used is **EU – Units of Measurement**<sup>27</sup>:

Code	Description
<b>km</b>	Kilometre
<b>day</b>	Day
<b>week</b>	Week
<b>Year</b>	Year

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	EURES_UnitCodes
<b>listVersionID</b>	1.0
<b>name</b>	{Code name or description}
<b>listURI</b>	<a href="https://ec.europa.eu/eures">https://ec.europa.eu/eures</a>
<b>listSchemeURI</b>	PENDING DEFINITION

This example fills in a year as a unit code:

```
<ExperienceMeasure unitCode="years">5</ExperienceMeasure>
```

#### 4.28.37 Version Codes [CL55]

These codes classify the EURES HR Standard version.

Code	Description
<b>1.0</b>	
<b>1.1</b>	
<b>1.2</b>	

#### 4.28.38 Mime Codes [CL56]

These codes specify the data mime code of an attachment.

The **EURES standard New** is used:

Code	Description
application/msword	Mime type for Word documents (.doc)
application/vnd.openxmlformats-officedocument.wordprocessingml.document	Mime type for Word documents (.docx)
application/pdf	Mime type for PDF documents
image/gif	Mime type for GIF's images
image/jpeg	Mime type for JPEG's images

<sup>27</sup> EU – Units of Measurement: <http://publications.europa.eu/code/en/en-5000300.htm>

Code	Description
image/png	Mime type for PNG's images
image/tiff	Mime type for TIFF's images
image/bmp	Mime type for BMP's images

The code attribute values are as follows:

Attributes	Value
<b>listName</b>	EURES_MimeCodes
<b>listVersionID</b>	1.0
<b>name</b>	{Code name or description}
<b>listURI</b>	<a href="https://ec.europa.eu/eures">https://ec.europa.eu/eures</a>
<b>listSchemeURI</b>	

This example fills in the year as unit code:

```
<oa:EmbeddedData mimeCode="image/jpeg" encodingCode="base64Binary"
>/9j/4AAQSkZJRgABAQAAAQABAAAD//gA7Q1JFQVRPUjog</oa:EmbeddedData>
```

## 5 Annex 1. Ordered List With all Code Lists

This annex provides an ordered list with all code lists and pages referenced. Each reference corresponds to an element reference.

### Rules

Candidate Source Type Codes [CL04] .....	26, 172
Channel Type Codes [CL05] .....	32, 43, 173
Contact Use Type Codes [CL06] .....	32, 43, 173
Country Codes [CL07] .....	37, 174
Currency Codes [CL09] .....	133, 174
Degree Codes [CL10] .....	67, 175
Dimension Codes [CL11] .....	82, 175
Disability Level Code [CL12] .....	52, 176
Drivers License Codes [CL14] .....	141, 177
Education Level Codes [CL15] .....	65, 178
File-Type Codes [CL17] .....	169, 179
Gender Enum-Type Codes [CL18] .....	37, 180
Job Category Codes [CL20] .....	86, 180
Language Codes [CL24] .....	37, 181
Language Proficiency Codes [CL25] .....	182
Members Countries from Europe [CL29] .....	182
NACE Codes [CL31] .....	89, 183
Name Enum-Type Codes [CL32] .....	31, 41, 107, 183
Organization Ownership Codes [CL34] .....	184
Organization Size Codes [CL35] .....	119, 185
Patent Status Enum-Type Codes [CL36] .....	157, 185
Position Offering Codes [CL37] .....	121, 186
Position Schedule Codes [CL38] .....	186
Position Seeking Status Enum Type [CL39] .....	19, 187
Postcodes [CL40] .....	187

## 7 Annex 3. Treatment of Unfulfilled Business Rules

This annex provides that an action be carried out for each Business Rule that is not met:

Business Rule	Treatment of the BR unfulfilled
<b>BR-COM-01</b> : If not otherwise specified, "EN" (English) is used as the default language.	English is taken as the default language.
<b>BR-COM-02</b> : Multiple profiles are allowed, but it must be expressed in different languages.	The document is rejected.
<b>BR-COM-04</b> : Compulsory use of the "EURES_EULanguageCodes-CodeList.gc" list defined by EURES. Adapted EU countries only are used, based on ISO 639-1:2002 Alpha-2.	The value is not saved. If the element belongs to the EURES Technical minimum layer, the document is rejected.
<b>BR-COM-05</b> : If not specified, the "validFrom" date will default to "assigned by EURES on reception".	The date is assigned by EURES on reception.
<b>BR-COM-06</b> : Compulsory Date Format is: YYYY-MM-DD, YYYY-MM, YYYY or YYYY-MM-DDThh:mm:ss.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected. The timezone considered is always UTC=0;
<b>BR-COM-07</b> : If not specified, the "validTo" date will be decided by EURES depending on the transaction context.	The date is assigned by EURES on reception.
<b>BR-COM-08</b> : The Document ID identifier must be a UUID and it must be provided by the first sender of the document.	The document is rejected.
<b>BR-COM-09</b> : The Open HR-Open Standards Code List "NameTypeCodeEnumType" must be used to codify the /PersonName /NameTypeCode.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-10</b> : If the Communication element is filled in, at least one of its sub elements should be filled in too.	The Communication element and its sub elements are not saved.
<b>BR-COM-11</b> : Compulsory use of the "LanguageCodes-CodeList.gc" list defined by EURES. This is based on ISO-639-1:2002 Alpha-2, which includes all world languages.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-12</b> : Compulsory use of the "Countries-CodeList.gc" list defined by EURES. This is based on ISO 3166-1 Alpha-2, which includes all countries of the world.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-13</b> : The Open HR-Open Standards Code List "ChannelCodeContentType" must be used to codify the /ChannelCode element.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-14</b> : The Open HR-Open Standards Code List "ContactUseCodeContentType" must be used to codify the /UseCode element.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-15</b> : Compulsory use of the "EURES_ISCEDEducationLevel-CodeList.gc" list defined by EURES. This is based on ISCED-2011 (UNESCO). Or "EURES_EQF-CodeList.gc", list defined by EURES and based on EQF (EU).	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-16</b> : At least one of its sub-elements must be provided.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-17</b> : Compulsory use of the "EURES_DegreeType-CodeList.gc" list defined by EURES. This is based on ESCO Qualifications – version 1.0. <sup>2</sup>	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-20</b> : Compulsory use of the "NACE-CodeList.gc" list defined by EURES. This is based on EU NACE.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-21</b> : Compulsory use of the "EURES_CountrySubdivisionCodes-CodeList.gc" list defined by EURES. This is based on NUTS 2013 – Level 3.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-22</b> : Compulsory use of the "EURES_PostalCodes.gc" list defined by EURES. This is based on NUTS 2013 and National Institutes.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-26</b> : Compulsory use of the "EURES_OrganizationSize-CodeList.gc" list defined by EURES. This is based on EU – C (2003) 1422, including Large enterprises.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-27</b> : Compulsory use of the "OrganizationOwnershipTypeCodeContentType" list.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.

Business Rule	Treatment of the BR unfulfilled
<b>BR-COM-29</b> : Compulsory use of the "ISCO2008-CodeList.gc" list defined by EURES and based on ISCO-08. Alternatively, use of ESCO Occupations – version 1.0.3	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-30</b> : Compulsory use of the "RemunerationBasisCodeContentType" list.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-31</b> : All its sub elements must be expressed using the same currency.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-32</b> : Compulsory use of the "RemunerationCodeContentType" list.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-33</b> : Compulsory use of the "RemunerationRateIntervalCodeContentType" list.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-34</b> : Compulsory use of EURES CodeList "EURES_CurrencyCodes-CodeList.gc" for specifying the Amount's currencyID attributes.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-35</b> : Compulsory use of the "EURES_FileTypeCode-CodeList.gc" list defined by EURES.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-36</b> : Compulsory use of the "EURES_UnitCodes-CodeList.gc" list defined by EURES. This is based on EU – Units of Measurement.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-37</b> : Compulsory use of the "EURES_Dimension-CodeList.gc" list defined by EURES. This is based on CEFR, if TaxonomyID's value is "language".	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-38</b> : Compulsory use of the "PositionOfferingCodeContentType" list.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-39</b> : Compulsory use of the "PositionScheduleCodeContentType" list.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-40</b> : Compulsory use of the "EURES_SocialBenefitsCodes-CodeList.gc" list defined by EURES.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-41</b> : Compulsory use of the "EURES_LicenseTypeCode-CodeList" list. This is based on Directive 2006/126/EC.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-42</b> : An Attachment shall not embed and simultaneously refer to an URI that contains the same document. External references to documents, using the URI element, are the recommended method (when possible) for attaching documents.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-43</b> : Multiple entries of this code list are allowed.	If the values come from a different code list, they will not be saved. If the element belongs to EURES Technical minimum layer, the document will be rejected.
<b>BR-COM-44</b> : One value for each code list is allowed.	If multiple entries for the same code list are added, only the first value of that code list will be saved.
<b>BR-COM-45</b> : Compulsory use of EURES HR Standard version Version Codes [CL55]	The document is rejected.
<b>BR-COM-46</b> : Compulsory use of Language Code [CL24], based on ISO-639-1:2002 Alpha 2 (ISO), if TaxonomyID's value is "language".	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-47</b> : Compulsory use of Language Proficiency Codes [CL25], if TaxonomyID's value is "language".	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-COM-48</b> : If "TypeCode" or "Score" element is specified, "TypeCode" or "Score" is a mandatory element.	The document is rejected.
<b>BR-COM-49</b> : If "CompetencyDimension / TypeCode" is specified, "ProficiencyLevel" is mandatory.	The document is rejected.
<b>BR-COM-50</b> : Compulsory use of Mime Codes [CL56].	The document is rejected.
<b>BR-COM-51</b> : Only 'base64Binary' is allowed.	'base64Binary' is taken as the default encoding type.
<b>BR-CV-01:</b> The order of the identifiers is established like: <ul style="list-style-type: none"> <li>• The <i>SchemaAgencyID</i> attribute of the <i>DocumentID</i> and <i>SupplierID</i> elements must be the same.</li> <li>• The Supplier's <i>Precedence</i> element must store the identifier's order of arrival.</li> </ul>	The document is rejected.
<b>BR-CV-02:</b> Only One Candidate (CV) per XML document instance is allowed.	The document is rejected.
<b>BR-CV-03:</b> If the /Candidate /Processing Information element is not present in a Candidate's XML document instance, no	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.

Business Rule	Treatment of the BR unfulfilled
visibility restrictions concerning this CV will be applied (i.e., all fields will be visible).	
<b>BR-CV-04:</b> The “PositionSeekingCodeContentType” HR-Open Standards Code List must be used to codify the /Candidate /Position Seeking Status.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-CV-05:</b> Compulsory use of the “EURES_ProcessingInstructionsCodeList.gc” list defined by EURES.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-CV-06:</b> The /Candidate /SupplierID must be an UUID provided by the sender system.	The document is rejected.
<b>BR-CV-07:</b> The HR-Open Standards Code List “CandidateSourceCodeType” must be used to codify the /Candidate /Supplier /Source.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-CV-08:</b> The HR-Open Standards Code List “PrecedenceEnumType” must be used to codify the /Candidate /Supplier /Precedence.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-CV-09:</b> If the identifier is not provided an automatic ID will be provided by the Interoperability Platform.	The identifier is provided by the Interoperability Platform.
<b>BR-CV-10:</b> Compulsory use of HR-Open Standards “GenderEnumType” to specify a Person’s Gender.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-CV-17:</b> Compulsory use of the “EURES_DisabilityLevelCode-CodeList.gc” list defined by EURES.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-CV-18:</b> Compulsory use of the code list defined by EURES.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-CV-22:</b> The HR-Open Standards Code List “RefereeTypeCode”.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-CV-26:</b> Compulsory use of the “PatentStatusCode” list.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.
<b>BR-CV-27:</b> Compulsory use of the “PublicationCode” list.	The value is not saved. If the element belongs to EURES Technical minimum layer, the document is rejected.

## 7 Annex 4. Examples

### 7.1 Example 1 [EX-01]

Example of the XML with the mandatory elements.

The example has passed the XML validation using Schematron. For each element, there is the description of the applied business rule(s).

```
<?xml version="1.0" encoding="UTF-8"?>
<!-- BR-CV-02: Only One Candidate (CV) per XML document instance is allowed.
     BR-COM-01: If not otherwise specified, "EN" (English) is used as the default language.
     BR-COM-02: If the master is not mentioned, it will take the first instance of the CV. -->
<Candidate xsi:schemaLocation="http://www.hr-xml.org/3 ../Developer/Nouns/Candidate.xsd"
  xmlns="http://www.hr-xml.org/3" xmlns:oa="http://www.openapplications.org/oagis/9"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" majorVersionID="3" minorVersionID="2">
    <!-- /ID (level 1): This only identifies a document within the Candidate's supplier
organisation.
        BR-CV-01:
          o The SchemaAgencyID attribute of the DocumentID and SupplierID elements
must be the same.
          o The Supplier's Precedence element must store the identifier's order of
arrival.
        BR-COM-08: The Document ID identifier must be a UUID and it must be provided by the first
sender of the document. -->
    <DocumentID schemeID="Test-0001" schemeName="DocumentIdentifier" schemeAgencyID="EURES"
